# Table of Contents

Foreword v  
In Memoriam vi  
Plenary Talks, General Sessions, and Session Chairs x  

**Review Papers** 1  

*Silas E. Gustafsson*  

*E. Litovsky, V. Issoupo, and J. Kleiman*  

**Composites and Granular Materials** 23  

Thermal Conductivity of Simulated Soils by the Needle Probe Method for Energy Foundation Applications 25  
*J. E. Low, F. A. Loveridge, and W. Powrie*  

Characterization Work and Comparative Testing of Expanded Glass Granulate as a Round Robin Material for Thermal Conductivity at Higher Temperatures 31  
*Roland Schreiner, and Ernst-G. Hencke*  

Metal Hydride Component Design (MHy-CoDe) Tool for the Selection of Hydrides in Thermal Systems 37  
*Essene L. Waters, Timothée L. Pourpoint and Tyler G. Voskuilen*  

Microstructure and Thermal Conductivity Modeling of Granular Nanoplatelet Assemblies 44  
*Ishan Srivastava, and Timothy S. Fisher*  

**Insulation Materials** 53  

Bilateral National Metrology Institute Comparison of Guarded-Hot-Plate Apparatus 55  
*Alain Koenen, Robert R. Zarr, and William F. Guthrie*  

Flexible Buffer Materials to Reduce Contact Resistance in Thermal Insulation Measurements 64  
*R. E. Clarke, G. Rosengarten, and B. Shabani*  

Determination of the Thermal Resistance of Pipe Insulation Material from Thermal Conductivity of Flat Insulation Products 74  
*Alain Koenen, and Damien M. Marquis*  

Comparative Testing of Thermal Conductivity for Thermal Insulation Products: The European Keymark Experience for More Than 50 Equipment at 25 Test Institutes 81  
*Erik Rasmussen, Clark Stacey, Alain Koenen, and Eva-Lotta W. Kurkinen*
TABLE OF CONTENTS

Modeling 91

Role of Thermal Conductivity for Thermoelectrics with Finite Contacts 93

Yee Rui Koh, Kazuaki Yazawa, and Ali Shakouri

Simulation and Analysis of an Integrated Device to Simultaneously Characterize Thermal and
Thermoelectric Properties 99

C. Miers, and A. Marconnet

Designing a Mechanically Robust Thermoelectric Module for High Temperature Application 106

Amirkoushyar Ziaabari, Kazuaki Yazawa, and Ali Shakouri

Steady Measurements 113

A New Facility for the Experimental Investigation on Nano Heat Transfer between Gas Molecules and
Ceramic Surfaces 115

D. Bayer, U. Gross, R. Wulf, and K. Raed

International Comparison of Guarded Hot Plate Facilities at Low Temperature on Mineral Wool
Insulation Material 123

Alain Koenen, Clark Stacey, Erik Rasmussen, Roland Schreiner, and Grażyna Swołek

Design of a Guarded Hot Plate for Measuring Thin Specimens of Polymer and Composite Materials 129

C. Stacey, M. J. Parfitt, A. J. Simpkin, and J. Wu

Simulation and Optimization of an In-plane Thermal Conductivity Measurement Structure
for Silicon Nanostructures 136

Y. Zeng, and A. Marconnet

Provisional Assessment of Candidate High-Temperature Thermal Conductivity Reference Materials
in the EMRP “Thermo” Project 142

U. Hammerschmidt, E. Turzó-András, R. Strnad, and A. Blahut

Transient Measurements 155

High-Temperature Thermal Properties Using Reflected Sample Generated Radiation 157

E. G. Wolff

Sub-Millisecond Measurements of Thermal Conductivity and Thermal Diffusivity Using
Micrometer-Sized Hot Strips 161

Mattias K. Gustavsson, Johan S. Gustavsson, Yi Ma, Åsa Haglund, Daniel Cederkrantz, and
Silas E. Gustafsson
