Purdue Polytechnic Institute and Project Lead The Way (PLTW)

The relationship between the Purdue Polytechnic and Project Lead The Way, the nation’s most well-known STEM curriculum, has been strong for 14 years. The Polytechnic Institute has participated in the professional development in PLTW curriculum of hundreds of Indiana and Midwest K-12 teachers since 2002, formally at their Kokomo Statewide Technology location, and starting this summer here on the West Lafayette campus. PLTW’s Engineering, Computer Science, and Elementary Launch pathways will all be taught in the Knoy Hall of Technology in June and July with an expected K-12 teacher enrollment of 150 teachers attending. The Polytechnic Institute is also the only College on campus that takes PLTW credit in three of its departments.
