Review & Discussion of the DIL Competencies

For this session your table has been assigned two of the Data Information Literacy (DIL) Competencies to discuss. Beginning with the first DIL Competency, please discuss the following questions:

- What are your observations / experiences with this data competency at your institution? Does your experience align with the DIL project findings?

- What roles or responsibilities do you see for librarians in teaching this competency to students? What additional skills or knowledge would librarians need to acquire and/or what partnerships could or should we form?

- What do you see as areas for further exploration or development of this competency?

Each of the tables will need to select a person to take note and record their discussion. Please use the flip chart by your table for this purpose. Flip charts will be transcribed and made available to all attendees after the symposium so please include as much information about your discussion as possible.

After 30 minutes or so, we will ask you to move on to discussing the second DIL Competency assigned to your table. Please respond to the same set of questions in discussing the second DIL Competency.

Each table will have a moderator to help facilitate discussion. If you have any questions please ask your moderator.
