How to take the anxiety out of finding back volume journals.

Our vast warehouse and comprehensive inventory continually contain the subject disciplines you require. We stock complete sets and individual volumes, in-print or out-of-print. We also buy your duplicate journals and provide appraisals.

For over thirty years we've taken the anxiety out of finding back volume journals, and built our reputation on kept promises. So write, call, FAX or access us through the FAXON-LINX network at the mailbox "Jaeger" for further information.

Complete, Authoritative Coverage of the Latest Developments in Engineering Science and Biotechnology

Cambridge Scientific Abstracts has joined forces with Engineering Information, Inc. (EI), a preeminent publisher of engineering and technical information, to bring you unparalleled coverage of leading-edge technology in key engineering specialties. Here's what you can expect from this new collaboration:

- EI/CSA joint publications cover all of the most significant, pace-setting developments in engineering and biotechnology.
- Information is drawn from EI's database—the most complete and authoritative engineering database in the world.
- Your subscription to any of our 9 engineering titles will include $150 worth of FREE document delivery service, plus a preferred customer discount for further orders.

Every new or newly-expanded EI/CSA abstracts journal will give you all of the outstanding features you now rely on from CSA: comprehensive indexing, convenient organization, and expertly-summarized information. In addition, you'll get broader, more current coverage of engineering, biotechnology, computer sciences, and other technical fields than ever before.

At the same time, the new four-part Cambridge Biotechnology Research Series provides you with wide-ranging, carefully summarized information across the rapidly-expanding field of biotechnology. Four titles cover bioengineering, medical and pharmaceutical biotechnology, agricultural and environmental biotechnology, and marine biotechnology.

Take advantage of our introductory discount

For a limited time, we'll be offering an introductory discount on all of our new engineering and biotechnology journals—without even higher discounts for current subscribers to other CSA titles. Take this opportunity to stretch your acquisitions budget even further by reserving your charter subscription now.

New and Expanded EI/CSA Engineering Joint Titles

- BioEngineering Abstracts
- Civil and Structural Engineering Abstracts
- Computer and Information Systems Abstracts*
- Electronics and Communications Abstracts*
- Environmental Engineering Abstracts
- Manufacturing and Process Engineering Abstracts
- Materials Science and Engineering Abstracts
- Mechanical Engineering Abstracts*
- Solid State and Supereconductivity Abstracts*

*These preexisting CSA journals will be expanded and co-published by EI starting in 1993.

For more information, or to reserve a complimentary copy of the premier issues of these journals, write or fax today:

(301) 961-6720
Attention: Marketing Department

The New Cambridge Biotechnology Research Series

- Agricultural/Environmental Biotechnology Abstracts
- BioEngineering Abstract (jointly published with EI)
- Marine Biotechnology Abstracts
- Medical/Pharmaceutical Biotechnology Abstracts
Sometimes the right partner can make all the difference.

Most subscription agencies offer the basics – consolidation of orders, prepayment, claiming. And some agencies promise automation, like online ordering and searchable title files. But only one agency delivers all that, plus something special...

Introducing the Readmore Partnership...the unique team approach that makes all the difference between standard service and peak performance.

With Readmore Academic, you've got a partner in serials management. Your Readmore Account Executive personally assists with all your day-to-day serials activities. The Academic Specialist is your liaison to Readmore's top management and publishers worldwide. And Readmore's technical team, working behind the scenes, uses state-of-the-art technology to bring you innovative services.

So don't go it alone. You know your collection, your library, your patrons and policies. We've got the experience with serials, automation, the global publishing industry plus all the resources of the international B.H. Blackwell group.

Together, we can build a customized package of services, systems and reports to meet your specific needs...keep you informed...and solve problems before they become problems.

Call 1 800-645-6595 today for more information about Readmore Academic subscription services. And see how the right partner can make all the difference for your library.

READMORE ACADEMIC
Your Partner in Serials Management

1933 Blackhorse Pike, Turnersville, New Jersey 08012
Some librarians have trouble checking out.

Your serials services should help you work faster, not longer.

Faxon sets you free to put your time where it is really needed. That's why more librarians choose Faxon's serials services than any other in the world. Faxon supports you with:

- Powerful automated tools to streamline your check-in, reducing errors, and saving you valuable time and resources.
- Management reports that provide collection-specific analysis and review to support your budgeting and planning.

- Expert, personal service.
- Concise, consolidated ordering and billing for journals worldwide, without wasted effort or miscommunication.

For more than 100 years, Faxon has given librarians trustworthy, consistent service in the areas where they need it most.

Let us help you check out on time. Call us at 800-766-0039.

The Faxon Company
Helping you manage a world of knowledge

In this segment of our series, Information on Information, we are departing from our usual format to describe some of our electronic products. A publishing product today is much less a “type” (i.e., a journal or a book) and much more the delivery of the required information in the most usable format. We are regularly asked about electronic developments and we felt this would be one way to bring all the pieces together.

THE DEMANDS OF THE ENDUSER

Ease of access and speed of retrieval represent scientists’ primary considerations when they consult their research library for information.

The most consistently stated needs of the scientific community are the ability to readily locate new and previously-published studies which are relevant to an ongoing study [ease of access] and the ability to receive such a document for evaluation within the briefest span of time possible [speed of retrieval].

Elsevier Science Publishers has explored many electronic options. We have introduced electronic product cautiously, with a specific eye to the standardization of formats, the development of appropriate hardware as well as software, and the availability of cost-effective manufacturing. Firmly committed to the enhancement of scientific information, Elsevier has successfully developed online databases as well as CD-ROM product for use by both the information specialist and the scientist in a variety of disciplines. The ultimate goal is greater efficiency for all participants in the information process.

ON-LINE DATABASES

For the biomedical clinician and researcher, we offer online:

- EMBASE: This online service is found on a variety of vendors and is undoubtedly our best known. As the computer became more accessible to scientists and researchers in the early ’70s, Excerpta Medica developed the database to complement its existing abstract journals. This online capability increased the speed with which the citations and abstracts printed in the journals could be accessed by librarians and provided to the enduser.

Today, EMBASE is one of the most current biomedical databases available, with articles appearing in the database within 30 days after receipt of the journal. Its comprehensiveness is outstanding, an international coverage of 3,500 biomedical journals from over 100 countries. Each year, 300,000 new citations are added to the over 4.5 million records currently in the database.

EMBASE is accessible through these vendors: BRS, BRS Colleague, Data-Star, DIALOG, and DIMDI.

- Through Maxwell Online, we offer four major Elsevier journals online as part of its BRS Colleague program. Obstetrics & Gynecology, Anesthesia & Analgesia, Journal of the American College of Cardiology, and the Annals of Thoracic Surgery are immediately accessible in a full text format exclusive of illustrations and tables.

- SEDBASE Online: This fulltext database contains evaluated synopses of over 10,000 clinically relevant drug side effects and interactions. Aimed at the clinician and medical investigator, SEDBASE provides a reliable and critical overview of all that is known with respect to the adverse reactions and interactions of drugs. Derived from Meyer’s Side Effects of Drugs, the database is accessible through DIALOG and Data-Star.

Within the physical sciences, we offer the following:

- GEOSBASE: This is a bibliographic database available online through DIALOG and ORBIT. Covering 1980 to the present, the database indexes worldwide literature on geography, geology, and their related disciplines. Access to over 2000 journals and 2000 books, proceedings volumes and monographs is available.

- WORLD TEXTILES: This is an on-line version of the Elsevier journal World Textiles Abstracts, accessible through DIALOG. The database provides abstracts of scientific, technical, and technico-economic literature relevant to fibre forming polymers, textile and related industries as well as the applications of those materials in conventional textile products. Its comprehensive international coverage reviews over 500 textile publications, offering full bibliographic citations.
FLUIDEX: Indexing and abstracting of journals, books, proceedings, standards, and research relating to fluid engineering form the substance of this database. Citations for technical research and applications articles in the fields of aerodynamics, wind energy, and all aspects of fluid dynamics, measurement and management are collected for easy access here. Available through DIALOG and ESA-IRS.

In cooperation with the Chemical Abstracts Service, Elsevier has entered four of its chemistry journals into Chemical Journals Online, a database offered via the Scientific & Technical Information Network. Full text of articles published from 1990 onwards in Analytical Chemistry, Journal of Organometallic Chemistry, Carbohydrate Research, and Applied Catalysts is available.

Useful to any scientist who ever attends a meeting:

EVENTLINE: This is a multidisciplinary, multinational database on past and forthcoming conferences, symposia, trade shows, workshops and major sporting events. With over 31,000 records, 1,200 record changes per month and monthly online updates, data from EVENTLINE can be used to locate vital meetings, identify conference hotels, airlines, and contact persons and even to obtain the deadline for submitted papers. Meetings in medicine, dentistry, theoretical and applied science and engineering are monitored by EVENTLINE for the benefit of our users. Access is available through DIALOG, Data-Star and Siteslex Online.

ADONIS

The ADONIS project is one which encompasses a wider group than Elsevier Science Publishers alone. Four publishers (Blackwell Scientific Publications, Elsevier, Pergamon Press, and Springer-Verlag) have joined as partners to offer a system of document delivery based on CD-ROM. Nearly 400 journals from more than 25 publishers in general categories of biology, chemistry, medicine, pharmacology, physics, veterinary medicine, and general science are indexed, scanned and stored in bit-map form within 14 working days of receipt of the printed journal issue from the individual publisher. CD-ROMs are distributed to service subscribers on a weekly basis for local printing of article copies. The initial focus of the ADONIS collection is the pharmaceutical industry and its most frequently ordered journals. After two years of testing, ADONIS begins commercial release with the 1991 journal issues.

CONCLUSIONS

These ventures into electronic formats by individual publishers as well as by consortia such as ADONIS will aid both publishers and librarians in this difficult transition period of attempting to meet scientific demand for currency of information and for speed of delivery. There are several other electronic programs in developmental stages and as these become available, we’ll return with more information.

New and Bestselling from VCH!

**NEW!**

**MICROBEAM ANALYSIS**  
*The Official Journal of the Microbeam Analysis Society*

**Editor-In-Chief:**  
Richard W. Linton, University of North Carolina-Chapel Hill

**Microbeam Analysis**, a peer-reviewed scholarly journal, is the official publication of the Microbeam Analysis Society (MAS). **Microbeam Analysis** reports on new developments in all techniques of microscopic analysis, with an emphasis on spectroscopy combined with microscopy and microanalysis.

**Microbeam Analysis** aims to create a broad interdisciplinary forum for those interested in microbeam analysis, including: biologists • chemists • environmental scientists • geologists • materials scientists • physicists.

The first two issues of the journal will appear in 1992 to commemorate the 25th Anniversary of the Microbeam Analysis Society. Some of the articles planned for the 1992 issues include:

- The Future of Scanning Electron Microscopy and Fundamental Measurements of Electron-Solid Interactions  
- The Present and Future of Light Element Analysis with Electron Beam Instruments  
- Monte Carlo Electron Trajectory Simulation for Electron Probe Analysis: Present Utility and Future Possibilities  
- Analytical Electron Microscopy — Current State and Future Directions  
- New Directions in Microprobe Mass Spectrometry: Molecular Microanalysis Using Neural Networks  
- The Use of Theoretically Generated Spectra in Energy Dispersive X-ray Spectrometry  
- Emerging Techniques for Microanalysis and Imaging with High Spatial Resolution

**ISSN 1061-3420** Bimonthly

For a full, descriptive brochure, please call 1-800/367-8249 or write to VCH Publishers!

**NEW!**

**INDUCTIVELY COUPLED PLASMAS IN ANALYTICAL ATOMIC SPECTROSCOPY**  
2nd Edition

**Editors:**  
Akbar Montaser, Department of Chemistry, George Washington University, Washington, DC  
D.W. Golightly, Ross Laboratories, Columbus, OH

- Greatly Expanded!  
- Five entirely new chapters  
- 984 pages, 312 figures and 129 tables  
- Contains a thorough bibliography in each chapter  
- Thirty-two internationally-known contributors  
- A tutorial and background material in every chapter  
- Foreword by V.A. Fassal

"Everyone involved in elemental analysis using ICP should have this book. It is useful for both experienced and novice ICP spectroscopists."

— Spectroscopy, Review of the First Edition

September, 1992  
1-56081-514-0 Cloth 984pp  
**Special Introductory Offer to December 15, 1992**  
List Price after December 16, 1992 **$195.00**

**NEW!**

**ANGEWANDTE CHEMIE**  
**30-YEAR REVIEW ARTICLES INDEX**

**Angewandte Chemie** is now available as a 30 year review index. You can have easy-access to many important documents and easily search the cumulative contents of the past 30 years in mere minutes. The index—both a chemical dictionary and a history book—offers you:

1. A list of all authors, indicating the main author and the title of the review  
2. A subject index giving the main author  
3. Both indexes provide complete information on date of issue and first and last page numbers of the German and English editions

**For PC Users:** The index is also available on disk — at the same low price! Disk is available as either 5 1/4" diskette or 3 1/2" diskette.

January, 1992 Printed Version or Diskette **$64.00**

**HANDBOOK OF INDUSTRIAL CHEMICAL ADDITIVES**  
*An International Guide by Product, Tradename, Function, and Supplier*

**Editors:**  
Michael and Irene Ash, Synapse Information Resources, Inc.

"Strongly recommended for collections serving undergraduate and graduate students in chemistry, chemical engineering, materials science, plastics, and biotechnology." — CHOICE

- Alphabetically Arranged  
- Completely Up-to-Date  
- Quick Access  
- Carefully Researched  
- Easy-to-Use  
- Ample Cross-Referencing  
- Accurately Compiled  
- Sturdy Binding  
- Almost 1000 pages

A four-books-in-one reference, The Handbook of Industrial Chemical Additives contains short, easy-to-find information on 18,000 chemical additives. From A-Z, this colossal one-volume reference is divided into four easily accessible sections.

For the record, BookFind-CD offers the most comprehensive title information in the world.

Introducing BookFind-CD World Edition—instant access to more information on more titles than ever before.

The most sophisticated bibliographic database of its kind, BookFind-CD provides access to over 1.3 million English language titles from all over the world.

Among the many benefits of this unique reference tool is the availability of detailed, descriptive records like the one above, that provide an unprecedented amount of information for many of the titles in the database.

What’s more, with over 2000 subject classifications, users can search for and locate titles with great accuracy—using information ranging from author or title to any word or phrase.

And once you find the information you want, you can manipulate it to meet your needs—and receive it in any of 20 different output formats.

In addition to the original version, BookFind-CD is available in special, more specific packages, including Medical/Healthcare and Business/Law. So no matter what your needs, there is a BookFind-CD that’s just right for you. For more information on any of the BookFind-CD packages, call our exclusive distributor in North America, Baker & Taylor at 1-800-775-1800.
You’ll never feel like you’re talking to this when you call Ballen.

When speaking with some booksellers, you might as well be talking to the wall.

What distinguishes Ballen from other booksellers is all our employees have dedicated themselves to customer service. And no matter what size your library is, you’ll always receive the utmost in personal attention.

We also offer many value-added services, like BallenNet, our exclusive online system. It’ll let you identify, claim, or order from our Firm Order, Approval Program, or Continuation/Standing Order Services.

What’s more, our “electronic mailbox” will enable you to send claims and obtain important information instantly. You’ll also have your own shelf reserved in our warehouse to guard against inventory and shipment mix-ups. And should you ever need to reach a Ballen officer, you can do so just by picking up the phone. Plus, as a Ballen customer, you’ll have your very own customer service representative.

With this type of customer service, it’s no wonder we have less than a 1% return rate (lowest in the industry) for our Firm Order and Continuation/Standing Order Services.

For more information, call Ballen at (800) 645-5237.

Because when you talk, Ballen listens.

Forthcoming from Pergamon Press in June 1993...
A Major New Reference Work Published Complete in Five Volumes
Order Now and Save $670.00!

COMPREHENSIVE ROCK ENGINEERING
Principles, Practice & Projects

Editor-In-Chief:
John A. Hudson,
Imperial College of Science, Technology & Medicine,
London, UK

Senior Editors:
E.T. Brown, Faculty of Engineering, University of Queensland,
Brisbane, Australia
C. Fairhurst, Department of Civil & Mineral Engineering,
University of Minnesota,
Minneapolis, MN, USA
E. Hoek, Department of Civil Engineering, University of
Toronto, Canada

- Written & edited by eminent researchers
- Published complete
- Fully indexed
- Comprehensive coverage
- Clear presentation of subject matter
- Easy to use
- Up-to-date

This five-volume set will be arranged thematically: Fundamentals, Analysis and Design,
Rock Testing & Site Characterization, Excavation, Support and Monitoring, Project Case Histories.

WIDE CROSS-DISCIPLINARY APPEAL
This will be the quintessential reference work for anyone involved in rock engineering and its applications in both academic and industrial settings. This definitive work will be an indispensable resource for practicing rock, civil and structural engineers, contractors, researchers, students and academicians involved in any of the following areas:
- Mining & Minerals
- Metallurgy
- Petroleum
- Geomechanics
- Seismology
- Geothermal Energy
- Explosives
- Underground Waste Disposal

FREE PROSPECTUS AVAILABLE
A free prospectus will be available, containing sample pages and a complete listing of articles and authors. To obtain one, please write to:

Standing Orders
THE ULTIMATE TEST OF YOUR BOOKSELLER

Fulfilling standing orders has always been a complex challenge for booksellers. For almost two decades, Blackwell North America has met this challenge and successfully provided libraries with comprehensive standing order services:

- Extensive Coverage allows consolidation of orders with a single source
- Our unique interface with B.H. Blackwell offers coverage of U.K. and European titles
- Timely supply of books with consolidated invoices ensures prompt availability to library users
- Management reports provide detailed financial, bibliographic and publication status information
- Our standing order database, the largest in the industry, serves as a bibliographic reference tool for collection management and title selection

If your current vendor is not meeting the standards you have set for standing order service, consider Blackwell’s. Our reputation is built on timeliness, flexibility and service.

MATSS
The Perfect Software System for Automated Acquisitions

As a well established source for the supply of books and cataloging services, Midwest Library Service has developed MATSS — a PC based, fully integrated software acquisitions system for libraries.

The system includes program diskettes, reference manual, on-site training and installation.

Features:

- Multiple terminal version for local area networks.
- Order creation using MARC records downloaded from major bibliographic utilities and CD-ROM databases.
- Duplicate order checking.
- On-line help.
- Customized management reports.
- Automatic claiming/cancellation.
- Orders in printed or BISAC (fixed/variable) formats for electronic transmission to vendors.
- Toll-free order transmission to Midwest Library Service.
- Integrated vendor statistics and fund accounting.
- Electronic invoicing on diskette for Midwest Library Service invoices.
