#### **ABSTRACT**

ABSTRACT Engineering Information (EI) Village has been designed to provide a full-service Internet community for technical professionals and managers. It provides its users a virtual community to quickly and efficiently locate quality information. Ei Village includes valuable content including access to the Ei Compendex Web database, newswires, and current awareness services, as well as access to over 12,000 World Wide Web sites with a major focus on engineering and technology. Ei Village offers a variety of exclusive services not found elsewhere on the Intemet, such as Ei Spotlights, Ei Tech Alerts, Ei Connexion and Ei Document Delivery Service. The Village has created a community for engineers and technical managers to exchange information with experts and peers through newsgroups, listservs, chats and lectures. In a unique program of personal assistance, engineers and librarians stand ready to answer questions regarding facts as well as information resources, thus providing an integrated approach to serve the information needs of engineers and technical professionals.
