2 Against the Grain / September 1994
Many libraries are preparing for the next big step in automation—downsizing from mainframes in favor of systems that not only provide integrated modules but integrate fully with larger computing environments. These libraries are selecting open systems with client-server architecture. They are selecting Marquis.

Marquis is way out in front in terms of client-server expertise. We offered the first true client-server applications for libraries and have already gained the experience of installing dozens of systems. Every module—even Serials—is done and done well. Clear screens, nimble movement between modules, and full features. That's Marquis.

If you're interested in client-server network computing—whether you serve users enterprise-wide, across the country, or around the world—Marquis is ready to work for you.
Available February 1995!

ENERGY TECHNOLOGY AND THE ENVIRONMENT
4-Volume Set
Edited by Attilio Bisio and Sharon R. Boots

First in the new Wiley Encyclopedia Series in Environmental Science, this new 4-volume encyclopedia treats all energy-related topics, presenting comprehensive coverage of state-of-the-art technology and environmental impact and influence.

While Energy Technology and the Environment is an excellent source for engineers and scientists in environmental, petroleum, nuclear and chemical science and engineering—it is also easily accessible to non-technical readers, including undergraduate/graduate students, business and law professionals, and anyone else with an interest in environmental science.

Features:

- 4,000 large format, double-column pages containing approximately 175 articles
- Extensive cross-referencing, bibliographies and reading lists, and a complete index included in Volume 4
- Illustrated extensively with photographs, illustrations, tables (including a table of energy conversion factors) and a list of environmental and conservation organizations

The over 175 entries cover topics such as:

- Acid rain • air pollution • aircraft fuels • building systems • coal combustion • energy consumption • geothermal energy • managing nuclear devices • oil spills • risk assessment • solar heating • water power • and more.

**FOLIO UPDATE**

YBP On-line Service

*Release 2.2,* gives Serials customers access to full bibliographic information. Many approval and firm order customers use FOLIO, YBP’s on-line service, via the Internet or direct access to view bibliographic information, order titles, and get expenditure information. This release adds even more enhancements and now provides access to YBP’s extensive Serials Database. If you’re not using FOLIO yet, make the connection to superior service.

**This just in—Serials!**

Simply key in an ISSN or a keyword for title, author, imprint, or former title to search our extensive serials database. FOLIO displays the matched serial title information. You can also view individual volume detail, former titles, and former imprints, as well as book level bibliographic detail.

**What you see is what you’ll get.**

Access your open orders and view up-to-the-minute status information. Quantity will be displayed for number ordered, allocated, shipped, and backordered.

**Access your shipment history!**

New customer specific shipment history. Check shipment information for a title across all accounts including slips sent, orders received, shipments made, and returns received. Also view customer specific shipment history for the specific title with shipment date, invoice number and purchase order number.

**YBP Reporting.**

Approval and Serials customers: List the imprints handled for you by YBP in the format you want. FOLIO tells you what you’ve spent by date, LC classification, and publisher—based on parameters you enter.

THE PRESIDENTS SPEAK
The Inaugural Addresses of the American Presidents, from Washington to Clinton
By DAVID NEWTON LOTTI. A new edition of this richly detailed source of facts on U.S. history and culture. 444 pp. $42.95 illus./Index/Appendices 0-8050-3365-5/05/35.00 Nov '94

WHO'S WHO IN RUSSIA
AND THE CIS REPUBLICS
By VLADIMIR MOROZOV, Ph.D. and the staff of VIP. An indispensable A-to-Z guide to over 1,000 key people in all the professions: the arts, politics, business, and more. 344 pp. $30.95 2/69-1/56/50.00 Feb '95

THE JEWISH YEARBOOK
2,000 Years of History
By ELENA ROMERO CASTELLO and URIEL MACIAS KAPON. A thorough and richly illustrated history of a two-thousand-year legacy. 240 pp./Full-color illustrations throughout/Indexed 0-8050-3526-5/05/50.00 Nov '94

THE ATLAS OF SACRED PLACES
Meeting Points of Heaven and Earth
By JAMES HARPUR. Visiting over thirty sites around the world, this is a fascinating, full-color guide to the places where people have found heaven on earth. 240 pp./Full-color maps and art/Indexed 0-8050-2773-5/05/45.00 Nov '94

THE HISTORICAL ATLAS
A Visual Celebration of Nearly 400 Years of New York City's History
By ERIC HOMBERGER with Alice Hudson, cartographic consultant. A visual celebration of New York City's history with full-color maps, charts, photographs, and fascinating text that bring the "old town" to life. 192 pp./Full-color illustrations throughout/Index/Bibliography 0-8050-2649-9/05/45.00 Nov '94

FOOD AND MOOD
The Complete Guide to Eating Well and Feeling Your Best
By ELIZABETH SOMER, M.A. R.D. A highly-regarded nutritionist looks at how the nutrients in food affect energy levels, memory, sleep patterns, weight management and other health matters. 500 pp./Over 100 charts, worksheets/Indexed 0-8050-3125-1/05/25.00 Jan '95

THE ECONOMIST DESK companion, Updated and Revised Edition
How to Measure, Convert, Calculate, and Define Practically Anything
By THE ECONOMIST. An excellent reference book: timely, unique, and necessary for public, academic, and professional collections. 500 pp./2-color illustrations throughout/Indexed 0-8050-3537-0/05/25.00 paper Feb '95

THE COMPLETE WOMAN'S HERBAL
A Manual of Healing Herbs and Nutrition for Personal Well-Being and Family Care
By ANNE MCGINTY. This indisputable guide for all health-conscious women provides accessible information based on the most current scientific herbal studies. 268 pp./Full-color illustrations throughout 0-8050-3537-0/05/25.00 paper Feb '95

THE WASHINGTON ALMANAC, Revised Edition
By LAWRENCE J. HAAS. "There is no other one-stop source that gives the type of information contained in this book." —Choice. 736 pp./Indexed 0-8050-3162-1/05/25.00 paper Sept '95

THE ALMANAC OF RENEWABLE ENERGY
The Complete Guide to Emerging Energy Technologies
By RICHARD GOLOB and ERIC BRUS. "Recommended for public and academic libraries." —Library Journal. An "Outstanding Academic Book for 1994." —Choice. 388 pp./40 color illus./Index/Appendices 0-8050-3412-0/05/19.95 paper Sept '95

NUTRITION FOR WOMEN
The Complete Guide
By ELIZABETH SOMER, M.A. R.D. "Highly recommended; offers comprehensive information." —Library Journal. 480 pp./Over 100 charts, worksheets/Indexed 0-8050-3537-0/05/25.00 paper Jan '95

THE ENCYCLOPEDIA OF CHILDBEARING
A Guide to Prenatal Practices, Birth Alternatives, Infant Care, and Parenting Decisions for the '90s
VCH Reference Sets

Encyclopedia of Applied Physics

George L. Trigg, Formerly Editor of Physical Review Letters, Editor
Eduardo S. Vera, NTT Interdisciplinary Research Laboratories, Nippon Telegraph and Telephone Co., Musashino-shi, Tokyo, Japan, and Walter Greulich, Birkenau, FRG, Associate Editors

Two Convenient Ordering Plans:
• Standing Order Plan: $235.00 per Volume
• Order by Individual Volume at List Price: $295.00 per Volume
(Index Volumes: $25.00 each)

Written by dozens of internationally prominent scientists and engineers Encyclopedia of Applied Physics is the first work of its kind to approach physics from the standpoint of technical and industrial applications and offers detailed coverage of the entire field of applied physics in an easily accessible form.

With a unique and highly useful classification system, this reference’s short publication period guarantees that all articles remain current. Each volume contains 22 to 25 articles spanning about 600 pages. A cumulative subject index is published after every three volumes, and a full index accompanies the entire 20-volume set.

Physicists, Engineers in electronics, computers, aerospace, medicine, and polymers; and Scientists working in physical chemistry, radiology, biology, and geophysics will find the numerous cross-references and uniform terms, abbreviations, symbols and units of Encyclopedia of Applied Physics a great help in their research efforts.

New and Forthcoming Volumes

Volume 8: Inductors to Magnetic Devices

Volume 9: Materials to Mechanical Vibration and Damping

Volume 10: Mechanics, Classical to Monte Carlo Methods (Title Tentative)

Volume 11: Mössbauer Effect to Nuclear Structure (Title Tentative)

Volume 12: Nuclear Waste Management to Osmosis (Title Tentative)

Volume 13: Packaging Technology, Electronic to Photovoltaic Devices (Title Tentative)

Volume 14: Physical Geology to Polymer Dynamics (Title Tentative)

From the Reviews...

"This encyclopedia should be available at every scientific institute..."
—Interchem

"...exciting...well-written and illustrated...modern subject coverage...useful to generalists as well as experts...recommended..."
—CHOICE

SENSORS

A Comprehensive Survey

W. Göpel, University of Tübingen, FRG. J. Hesse, Carl Zeiss, Oberkochen, FRG, and J.N. Zemel, University of Pennsylvania, Philadelphia, PA

Three Convenient Ordering Plans:
• Prepaid Subscription for the Complete 8 Volume Set: $1,895.00
• Standing Order Plan: $236.00 per Volume
• Order by Individual Volume at List Price: $285.00 per Volume

Sensors is the first authoritative and time-saving reference series to offer a comprehensive overview of all aspects of research, design, development and application.

Each volume is a self-contained, topic-specific handbook that both specialists and generalists in the field will find extremely useful. This up-to-date resource provides detailed coverage on such "hot" topics as: Optical Sensors; Thermal Sensors; Chemical Sensors and Biochemical Sensors.

Thoroughly index and cross-referenced with an extensive bibliography included after every article, SENSORS helps Physicists, Applied Chemists, Chemists, Engineers, Biochemists, Sensor Technologists, and Measurement Scientists find the information they need quickly.

New and Forthcoming Volumes

Volume 7: Mechanical Sensors
H.H. Bau, V.F. de Rooij, and B. Kloeck, Editors

TABLE OF CONTENTS (MAIN HEADINGS): List of Contributors • Introduction • Physical and Technical Principles • Thermoelectric Microsensors and Microsystems • Strain Gauge Sensors • Capacitive Sensors • Piezoresistive Sensors • Hall Sensors • Resonant Sensors • Ultrasonic Nonsensor Sensors • Mechanical Measurements • Sensors for Measuring Acceleration • Sensors for Measuring Density and Velocity • Sensors for Measuring Flow • Sensors for Measuring Force • Sensors for Measuring Torque • Sensors for Measuring Pressure • Sensors for Measuring Stress • Sensors for Measuring Sound • Index • List of Symbols and Abbreviations

Volume 8: Trends in Sensor Technology/Sensor Market, Cumulative Index

To order, please contact your book distributor, or:

VCH Publishers, Inc., Customer Service Center
303 Northwest 12th Avenue, Deerfield Beach, FL 33442-1788
New York • Weinheim • Cambridge • Basel • Tokyo

This series of professional references for educators is a ready source of theoretical and practical information for college and university faculty, higher education administrators, student services, professionals, and public school teachers and administrators. Volumes in the series will include handbooks on college teaching, university career centers, cooperative learning methods, and campus activity management.

Planning and Managing Death Issues in the Schools
By Robert L. Deaton and William A. Berkan
A comprehensive approach to prevention, intervention, and postvention concerning death, violence, and self-destructive behavior among school-aged children in educational settings.
Greenwood Press. 0-313-29525-5. $51.00 Est.

Handbook of Academic Advising
By Virginia N. Gordon
"A clear, concise, and comprehensive view of the state of affairs within the field of advisement in higher education."
—The Journal of the National Academic Advising Association
Greenwood Press. 1992. 224 pages. 0-313-28458-X. $55.00

Handbook for the College and University Career Center
By Edwin L. Herr, Jack R. Rayman, and Jeffrey W. Garis
Traces the evolution of the delivery of college career services and provides strategies that are necessary for the planning, organization, staffing, funding, and management of a college career center.
Greenwood Press. 1993. 360 pages. 0-313-28148-3. $65.00

School Law for the 1990s
A Handbook
By Robert C. O'Reilly and Edward T. Green
Takes all aspects of school law and combines them to provide an understanding of the realities in which education professionals must perform as employees in K-12 schools.
Greenwood Press. 1992. 312 pages. 0-313-27817-2. $49.95

Handbook of College Teaching
Theory and Applications
Edited by Keith W. Prichard and R. McLaran Sawyer
Offers practical information on how to teach a variety of college courses and discusses different instructional methodologies.
Greenwood Press. 1994. 488 pages. 0-313-28142-4. $75.00

Handbook of Cooperative Learning Methods
Edited by Shlomo Sharan
Overviews cooperative learning and includes sections on generic methods of instruction, the application of cooperative learning to particular disciplines, and the implementation of programs in schools.
Greenwood Press. 1994. 392 pages. 0-313-28352-4. $75.00

The Training and Development of School Principals
A Handbook
By Ward Sybouts and Frederick C. Wendel
Presents practical information on the successful management of schools.
Greenwood Press. 1994. 0-313-28556-X. $66.00 Est.

Planning in School Administration
A Handbook
By Ward Sybouts
Emphasizes that the human dimension of educational planning is paramount, and that leadership and vision are essential to the effective management of change.
Greenwood Press. 1992. 344 pages. 0-313-27272-7. $59.95
"Every chemical library should have a copy."

Dictionary of Organometallic Compounds
Second Edition
Edited by J. E. Macintyre

The Dictionary of Organometallic Compounds allows chemists to locate relevant data on all the most important organometallic compounds. It describes the structural, chemical, physical and biological properties of those 40,000 compounds considered by experts to be of outstanding interest or importance.

This new edition builds substantially on the first edition by:

- Documenting the huge literature which has become available in the ten years since its publication. Each entry has been individually reviewed and updated to provide the most effective means of obtaining accurate and up-to-date information in organometallic chemistry.
- Providing synthetic details for most compounds, an invaluable asset to anyone working in this field.
- Including an Index of Synthetic Reagents. This completely new feature allows readers to see at a glance the range of compounds which can be used to effect transformations in the laboratory.

There are three volumes of entries and two volumes of indexes: Synthetic Reagents, Molecular Formula and CAS Registry Number. There is also a Structure Index containing reduced images of all the structure diagrams. This unique feature allows you to browse and to appreciate quickly the full range of compounds which have been synthesized.

Contents: Data provided in each entry includes (where relevant) the following: molecular formula; structure diagram; preferred name and important synonyms; CAS registry number; synthesis; physical description; stability; solvent of recrystallisation; solubility; melting point; boiling point; freezing point; use or importance (including an indication of important reactions); hazardous and toxic properties; selected literature references.

Sometimes
the right partner
can make
all the difference.

Most subscription agencies offer the basics – consolidation of orders, prepayment, claiming. And some agencies promise automation, like online ordering and searchable title files. But only one agency delivers all that, plus something special...

Introducing the Readmore Partnership...the unique team approach that makes all the difference between standard service and peak performance.

With Readmore Academic, you've got a partner in serials management. Your Readmore Account Executive personally assists with all your day-to-day serials activities. The Academic Specialist is your liaison to Readmore’s top management and publishers worldwide. And Readmore’s technical team, working behind the scenes, uses state-of-the-art technology to bring you innovative services.

So don’t go it alone. You know your collection, your library, your patrons and policies. We’ve got the experience with serials, automation, the global publishing industry plus all the resources of the international B.H. Blackwell group.

Together, we can build a customized package of services, systems and reports to meet your specific needs...keep you informed...and solve problems before they become problems.

Call 1 800-645-6595 today for more information about Readmore Academic subscription services. And see how the right partner can make all the difference for your library.

John Wiley & Sons, Inc. announces a completely updated and expanded edition of the bestselling . . .

BURGER'S MEDICINAL CHEMISTRY and DRUG DISCOVERY
Fifth Edition
Volume 1: Principles and Practice
Edited by Manfred E. Wolff, Immunopharmaceuticals Inc.

In the fifteen years since the last edition of this classic work was published, there has been tremendous growth in the field of drug discovery research and development. This fully updated and expanded edition (over 50% new material) reflects the latest developments in the field including state-of-the-art methods and techniques.

Completely self-contained, Volume 1: Principles and Practice presents all practitioners of drug discovery, graduate students in medicinal/pharmaceutical chemistry and biochemistry, as well as professionals interested in other types of biological actions of chemicals such as the toxicity of pesticides, or the effects of food additives, with a comprehensive, yet easily accessible overview of the field. It covers background material in medicinal chemistry as well as product development issues.

- 50% revised and expanded edition of the definitive work in the field
- Volume 1 is completely self-contained
- New edition includes material on bringing drugs to market -- covering topics such as testing, clinical trials, patent issues, and getting FDA approval
- Covers the latest methods in drug discovery including computational chemistry and peptidomimetics
- Includes literature citations through 1993

All together, this Fifth Edition will comprise five self-contained volumes (vs three in the last edition). Volume 1, as indicated, covers principles and practice. The remaining volumes (due 1996) will present comprehensive surveys of pharmaceutical agents by target organ or system - Vol. 2: Gastrointestinal and Cardiovascular Drugs; Vol. 3: Chemotherapeutic Agents; Vol. 4: Central Nervous System; Vol. 5: Endocrine and Immune System. Within each volume, each chapter provides a complete overview of a particular class of drugs.

Get the articles you need quickly and easily.

Introducing Faxon Finder current awareness and document delivery service.

As easily as you could pull a journal from your shelf, you can order an article for delivery with Faxon Finder™. Start by choosing from over 10,000 journal titles and 3 million articles available in the Faxon Finder database. Then simply press the order key from the menu. It's that easy to get speedy delivery of your articles.

For your convenience, the Faxon Finder database is offered both online and on CD-ROM. Either way, you have access to the most comprehensive table-of-contents database available. Unlike other databases, which cite only research articles from journals, the Finder database includes all citable references such as news stories, editorials, book reviews and more. No other database is so complete in its coverage of individual issues.

Call 1-800-999-3594 ext. 503 to learn more about how this new electronic information service can benefit you.

Special Pre-Publication Offer: Save $400!

THE ENCYCLOPEDIA OF ADVANCED MATERIALS defines and broadly covers the field of Advanced Materials, taking into account the many different views encountered in research, as well as emphasizing the multidisciplinary nature of the subject. Articles will cover the composition, structure, applications and processing/synthesis of advanced materials, as well as the characterization, and properties.

COVERAGE INCLUDES THE FOLLOWING AREAS:
- Advanced Ceramic Processing
- Advanced Optical Materials and Displays
- Composite Materials
- Computer Modelling in Materials Science
- Nanocrystalline Materials, Nanoelectronics
- Semiconductor Processing
- Ultramicroscopic Manipulation
- Phase Equilibria and Transformations
- Polymerization
- Methods and Advanced Polymers

This reference set is designed to be used by the following:
- Faculty and graduate students in educational institutions
- Faculty and graduate students engaged in research work in disciplines outside materials science who draw upon its theory, practice or results in their work on aspects of the structure, characterization, use or properties of advanced materials
- Researchers and staff in research institutes and industries working within the field of advanced materials or other areas closely related to advanced or non-traditional materials

TECHNOLOGY DEDICATED TO THE LIBRARIES OF TOMORROW

September 1994 / Against the Grain  83
Rittenhouse Book Distributors has been an information resource for libraries for more than 40 years. We are dedicated to helping you achieve your goals.

Our full array of library services include Comprehensive Approval Plan, Standing Orders and Monographic Series management as well as the access to more than 500 health science and health related publishers.

The Rittenhouse Resource Manual, a complete guide to collection development for the health science librarian is the industry's most comprehensive collection and development tool, and is available exclusively through Rittenhouse. It contains valuable publisher and title information, as well as statistical summaries that make achieving your collection and development goals more manageable.

Find out what Rittenhouse can do for your library. Call our Library Service Department or your Rittenhouse Sales Representative today. Distributing Information for the 21st Century

MIDWEST LIBRARY SERVICE

from Gutenberg to McLuhan,
Galileo to galaxies—
We cover a universe of books.

PROMPTLY
From major new titles to the obscure "black hole,"
we waste no time.

ACCURATELY
From invoices to status reports, we get it right.

COMPLETELY
From first shipment to completion,
we offer maximum fulfillment.

COMPETITIVELY
From trade discounts to short, we give you your money's worth.

These four pillars form the foundation of Midwest's many years of service to libraries. Depend on us as your source for U.S. and Canadian books. Save valuable time, effort, and expense by relying on our:

- Expertise in automation services
- Exacting customer service
- Commitment to excellence
- Goal of maximum fulfillment

Call on us for:
- Firm Orders
- Standing Orders
- Approval Programs
- Technical Support Services
