Dave Boruff
Development of the 2009 MUTCD

- NPA published in the Federal Register on January 2, 2008
- Deadline for comments to docket was July 31, 2008
- Received 1,840 individual letters with over 15,000 comments
- Final Rule Published in the Federal Register on December 16, 2009.
How does the 2009 MUTCD Final Rule relate to the December 21, 2007 Final Rule on Maintaining Sign Retroreflectivity?

- Sign Retroreflectivity Rule modified the 2003 MUTCD as Revision 2 of that edition, and became effective on January 22, 2008.
- NPA did not show the Rev. 2 changes, but ...
- The final rule for the 2009 MUTCD incorporates the sign retroreflectivity material that is already in effect.
Formatting and Global Revisions
Paragraphs are numbered!

Guidance statements are *italicized*
Metric values have been removed from the text, figures, and tables

- Only English units are used in the text, tables, and figures of the 2009 MUTCD

New Appendix A2 includes the equivalent metric values for all English units used in the 2009 MUTCD
Revisions to the Introduction
MUTCD applies to private roads that are “open to public travel”

Toll roads and roads within shopping centers, airports, sports arenas, theme parks, and similar business or recreation facilities that are privately owned, but the public is allowed to travel without access restrictions
Parking areas and their driving aisles are **not** subject to MUTCD requirements.
Compliance Dates

- New installations, replacements, rebuilds – must comply immediately
- New Table I-2 with specific compliance dates to retrofit or replace existing devices to meet 11 of the new Standards in the 2009 MUTCD

### Table I-2. Target Compliance Dates Established by FHWA (Sheet 2 of 3)

Revisions to Part 1 – General
Section 1A.13 – Definitions

• All definitions now appear in Part 1 (Section 1A.13) and not in other Parts

• Approximately 70 new definitions have been added

• Approximately 35 existing definitions have been revised
Section 1A.13 – Meanings of text headings (Standard, Guidance, Option, Support) relocated and clarified

- Relocated from MUTCD Introduction to Section 1A.13
- Standard statements shall not be modified or compromised based on engineering judgment or engineering study

Section 1A.13 Definitions of Headings, Words, and Phrases in this Manual

Standard:

01 When used in this Manual, the text headings of Standard, Guidance, Option, and Support shall be defined as follows:

A. Standard—a statement of required, mandatory, or specifically prohibitive practice regarding a traffic control device. All Standard statements are labeled, and the text appears in bold type. The verb “shall” is typically used. The verbs “should” and “may” are not used in Standard statements. Standard statements are sometimes modified by Options. Standard statements shall not be modified or compromised based on engineering judgment or engineering study.

B. Guidance—a statement of recommended, but not mandatory, practice in typical situations, with deviations allowed if engineering judgment or engineering study indicates the deviation to be appropriate. All Guidance statements are labeled, and the text appears in unbold type. The verb
The meanings of approximately 40 acronyms and abbreviations used in the MUTCD are now listed in a new Section 1A.14

<table>

</table>
Section 1A.15 – Abbreviations on traffic control devices

- Additions, deletions
- Use on portable changeable message signs vs. use on fixed message signs and large permanent CMS
- Punctuation or characters other than letters or numerals should not be used on any signs
General Revisions to Part 2 – Signs
New chapters and revisions for Part 2

- Relocation of gates and barricades to Chapter 2B
- Relocation of object markers from Part 3 to Chapter 2C
- New Chapter 2F – Toll Road Signs
- New Chapter 2G – Preferential and Managed Lanes
- New Chapter 2H – General Information Signs
- New Chapter 2I – General Service Signs
- New Chapter 2L – Changeable Message Signs
Many new symbols
E-mail and Internet addresses and telephone numbers

- Internet addresses, e-mail addresses, domain names, URLs: prohibited on any sign, plaque, sign panel

- Phone numbers with more than 4 characters should not be shown on any sign, plaque, sign panel (including Specific Service logo panels), or CMS
Sign Colors

• Optional use of fluorescent colors including fluorescent red
• Added purple for panels and plaques for electronic toll collection registration requirements
• Removed yellow for school area signs
• Require fluorescent yellow-green color for school area signs
• Optional use of fluorescent yellow-green color for pedestrian and bicycle application signs
New option for the use of fluorescent colors

Fluorescent yellow  Standard yellow
LEDs on signs

• Optional for individual use within the border, or within the legend or symbol
• Shall not be placed within the background of a sign
• Shall not be grouped as a “de-facto” beacon
• For STOP or YIELD signs, LEDs may be placed within one border width from the border
New and revised sign size tables

- Updated/expanded table for regulatory sign sizes
- New detailed sign size tables:
  - Warning signs
  - Conventional road guide signs
  - Freeway/expressway guide signs
  - General service signs
  - General information signs
Minimum sign size may be decreased by 6 inches in alleys that have restrictive physical conditions.
Symbols from one type of sign shall not be used on a different type of sign

The playground symbol that is used on warning signs cannot be used on guide signs

Not acceptable!
Size of sign lettering should be based on 1 inch of letter height per 30 feet of legibility

- Based on 20/40 vision
- 1988 and earlier MUTCDs were 1 inch per 50 feet of legibility based on 20/20 vision
- 2003 MUTCD recommended 1 inch per 40 feet based on 20/33 vision
Lettering for place names and destinations

• Mixed-case lettering required for names of places, streets, and highways for guide signs

• Mixed-case lettering consists of an initial upper-case letter followed by lower-case letters

• Letter height is specified as the height of the initial upper-case letter
New options for sign conspicuity enhancement
Heights and Lateral Locations of Signs

Figure 2A-2. Examples of Heights and Lateral Locations of Sign Installations

A - ROADSIDE SIGN IN RURAL AREA

B - ROADSIDE SIGN IN RURAL AREA

C - ROADSIDE SIGN IN BUSINESS, COMMERCIAL, OR RESIDENTIAL AREA

D - WARNING SIGN WITH ADVISORY SPEED PLAQUE IN RURAL AREA

*Where parking or pedestrian movements are likely to occur
Relative locations of regulatory, warning, and guide signs for intersections

2009 MUTCD (Final Rule)
Revisions to Chapter 2B – Regulatory Signs, Barricades, and Gates
Larger sizes for certain signs on multi-lane roads with speed limits of 40 mph or more
Larger sizes for STOP signs

- 36 inches for any STOP sign facing a multi-lane approach
- 36 inches for any multi-lane side road approach to a multi-lane road
- 36 inches for any side road approach to a multi-lane road with a speed limit of 45 mph or higher
New Guidance on the factors to be considered when establishing intersection right-of-way control

Based upon:
- Vehicular, bicycle and pedestrian volumes
- Number and angle of approaches
- Approach speeds
- Sight distance
- Reported crash performance
The use of 2-WAY, 3-WAY, and 4-WAY plaques is prohibited.

ALL-WAY plaque remains as a “shall” if STOP signs are used on all approaches.
New plaque that may be used with STOP sign in special conditions
Placing two STOP signs or two YIELD signs on the same post for emphasis is prohibited.
Signs mounted back-to-back with STOP or YIELD signs should stay within the edges
– Do Not Obscure Shape

2009 MUTCD (Final Rule)
Stickers are allowable on signs and posts
Variant of signs for State laws requiring Stop vs. Yield to Pedestrians”
In-street pedestrian crossing signs

- Placement locations
- Background may be fluorescent yellow or fluorescent yellow-green

Supports for in-street pedestrian crossing signs must be designed to bend over and bounce back when struck.
Speed limits

Studies for speed zones clarified
Speed limit reductions of more than 10 mph

Reduced Speed Limit Ahead (W3-5) sign recommended
Movement prohibition signs at signalized intersections should be placed adjacent to the appropriate signal face(s)
New optional fish-hook arrows for use on lane-use control signs at roundabouts
New optional signs for enforcement of start of turn lanes

New regulatory signs
New plaques that may be mounted with regulatory signs
Symbolic Do Not Pass sign
NOT ADOPTED

Word message sign was retained
Revisions incorporated into the 2009 MUTCD

“Excluded” and “prohibited” changed to “NO”
New One-Way sign requirements for Divided highways

Median Width of 30 feet or more:

One-Way signs on near right and far left corners are **required** rather than **recommended**

Far right One-Way signs are **optional**
Near side and far side One-Way signs required on the minor-street approaches at 4-way and T-intersections
Divided Highway signs shall be installed on approaches to divided highways with: medians ≥ 30 feet and AADT ≥ 400 and speed limit ≥ 30 mph
New regulatory signs for use at roundabouts

Roundabout Directional Arrow signs (on central island)

Roundabout Circulation sign (with YIELD sign at mini-roundabouts)
Barricades and Gates

• Barricades Standards and Guidance relocated from Part 3
• Colors of barricades for non-TTC use shall be retroreflective white and red
• New section on Gates for all traffic uses
• Red/white stripes on gates shall be vertical rather than diagonal
Revisions to Chapter 2C – Warning Signs and Object Markers
Some word message signs are deleted

Also – STOP AHEAD, YIELD AHEAD, SIGNAL AHEAD
36” x 36” minimum size for multi-lane conventional roads
Guidelines for advance placement of warning signs – Table 2C-4

• Change to 20/40 visual acuity
• Assumption of legibility distance of 180 feet for Condition A (speed reduction and lane change)
• Assumption of minimum legend size of 6” lettering; if less, add 100 feet
• Assumption of legibility distance of 250 feet for Condition B (stop and deceleration)
Application of horizontal alignment signs based upon curve differential speed

Table 2C-5. Horizontal Alignment Sign Selection

<table>
<thead>
<tr>
<th>Type of Horizontal Alignment Sign</th>
<th>Difference Between Speed Limit and Advisory Speed</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>5 mph</td>
</tr>
<tr>
<td>Turn (W1-1), Curve (W1-2), Reverse Turn (W1-3), Reverse Curve (W1-4), Winding Road (W1-5), and Combination Horizontal Alignment/Intersection (W10-1) (see Section 2C.07 to determine which sign to use)</td>
<td>Recommended</td>
</tr>
<tr>
<td>Advisory Speed Plaque (W13-1P)</td>
<td>Recommended</td>

<tr>
<td>Chevrons (W1-8) and/or One Direction Large Arrow (W1-6)</td>
<td>Optional</td>
</tr>
<tr>
<td>Exit Speed (W13-2) and Ramp Speed (W13-3) on exit ramp</td>
<td>Optional</td>
</tr>
</tbody>
</table>
New criteria for the determination of advisory speeds

Support: Among the established engineering practices that are appropriate for the determination of the recommended advisory speed for a horizontal curve are the following:

A. An accelerometer that provides a direct determination of side friction factors
B. A design speed equation
C. A traditional ball-bank indicator using the following criteria:
   16 degrees of ball-bank for speeds of 20 mph or less
   14 degrees of ball-bank for speeds of 25 to 30 mph
   12 degrees of ball-bank for speeds of 35 mph and higher
New variations of combination horizontal alignment-intersection warning signs
New table for spacing of Chevron signs

<table>
<thead>
<tr>
<th>Advisory Speed (mph)</th>
<th>Curve Radius (feet)</th>
<th>Sign Spacing (feet)</th>
</tr>
</thead>
<tbody>
<tr>
<td>15 or less</td>
<td>Less than 200</td>
<td>40</td>

<tr>
<td>50 to 60</td>
<td>701 to 1,250</td>
<td>160</td>
</tr>
<tr>
<td>More than 60</td>
<td>More than 1,250</td>
<td>200</td>
</tr>
</tbody>
</table>

Chevron signs may be mounted at 4-foot height
New shoulder signs and plaques

- Shoulder Ends
- Low Shoulder
- Soft Shoulder
- No Shoulder
- Shoulder Drop-Off
New signs and plaque to warn of conditions that primarily affect motorcyclists

- Grooved Pavement
- Metal Bridge Deck
No Center Line sign
New warning signs for road flooding
New Roundabout plaque for circular intersection warning
New sign and plaque for combined pedestrian/bicycle crossing
New symbol signs to warn of possible presence of large animals
New sign to warn of a traffic pattern revision
Order of names and use of arrows when two street names appear on an advance street name plaque
Plaques for use when STOP signs control all but one approach to the intersection
Share the Road plaque cannot be used alone; can ONLY be used to supplement another sign.
“New” plaque for mounting above a regulatory or advance warning sign to warn road users about a new regulation or condition
Object markers have been relocated from Part 3
Object Markers for Approach Ends of Guardrails

• Where Type 3 object markers are applied to the approach ends of guardrail and other roadside appurtenances, sheeting without a substrate shall be directly affixed to the approach end of the guardrail in a rectangular shape conforming to the size of the approach end of the guardrail, with alternating black and retroreflective yellow stripes sloping downward at a angle of 45 degrees toward the side of the obstruction on which traffic is to pass.
Revisions to Chapter 2D – Guide Signs for Conventional Roads
Option to use all upper-case letters for place names and street names is deleted
Guide signs should have no more than 3 lines of destination info

- Lamar 15
- Eads 51
- Limon 133

- Levitt Pkwy
- Willingboro
- Rancocas

NEXT RIGHT
Provisions for use of pictographs on guide signs

Exceeds maximum size, not official seal
New guide signs for circular intersections

- Amity
- Twin Falls
- Century Dr
- 14th St
- NEXT ROUNDABOUT
- NORTH 301
- WEST 220 Forsberg
- EAST 220 Burke
- Front Ave
Route and auxiliary signs combined on a green background
Lane designation auxiliary signs

For dedicated or mandatory movement lanes only
Combination lane-use and destination overhead guide signs

Glenwood Ave

OR

56

OR

ONLY

ONLY
Route shield may be used on a Street Name sign
Only alternatives to the green background color for Street Name signs are blue, brown, or white*

* A black legend shall be used if a white background is used, otherwise the legend color shall be white
**New table for letter heights on Street Name signs**

Table 2D-2. Recommended Minimum Letter Heights on Street Name Signs

<table>
<thead>
<tr>
<th>Type of Mounting</th>
<th>Type of Street or Highway</th>
<th>Speed Limit</th>
<th>Recommended Minimum Letter Height</th>

</tr>
</tbody>
</table>

* On local two-lane streets with speed limits of 25 mph or less, 4-inch initial upper-case letters with 3-inch lower-case letters may be used.
New provisions for the design and use of community wayfinding guide signs

Enhancement markers

Color coding
Revisions to Chapter 2E – Guide Signs for Freeways and Expressways
Revisions to Chapter 2H – General Information Signs
(relocated from Chapters 2D and 2E)
New chapter with sections relocated from Chapters 2D and 2E

- Traffic signal speed sign
- Reference location signs
- Other I-series general information signs
- Memorial signing
- Auto tour route signs
- Acknowledgement signs
Size of Traffic Signal Speed sign increased from 12” x 18” to 24” x 36”

Changeable message element permitted for varying the progression speed
Shields and trailblazer assemblies for designated auto tour routes (formerly trail signs)

- Auto Tour Route signs designed in accordance with provisions for route signs
- Independent assemblies allowed on freeways between discontinuous segments
New Vehicle Ferry Terminal sign
New provisions for the design and use of acknowledgement signs

Logo area exceeds $\frac{1}{3}$ sign area

Sign in vicinity of decision point
Revisions to Chapter 2I – General Service Signs
(relocated from Chapters 2D and 2E)
General Service and Roadside Area signs are now in a separate chapter.
“Dial” changed to “Call”
New Chapter 2L – Changeable Message Signs
Provisions for changeable message signs

- Legend height
- Color
- Phases per cycle
- Display time
Provisions for changeable message signs

- Other types of electronic-display CMS (limited-legend, blank-out) specifically identified for clarification of applicability
- Non-electronic displays (hinged-panel, rotating-drum, backlit scroll) follow same requirements as static signs
Revisions to Chapter 2M – Recreational and Cultural Interest Area Signs

(formerly Chapter 2H)
Revisions incorporated into the 2009 MUTCD

Updated and expanded set of recreational and cultural interest area symbol signs
Memorial or dedication signing

- One sign per direction
- No extraneous information or decorative elements
Revisions to Chapter 2N – Emergency Management Signing

(formerly Chapter 2I)
New option for fluorescent pink background when EM-6 or EM-7 signs are used for an incident situation
Revisions to Part 3 – Markings
Section 3A.02 – Temporary masking of markings

• Allowed until old markings can be removed or obliterated, but…
• Only with material that is “approximately the same color as the pavement”
Section 3A.05 – Colors

• **Purple Markings** – only as optional supplement to lane lines or edge lines of toll plaza approach lanes that are restricted to vehicles with registered ETC accounts.

• **Blue RPMs** – Not a TCD
  – Removed from MUTCD, except for new Section 3B.11 Support statement describing their use by emergency personnel in locating fire hydrants.
Section 3B.01

A single yellow center line marking on a two-way roadway is specifically prohibited
Sections 3B.02 and 3B.10

Minimum taper lengths for longitudinal lines changed from Standard to Guidance
- Urban: 100 feet
- Rural: 200 feet
Section 3B.04
White Lane Line Markings

Dotted (not broken) lane lines shall be used for non-continuing lanes:

- Lane drops (wide dotted)
- Auxiliary lanes (wide dotted)
- Acceleration lanes (normal width dotted)
- Deceleration lanes (normal width dotted)

Applies on freeways, expressways, and conventional roads
Lane drops on conventional roads

2009 MUTCD (Final Rule)
Compliance date for replacing existing broken lane lines with dotted lane lines for non-continuing lanes:

- December 31, 2016 or resurfacing, whichever occurs first
Section 3B.11 – Optional use of RPMs around noses of raised medians, curbs, or islands
Section 3B.16
Stop lines and yield lines

• Stop lines shall **not** be used where drivers are required by law to **yield** rather than come to a full stop

• Yield lines should not be used in advance of crosswalks across a roundabout approach or departure

• Stop lines and yield lines may be “staggered” on a lane-by-lane basis
Section 3B.20 – Word, symbol, and arrow markings

Optional route shield pavement markings

A - Interstate Shield on dark or light pavement
B - U.S. Route Shield on dark pavement
C - U.S. Route Shield on light pavement
D - State Route Shield on dark pavement
E - State Route Shield on light pavement
Section 3B.20 – Revised Use & placement of lane-use arrows

“ONLY” markings should be used for “trap” lanes

Only shall **not** be used for lane with more than one movement
Section 3B.20 – Recommended use of arrows in two-way left-turn lanes at certain locations

At start of lane and elsewhere along lane as needed
New Chapter 3C

Pavement markings at roundabouts
Section 3F.03 – Delineator Application

Delineators should be used with guardrails and other barriers
Section 3G.01 – Colored pavements

Non-retroreflective, for aesthetics only, not to communicate a message = not a TCD

Retroreflective or intended to communicate a regulatory, warning, or guidance message = TCD (shall comply with color code and other provisions for markings)
Chapter 3H – Channelizing devices used for emphasis of pavement marking patterns

Outside of TTC zones, when channelizing devices separate opposing traffic flows, retroreflective bands shall be yellow
Section 3I.06 – Pedestrian islands and medians

Reference to ADAAG regarding detectable warning surfaces to mark the boundary between pedestrian and vehicular areas
New Chapter 3J – Pavement markings used with longitudinal and transverse rumble strips
Revisions to Part 4 – Highway Traffic Signals
Section 4B.02
Steps for signal removal changed from option to guidance

- Installing a sign such as this is no longer one of the steps in the process.

- This is only one of several possible legends for a sign, if used.
Section 4C.04
New guidance in Warrant 3 (Peak hour)

- Signals installed under Warrant 3 (peak hour):
  - should be traffic-actuated, and
  - may be operated in flashing mode during off-peak hours
Section 4C.05
Revisions to Warrant 4 (pedestrian volume)

Figure 4C-5. Warrant 4, Pedestrian Four-Hour Volume

*Note: 107 pph applies as the lower threshold volume.
Sections 4C.05 & 4C.06

Signals based only on warrant 4 (ped volume) or warrant 5 (school crossing) should also control the minor street or driveway

• no “half-signals”
Section 4C.10 – New Warrant 9 for intersections near grade crossings

Figure 4C-10. Warrant 9, Intersection Near a Grade Crossing (Two or More Approach Lanes at the Track Crossing)

- MINOR STREET, CROSSING APPROACH - EQUIVALENT VPH**
  - D = 120 ft
  - D = 110 ft
  - D = 90 ft
  - D = 70 ft
  - D = 50 ft
  - D = 30 ft

- MAJOR STREET—TOTAL OF BOTH APPROACHES—VEHICLES PER HOUR (VPH)
  - 25 vph applies as the lower threshold volume
  - VPH after applying the adjustment factors in Tables 4C-2, 4C-3, and/or 4C-4, if appropriate
Section 4D.03
Use of No Pedestrian Crossing signs at signalized locations

Where it is necessary or desirable to prohibit a pedestrian movement that is not practical to physically prevent by other means...

Sign should be used (rather than may)
Section 4D.07
12-inch indications required for all new traffic control signal faces

Six options for using new 8-inch indications in special circumstances
(incl. \(\leq 30\) mph if \(<120\) ft from stop line)
Section 4D.11 – Recommended minimum number of thru signal faces on approaches with speeds ≥ 45 mph:

Table 4D-1. Recommended Minimum Number of Primary Signal Faces for Through Traffic on Approaches with Posted, Statutory, or 85th-Percentile Speed of 45 mph or Higher

<table>
<thead>
<tr>
<th>Number of Through Lanes on Approach</th>
<th>Total Number of Primary Through Signal Faces for Approach*</th>
<th>Minimum Number of Overhead-Mounted Primary Through Signal Faces for Approach</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>1</td>
</tr>
<tr>
<td>2</td>
<td>2</td>
<td>1</td>
</tr>
<tr>
<td>3</td>
<td>3</td>
<td>2**</td>
</tr>
<tr>
<td>4 or more</td>
<td>4 or more</td>
<td>3**</td>
</tr>
</tbody>
</table>

NOTES: *A minimum of two through signal faces is always required (See Section 4D.11). These recommended numbers of through signal faces may be exceeded. Also, see cone of vision requirements otherwise indicated in Section 4D.13.

** If practical, all of the recommended number of primary through signal faces should be located overhead.
Section 4D.11 – Recommended number, location, and design of signal faces for approaches with speeds ≥ 45 mph:
Section 4D.12 – Optional yellow retroreflective borders around backplates
Section 4D.13 – Positioning of overhead separate signal faces for turn movements

- If installed overhead for a dedicated turn lane, the separate turn face shall be located over the turn lane (not necessarily centered over the lane)
Section 4D.26 – Yellow change intervals and red clearance intervals

• Durations shall be determined using engineering practices
  – Compliance date December 31, 2014 or when timing adjustments are made (whichever occurs first)
• Use of red clearance – changed from option to guidance, when indicated by application of engineering practices
Section 4D.27
Back-up power should be provided for signals with RR preemption
Section 4E.02 – Revised legal meaning of flashing upraised hand pedestrian signal indication

- If signal is timed to provide sufficient time for pedestrians to cross the entire highway -- legal right to cross entire divided highway without stopping at the median.
- If signal timing provides only enough time for pedestrians to cross to the median -- median-mounted signs, ped signals, and pushbuttons (if actuated) are required.
Section 4E.06 – Slower walking speed for calculating pedestrian clearance time (guidance)

4.0 feet per second  Ped. Clearance Time based on 3.5 feet/sec

[Exception allows 4.0 ft/sec if extended button press or passive ped detection allows slower peds to request additional crossing time]

Sum of Walk time + Ped. Clearance Time based on 3.0 feet per second for distance from ped detector to far side
Section 4E.07
Countdown pedestrian displays

- **Required** for all ped signals except where ped change interval is ≤ 7 sec.

- No specific compliance date for retrofitting existing ped signals (can remain w/o countdown until ped heads replaced)

- May be used even if ped change interval is 7 sec. or less
Accessible Pedestrian Signals (APS) and Accessible Detectors – combined and reorganized into five new sections

- 4E.09 – General
- 4E.10 – Location
- 4E.11 – Walk indications
- 4E.12 – Tactile arrows and locator tones
- 4E.13 – Extended press button features
Reorganization of Chapters 4F-4N

- 4F – Pedestrian Hybrid Beacons
- 4G – Traffic Control Signals and Hybrid Beacons for Emergency Vehicle Access
- 4H – Traffic Control Signals for One-Lane, Two-Way Facilities
- 4I – Traffic Control Signals for Freeway Entrance Ramps
- 4J – Traffic Control for Movable Bridges
- 4K – Highway Traffic Signals at Toll Plazas
- 4L – Flashing Beacons
- 4M – Lane-Use Control Signals
- 4N – In-Roadway Lights
Revisions to Part 5 – Traffic Control Devices for Low-Volume Roads
Part 5 is not applicable on neighborhood residential streets

Part 5 applies only outside of built-up areas of cities, towns, and communities
Typical sizes for signs and plaques on low-volume roads are the same sizes as for conventional roads.

<table>

</tbody>
</table>
High-visibility safety apparel

- Required for all workers within the public right of way
- Applies to all roads, not just those on the Federal-aid system
- Option for law enforcement and first responders to use new ANSI “public safety vests”
- Firefighters and law enforcement are exempted from the requirement under certain conditions
- December 31, 2011 compliance date on non Federal-aid highways
Flaggers shall use a paddle, flag, or AFAD, not just hand signals.
Two flaggers should be used for a one-lane, 2-way constriction unless TTC zone is short enough for the flagger to see from one end to the other.
New optional and recommended signs and plaques to accompany Speed Limit signs in TTC zones

Center Lane Closed Ahead symbol sign has been removed from the MUTCD

W9-3

W9-3a
New symbol sign and supplemental plaque for shoulder drop-off
Temporary Markings

• Delineate path through the TTC zone when the permanent markings are either removed or obliterated during the work activities.
• Should not be left in place longer than 14 days
• Some allowable exceptions to normal longitudinal markings requirements
Temporary RPMs in TTC zones

• More provisions on color, patterns, and spacing, consistent with Part 3
  – Colors and patterns shall simulate the markings for which they substitute
  – May be used to substitute for solid lines

• Option to use a less expensive pattern of temporary RPMs to substitute for broken line segments
  – Should not be used more than 14 days
Preemption of temporary signals in TTC zones
Provisions for traffic incident management

• A reference is made to the Incident Command System (ICS)
• All on-scene responders and news media personnel should wear high-visibility apparel
• Light sticks may be used in lieu of flares
Revisions to Part 7 – Traffic Control for School Areas
Deletion of material from Part 7

• Sections 7A.05 through 7A.10
• Sections 7C.02 through 7C.06 covered in Chapter 3B
• Chapter 7D – Signals
• Student patrols in existing Chapter 7E
• Chapter 7F – Grade-Separated Crossings
Use of minimum size of school signs

• Application of the minimum sizes only where traffic volumes are low and speeds are 30 mph or lower
FYG color required for all school warning signs
New symbol sign to replace the S3-1 word message sign
New sign to warn of school bus turnaround locations
Warning of school zone in close proximity to an intersection

END SCHOOL SPEED LIMIT or END SCHOOL ZONE sign required at end of reduced school speed limit zone
Operating procedures for adult crossing guards changed from recommended to required

- Shall not direct traffic in the usual law enforcement regulatory sense
- Shall pick opportune times to create a sufficient gap in traffic flow
- Shall stand in roadway
- Shall use a STOP paddle
Adult school crossing guards and law enforcement personnel performing school crossing supervision must wear Class 2 high-visibility apparel

- Compliance date December 31, 2011
Revisions to Part 8 – Traffic Control for Railroad and LRT Grade Crossings
Parts 8 and 10 are combined

- Reduces redundancy and cross-references
- “Grade crossing” is a new generic term
- Chapter 8C (Illumination) becomes Section 8A.06
YIELD or STOP signs required at passive highway-rail grade crossings (Dec. 31, 2019 compliance date)
Stripes on gate arms shall be vertical
Revisions to Part 9 – Traffic Control for Bicycle Facilities
New sign for lanes that are too narrow for bicyclists and motorists to operate side-by-side

MAY USE FULL LANE

R4-11
New bicycle destination guide signs
