ATG Interviews Sameer Shariff

Katina Strauch
Against the Grain, kstrauch@comcast.net
ATG: Tell us about yourself and how you came into this marketplace. What is your prior experience and what is your training?

SS: I am a serial entrepreneur with a passion for turning ideas into real businesses. I founded Impelsys as a pure-play services organization focused on providing online content delivery solutions and services to publishers. As the founder and CEO of Impelsys Inc., I drive Impelsys’ business vision, strategy, value and growth. Impelsys is my second start up which has now grown into a leading online content delivery solution for the STM, children’s and educational publishing markets. Impelsys products and services help over 70 publishers with their online content delivery strategy. Our customers include major publishers such as Reed Elsevier, McGraw Hill, Wolters Kluwer, Thomson, Springer, Houghton Mifflin Harcourt to smaller publishers as Marshall Cavendish, Benchmark Education and Pruflrock Press. Over a period of eight years, servicing some of the largest publishers in the industry, Impelsys has gained valuable expertise in the publishing domain, while gaining insights into the challenges faced by the industry.

The first company that I founded was Medsite Inc. As Chief Strategic Officer and Executive Vice President of Sales, I helped Medsite become one of the largest Internet pharmaceutical marketing companies in the United States. In 2006, we sold Medsite to WebMD for over $40 Million.

I am a graduate of the University of Pennsylvania, where I earned my Bachelor of Science degree in Entrepreneurial Management from the Wharton School of Business.

ATG: Your Website says that Impelsys technology enables publishers to go digital. What exactly is Impelsys? Is it a publisher? Is it a vendor? Is it something new? What does the name Impelsys mean or signify?

SS: Impelsys Inc. is a US company, offering technology products and services to the global publishing industry. The overall goal of Impelsys is to be the leader in providing content delivery infrastructure to publishers through a SaaS model, and helping them build a digital strategy. Our customers include major publishers such as Reed Elsevier, McGraw Hill, Wolters Kluwer, Thomson, Springer, Houghton Mifflin Harcourt, and Blackwell Publishing, among others.

Impelsys has empowered publishers of all sizes, large and small to launch online products and helped them compete, evolve and grow in an increasingly complex marketplace.

ATG: A lot of this functionality (look inside the book, for example) is available through other providers like Amazon. Are you working with companies like Amazon? How about Google?

SS: It is true that many providers offer products/solutions that have certain features and functionality that is part of iPublishCentral. However, no company or product has been able to offer an integrated, single source solution that can help publishers market, distribute and deliver content online, and allow them to enjoy all the rich features and benefits through a self-serve model. iPublishCentral allows publishers to manage their entire title information and assets in a single place. As a marketing tool, it enables publishers to talk directly to their readers with specific campaigns or promote. It also helps publishers drive the popularity of their own Website, rather than just their book on Amazon or Google Book Search. As a delivery tool, it allows publishers to easily create feature-rich portals around their titles, with existing content formats and immediately start selling content to individuals and institutions. With iPublishCentral publishers can capitalize on the same content multiple times. Moreover, it brings down the cost and time required to set-up digital strategies by integrating automated content conversion workflows and ready-to-go functionality with no hassles of content conversion costs, format compatibility, server hosting or maintenance.

We plan to syndicate with Amazon and other online bookstores to serve as an outlet for any online purchases made through our widgets or our platform.

ATG: Your technology seems to enable publishers to create widgets and expand their market potential. In your words, explain how publishers can take advantage of iPublishCentral.

SS: iPublishCentral is a revolutionary solution offering an end-to-end workflow solution that enables publishers of any size to effectively market, distribute and deliver their content online through a self-serve model.

iPublishCentral’s market module, iPublishWidget, enhances marketing reach by allowing publishers to make their content available for sale online and promote their brands and titles across the Web through viral marketing. iPublishWidget increases the discoverability of the publishers’ content by search engines and its reports provide insight into reader behavior and preferences. iPublishCentral’s ViewInside serves up publisher-controlled content sampling that enhance the likelihood of a reader’s decision to purchase.

iPublishCentral facilitates content distribution through its distribute module, iPublishWarehouse, which allows publishers to sort, search, retrieve and distribute electronic versions of titles from a digital warehouse. iPublishCentral’s delivery module, iPublishPortal, allows publishers to quickly launch sophisticated, feature-rich branded portals, complete with the latest Web 2.0 functionality, and create marketable online content products and bundles in record time for as little as five dollars per title per month. Other publisher-focused features include individual and institutional subscriptions, integrated usage reports and advanced systems for managing content, users and subscriptions.

ATG: Besides a Website, what else does a publisher need to utilize iPublishCentral?

SS: Publishers don’t even need a Website for using iPublishCentral. They just need to have standard title information that is title PDF, metadata as Excel or ONIX and cover art. Utilizing this information, publishers can create their own branded widgets, ViewInside and feature-rich portals around their title or series of titles.

ATG: Why should libraries be interested in Impelsys and iPublishCentral?
SS: With iPublishCentral removing the cost barriers for transitioning content online, publishers of all sizes are now able to market and promote online content. Libraries can take advantage of this by being able to discover content which was not easy or available earlier. Using publisher book widgets, libraries can promote readership on certain titles and subject matters.

ATG: This is a powerful and innovative technology. Can you tell us how you plan to develop it in the future? What are your plans for 2009 and the rest of the decade?
SS: We have a 24-month roadmap to further develop iPublishCentral, wherein we are planning to add features that will help publishers leverage their core asset, content, to deliver both on online and mobile platforms. We also plan to give them the ability to maximize the returns on their content by allowing them to sell in a flexible manner — by bundles, by chapter, by subject matter sets, as complete databases, and offer individual and institutional access, backed with different pricing models.

Sameer Shariff
Founder & CEO, Impelsys
55 Broad Street, 16th Floor, New York, NY 10004, USA
Phone: (212) 239-4138 • Fax: (917) 591-9536 <s shariff@impelsys.com> www.impelsys.com

BORN & LIVED: India, Middle East, Singapore, USA.
EARLY LIFE: Always dreamed about turning ideas into businesses that create wealth, and in the end turned some of these dreams into realities.
FAMILY: Married with three kids.
PROFESSIONAL CAREER AND ACTIVITIES: Went to Wharton Business School, studied entrepreneurial management. Started first company Medsite after college, built it successfully and sold it to WebMD. I am currently working on my second venture — Impelsys.
IN MY SPARE TIME I LIKE: I spend time with family and enjoy outdoor sports including golf and running. I ran the New York Marathon and plan to run the Paris Marathon.
FAVORITE BOOKS: Charlie and the Chocolate Factory.
PHILOSOPHY: We are all privileged with unique attributes, which we should leverage to make a difference and create a better world.
MOST MEANINGFUL CAREER ACHIEVEMENT: Transforming an idea that was conceived on a piece of paper to seeing it today into a successful organization, which now employs hundreds of people and leads the industry in its niche.
GOAL I HOPE TO ACHIEVE FIVE YEARS FROM NOW: To be the leader in providing content delivery infrastructure to publishers through a SaaS model, and helping them build a direct relationship with their end customers.

Booklover — Blindness

First, The Joy Report. Joy is my Caribbean bibliophile friend and email correspondent introduced in my last column. Currently the temperature in Eleuthera is in the mid 70s with sky and ocean competing for the finest palettes of blue. At the Glass Window Bridge in North Eleuthera you can access both the Caribbean and the Atlantic blues simultaneously. The season is in full swing, but Joy still finds the time to send me book recommendations from her notebook. She has a chronological list of every book she has ever read and can find any individual entry with the speed and accuracy of a computerized library catalogue. Her most recent book recommendation is “Infidel” by Ayaan Hirsi Ali.

Soon I’m on Upper King Street in downtown Charleston. I’m on a crusade to scour the Middle East Section of Blue Bicycle Books for any sign of “Infidel.” It’s not a case of my being unaware of the convenience and certainty of ordering books on the Internet. Amazon.com and Alibris.com are wonderful Websites and easy to navigate. It just seems a poor substitute for actually feeling the texture of the paper, luxuriating in the cozy environment of a good bookstore and most of all, enjoying the adventure of the hunt. And at Blue Bicycle Books you always have to stop and pet the store cat. True to the historical tradition of crusades, mine is in vain but the hunt is not unrewarded. “Hypocrite in a poufy white dress: Tales of growing up groovy and clueless” by Susan Jane Gilman is my delight, if somewhat unlikely consolation. The title suggests a starkly contradictory theme to “Infidel.” However, the humorous approach to humanity and its realities was a refreshing breath of fresh air from the more ponderous world of my most recent “Nobelist” read “Blindness” by Jose Saramago.

A few years ago I embarked on what will probably be a life long project to find and read at least one book by each Nobel laureate in Literature. I’m not even sure if all the authors have books available in translation but with over 100 recipients to choose from, it will be some time before this is a limiting factor.

My frequent treasure hunts at Blue Bicycle Books for the masterpieces from my Nobelist Literature list end in enchantment every time I discover a new book for the collection regardless of subject matter. This brings me to “Blindness.” Even writing this now, it is difficult to know where to begin or what perspective to use. Should I speak about the delicate and exquisite shades of gray that define us and how these are magnified and reduced so that the reader experiences the horrors of swimming in the belly of the monster called humanity? Crisis divides the river, removes the gray hues and leaves us blind with only black and white. Saramago deliciously intrigues the reader with the white blindness phenomenon that is overtaking the community. Next thing you realize you are confronting the mouth of a monster. Swimming in the belly of the beast is not my idea of a good time. My first three attempts to read this book faltered, as every time I would reach the monster’s belly I would set the book aside to think. Finding almost any contemplation more pleasant than the wretched world of Saramago’s imagination, I would invariably fail to return to the story at all. Finally determined that the book had to be finished, I was relieved to discover that I had already tackled the worst of the story. Once finished I was glad that I had persevered. The story is beautifully written and maybe in the end one can find hope. It was but a few days later I was awaiting the feature film at the local cinema. The previews were rolling and suddenly there on the silver screen was the belly of the beast. I saw the monster — yes a movie based on this book starring Julianne Moore. No, I decided Saramago’s words were going to have to suffice. I was not anxious to revisit that particular vision played out on a giant screen.
