NOW in its second volume and celebrating its first full year of publication—including publication of its 1,000th article—Organic Letters is enjoying a tremendous welcome in the organic, bio-organic, and medicinal chemistry fields due to both the speed by which results of special timeliness and urgency are published and the high quality of those results.

Organic Letters evolved from a cooperative agreement between ACS and SPARC (Scholarly Publishing and Academic Resources Coalition), an initiative of the Association of Research Libraries. SPARC fosters competition in the scientific publishing marketplace by creating partnerships with scholarly publishers to distribute cutting-edge research to libraries and other institutions faster and at a significantly lower cost.

American National Biography

With new or revised biographies added every three months, thousands of illustrations, tens of thousands of bibliographies and hypertext links, and powerful, easy-to-use searching, ANB Online is now the new standard in American biography.

"A powerful database with algorithms and indexes that work...designed with real human searchers in mind....Even libraries that have already invested in the print set will want to consider the advantages of the online format."—Reference Books Bulletin

"Like the printed version, ANB is an indispensable reference source. Simple to search, easy to navigate and read....Highly recommended for all libraries."—Library Journal

Oxford English Dictionary

The first full revision of the OED will take at least ten years—but now everyone can have access to this monumental work in progress. OED Online combines rich searching (by definition, date, etymology, quotation, author, full text, wild card, and more) with thousands of new or revised words added every year, updated or revised definitions, new historical information, and greatly expanded coverage of English in all its global varieties.

"The interface is very user-friendly...the enhanced value of the online version over the print is astonishing....an essential acquisition for all libraries."—Library Journal

When you call to place an order, Ellen promises service with a smile. (Even if you can't see it.)

WE MAKE ORDERING CONVENIENT BY GIVING YOU OPTIONS. ORDER BY PHONE, FAX, MAIL, OR OVER THE INTERNET.

Ellen has been helping our customers place their orders for over 10 years. She even knows many of them just by the sound of their voices. Like the rest of us at Emery-Pratt, she enjoys getting to know customers and helping them anyway she can. She answers questions about new books, helps them locate hard-to-find titles, and writes up every order to the customer's exact specifications. And once, when a long-time customer from Virginia jokingly asked Ellen to send her some Michigan snow, Ellen put paper shreds in an envelope marked "snow seeds" and dropped them in her shipment of books (no extra charge).

Call us today. We'll help you anyway we can.

RIP has recently completed a two-year project that will provide you with expanded online access to our large body of scientific literature—more than doubling the number of articles now available online. With the help of the Naval Research Laboratory, we've created six additional years of digital archives for seven of our core journals, extending RIP's online archive back to 1991.

This project adds nearly 50,000 articles to RIP's Online Journal Publishing Service (OJPS) platform. Institutional customers will have the option to subscribe to the expanded archive version of each journal for an additional $50. For The Journal of Chemical Physics and Journal of Applied Physics, the additional charge is $75.
