Blackwell’s Collaborative Collection Development
Easy, online collaboration among libraries.

Torn between two similar titles? Worried about duplicating the collection of the library across town? Now, with just a few clicks, you can collaborate with more than 3000 libraries nationwide.

Blackwell’s Collaborative Collection Development allows libraries to share views of their activities, such as orders placed, titles blocked, requests pending, and more. This no-cost addition to Collection Manager allows you to easily confer with fellow libraries—without impacting each other’s activity or divulging invoice activity.

Enjoy the benefits of collaborating with your colleagues—without all the phone calls. For more information, visit www.Blackwell.com or call 1.800.547.6426.
International Political Science Abstracts (IPSA), produced by the International Political Science Association, includes current indexing and abstracts of the world’s leading journals in political science. This database contains more than 100,000 records from nearly 900 journals published from 1989 to the present. Approximately 8,000 new records will be added to the database yearly.

IEEE is RESEARCH.

Scott has the freedom to conduct research his way, thanks to IEEE.

The IEEE Member Digital Library was designed for individual researchers like Scott. With easy access to the best current technology publications — including top-cited journals and cutting-edge conferences — Scott can find the research he needs, at a price he can afford.

Updated weekly, and with over 1 million online IEEE documents to explore, the IEEE Member Digital Library brings Scott the ability to succeed on his own. He also found papers from three new conferences to help support his research.

To Scott, IEEE is research. Discover what IEEE can be for you.

The 7 Principles

1. As not-for-profit publishers, we see it as our mission to maintain and enhance the independence, rigor, trust, and visibility that have established scholarly journals as reliable filters of information emanating from clinical and laboratory research.

2. As not-for-profit publishers, we reinvest all of the revenue from our journals in the direct support of science worldwide, including scholarships, scientific meetings, grants, educational outreach, advocacy for research funding, the free dissemination of information for the public, and improvements in scientific publishing.

3. As not-for-profit publishers, we have introduced and will continue to support the following forms of free access:
   a. Selected important articles of interest are free online from the time of publication;
   b. The full text of our journals is freely available to everyone worldwide either immediately or within months of publication, depending on each publisher's business and publishing requirements;
   c. The content of our journals is available free to scientists working in many low-income nations;
   d. Articles are made available free online through reference linking between these journals;
   e. Our content is available for indexing by major search engines so that readers worldwide can easily locate information.

4. We will continue to work to develop long-term preservation solutions for online journals to ensure the ongoing availability of the scientific literature.

5. We will continue to work with authors, peer-reviewers, and editors for the development of robust online and electronic tools to improve efficiency of their important intellectual endeavors.

6. We strongly support the principle that publication fees should not be borne solely by researchers and their funding institutions, because the ability to publish in scientific journals should be available equally to all scientists worldwide, no matter what their economic circumstances.

7. As not-for-profit publishers, we believe that a free society allows for the co-existence of many publishing models, and we will continue to work closely with our publishing colleagues to set high standards for the scholarly publishing enterprise.

...About the Washington DC Principles

The Washington DC Principles is a commitment from 50 (and growing) medical/scientific societies and publishers to provide free access and wide dissemination of published research findings.

The DC Principles provide what has been called the needed "middle ground" in the increasingly heated debate between those who advocate immediate unfettered online access to medical and scientific research findings and advocates of the current journal publishing system. The document was drafted in response to recent claims that these publishers' practices hinder the public's ability to access published scientific research.

The American Physiological Society (APS) and the International Union of Physiological Scientists (IUPS) are pleased to announce some major and exciting changes to *News in Physiological Sciences (NIPS)* that took place in August 2004. These changes will transform *NIPS* into a more state-of-the-art, reader-friendly publication.

You can expect the following changes that will surely capture the many aspects of physiology important to your research:

**New Name and Look**

*News in Physiological Sciences* has been renamed *Physiology*. Both the cover and the inside pages have a new, state-of-the-art look.

**New Features**

There are a number of new features, such as culled abstracts from other important papers, short articles on emerging topics and on emerging technologies, and reviews of web sites and occasional historical perspectives.

**Better use of Illustrations and Color**

The figures that appear in the articles will be drawn professionally to give the entire journal a polished and exciting look. There will be better use of color throughout.

**Best Authors, Excellent Editing, and Improved Graphics**

Through the efforts of the best authors, excellent editing, and improved graphics, the main goal of *Physiology* will still be to keep physiologists and others up-to-date on topics they may not follow closely. This journal will continue to report and describe trends, discoveries and events of interest to scientists and others working in the field of physiology. The main body of *Physiology* will still contain short review-type articles that have been the strength of *NIPS*. 
A new and more powerful way to access SAGE Journals.

The content you want, the convenience you need.

Free Access to SAGE Journals Online September 1-October 31, 2004

SAGE Journals Online will offer a new and more powerful way to access SAGE journal content. The new online delivery platform will host SAGE journals and will represent one of the largest collections in the social sciences as well as an extensive STM list.

Powered by HighWire Press, the new SAGE platform will enable users to access content more easily and powerfully through
- Flexible browsing and searching capabilities
- Social science specific taxonomy
- User personalization (eTOCs, My Favorite Journals)
- Toll-free inter-journal reference linking
- External links (to/from ISI, CrossRef, MEDLINE)
- PDA downloading capabilities
- Pay per view options

Library-friendly features:
- Familiar subscription and administration tools
- COUNTER compliant reports
- User-friendly usage statistics

SAGE Journals Online will be available in September 2004! Bookmark http://online.sagepub.com for the latest details.

"In our science endeavor, the thrill of discovery is the real fuel for taking off but the flight becomes satisfactory and enjoyable when recognition by peers, perhaps the most significant reward, becomes evident."

Encouraging new discoveries in the chemical sciences is central to our mission at the American Chemical Society. That's why ACS Publications provides subscribers access to more than 125 years of the most read, most cited, and most requested journals in chemistry. Because with that kind of access, anything is possible.

Essentials for those in the statistical sciences

Encyclopedia of Biostatistics
Second Edition
Edited by Peter Armitage and Theodore Colton

Reviews of the First Edition:
"The present scope of statistics in medical research is nowhere more manifest than in the stunning, benchmark Encyclopedia of Biostatistics . . . an unsurpassed and timely addition to the statistical literature."
—International Journal of Epidemiology

"A resource beyond compare . . . the author index reads like a Who's Who of the subject . . . a colossal work of immense importance."
—British Medical Journal

This is the essential reference for the growing number of statisticians employed in the pharmaceutical industry and the healthcare sector. This Second Edition features more than 1,300 articles, 185 new to this edition, plus more than 300 revised and updated ones exploring such key topics as bioinformatics, genetics, and Bayesian methods.

Never underestimate the importance of a librarian.

Okay, chances are you won’t find a librarian consulting on prenatal care. But librarians do play a vital role on any medical team, enabling point-of-care solutions and research breakthroughs. Whether you’re choosing information for research communities or decision support for professionals, Elsevier offers access to a world of information anytime, anywhere. Select from a wide range of scientific, technical and health resources in multiple media, including innovative electronic products like ScienceDirect® and MD Consult. After all, getting the right information into the right hands is critical to the outcome of any examination. Building Insights. Breaking Boundaries.™
THE PSYCHOLOGY OF PREJUDICE AND DISCRIMINATION

Four Volumes

**EDITED BY JEAN LAU CHIN**

Foreword by Joseph E. Trimble

*Race and Ethnicity in Psychology*

In spite of the progress made in the battle against discrimination, the detrimental effects of prejudice and bias are still evident in U.S. society. Long after the end of the Civil War, the Civil Rights Movement of the 1960s, desegregation in the schools, the abolition of anti-Asian legislation and the Women’s Movement, displays of prejudice have become more covert, even as the focus has shifted to the issue of Gay Rights.

These volumes examine how bias and disparities in services, opportunities, and practices affect quality of life, health, and mental health for all peoples. Focusing on the psychology at issue, experts from across the nation and in different fields examine the state of prejudice and discrimination in America today, and each offers practical direction that can be taken by individuals, communities, and officials to create a more just society.

Obesity Management focuses on issues surrounding the health hazards that obesity poses and covers practical advice and information about prevention and treatment; interviews with leading obesity experts; concise, up-to-date practical summaries of the latest research; meeting calendar; Internet and web resources; and reviews of both new books and products.

Editor: James O. Hill, PhD

Zebrafish is the only peer-reviewed journal to focus on the zebrafish, which has many valuable features as a model organism for study of vertebrate development. Due to its prolific reproduction and the external development of the transparent embryo, the zebrafish is a prime model for genetic and developmental studies, as well as research in toxicology and genomics.
