Will They Still Need Us When Everything is Online and Findable by the Major Search Engines? by Margaret Landesman
What does the future hold for library collections?

Convenient, Commutarian, Interactive, & Media Rich Collections .................................. 18
by Daniel R. Lee — The materials we buy, borrow, or build for students will need to be viewable in the tools they use, and available where they normally look, or risk being ignored.

If It’s Not Digital It Does Not Exist ........... 22
The Future of Science and Technology Collection Development by Johann van Reenen — Our only real option in our changing electronic environment is to capitalize on emergent systems. The author hopes to begin a debate.

Collection Development & SURVIVAL in the “Mostly Digital” Library .................. 28
by Dr. Michael Stoller — The vast archival holdings of our special collections, millions of linear feet of correspondence, manuscripts and realia, while they will certainly be the objects of selective conversion and the source of wonderful digital exhibits, don’t at present suggest a viable business model for mass digitization.

Is Access to Government Information Getting Better or Worse? ................... 32
by Katherine Helvoet — The simple answer is yes, access to government information is getting better and worse.

Missing Information and the Long Tail: .................................................. 34
How Distributed Collection Development Assures the Continued Relevance of Libraries by Amy Brunvand — The Web has not solved the problem of missing information. It has merely changed the nature of the problem.

Are New Technology and New Business Models Leading to a New Literature? 38
by Stephen Rhind-Tutt — Stephen talks about a new Website and how it may have the potential for transforming scholarly publishing.

From SEPL to SEPLIA .................................. 42
How and Why Indiana University is Helping the Stanford Encyclopedia of Philosophy by Colin Allen and Cecile Jagodzinski — The SEPLia current growth spurt will eventually settle down, but even when it does the SEPLia is designed to keep growing and responding to new scholarly developments.

Collecting Abstracts .................................. 44
Music in the Library by Amanda Maple — For hundreds of years, music has been printed on paper but many scores are born digital and that’s just part of the story.

Op Ed — Crazy Idea # 274 .............. 50
Just Stop Collecting by Rick Anderson — Instead of figuring out how to ratchet down the activity of our current acquisition model, perhaps the time has come to move towards a different model altogether.

Images Matter: The Introduction of Artstor at the UC Berkeley .................. 59
by Lynn Cunningham and Kathryn Wayne — For the first time, librarians and visual resource curators were given the option to license a fairly comprehensive, coherent online digital image database tailored to the research and pedagogical needs of the academic community.
