Learning Has No Boundaries

You know your students need IEEE information. Now they can have it, and you can afford it.

IEEE recognizes the special needs of smaller colleges, and wants students to have access to the information that will put them on the path to career success. Now, smaller colleges can subscribe to the same IEEE collections that large universities receive, but at a lower price, based on your full-time enrollment and degree programs.

An Unmatched Collection of Award-winning Reference Titles

History Reference Online is an extensive, full-text, online collection of encyclopedias, handbooks, dictionaries, and guides covering a broad range of subjects including:

- American and world history
- Law and government
- Geography
- World and U.S. issues
- Pop culture, folklore and mythology
- History of religion
- Political, social, and military history
- History of science, technology, and the environment

HIGHLIGHTS

- A minimum of 50 titles will be added to each collection, per year, on an ongoing basis—reducing time spent evaluating, selecting, and procuring individual titles
- Packages have a starting base of 255 titles, many of which have been selected as outstanding reference sources by Choice, Library Journal, ALA, and others
- Every title in History Reference Online comes with a free MARC record containing an embedded URL that supports a direct link to the title from library OPAC

FEATURES

- Multiple research access points—search across the entire collection, browse the title list or search within a single book
- Unlimited simultaneous user level means no waiting for a single reserved copy and remote access capabilities supports all students, both on and off campus
- As easy to use as popular Internet search engines, but will lead to credible, citable research materials

A Significant Savings

History Reference Online is available as an annual subscription that offers a significant discount off the list price of individual titles and includes hosting and quarterly additions of new titles.

Give Your Patrons Access to More AIP Online Content than Ever Before

Physics Today Online — Now Get Access Back to 1985
AIP’s flagship magazine, Physics Today, established online subscription options for libraries this year. Print subscribers can gain access to all but the most recent 12 months of the magazine for an additional $200, and in 2008, backfile access will extend back to 1985. Add this important new resource to your subscription today.

New Names for Two AIP Package Subscriptions
AIP has changed the names of its AIP Archival and AIP Archival Plus package subscriptions. The new names respectively are AIP Select and AIP Complete. The content of each package will remain the same. AIP Archival customers will automatically be renewed to AIP Select, and AIP Archival Plus customers will be renewed to AIP Complete. All available backfiles will continue to be included in each subscription.

Introducing AIP Spotlight Publications
AIP has broken out subsets of two of its well-respected journals and is offering them as separate online subscriptions. These topically based journals are part of a new series called AIP Spotlight Publications. From Journal of Applied Physics comes an online edition of Applied Physics Reviews, and from The Journal of Chemical Physics comes JCP:BioChemical Physics.

AIP Conference Proceedings Offers Online Subscriptions to Seven Topical Subseries
In 2007, for the first time, AIP is giving libraries the option of receiving online subscriptions to any of seven new subseries. These include Materials Physics and Applications; Astronomy and Astrophysics; and Atomic, Molecular, and Optical Physics. Subscriptions include all titles in a subseries back to January 2000.
The Journal Publishing Program of the American Physiological Society (APS) covers the entire spectrum of physiology—examining major physiological systems, from the cellular and molecular to the organ and system level. These prestigious peer-reviewed journals are available in print and online. An online subscription to the APS journals provides you with immediate access to the latest issue of the journal as well as with continued access to all content published previously online. Subscribers to the online journals also get access to the fastest possible publication of original research articles through our Articles in Press feature—articles published in manuscript form within a few days of acceptance. The APS journal titles are:

- American Journal of Physiology (AJP consolidated)
- AJP-Cell Physiology
- AJP-Endocrinology and Metabolism
- AJP-Gastrointestinal and Liver Physiology
- AJP-Lung Cellular and Molecular Physiology
- AJP-Heart and Circulatory Physiology
- AJP-Regulatory, Integrative and Comparative Physiology
- AJP-Renal Physiology
- Journal of Applied Physiology
- Journal of Neurophysiology
- Physiological Genomics
- Physiological Reviews
- Physiology
- Advances in Physiology Education

The APS Journal Legacy Content is an “online package” of over 100 years of historical scientific research from the American Physiological Society’s (APS) 14 research journals that can be purchased separately at a one-time charge for perpetual use. It is not sold as a subscription; instead, you pay once ($2,000) for the perpetual access to the online content from all APS journals from 1898 to 1996-1998 (depending on the journal). This content goes back to the first issue of each of the APS journals—including APS’s first journal, the American Journal of Physiology, first published in 1898. The Legacy Content can be viewed as completely searchable scanned images of the printed pages. (find more info at: www.the-aps.org/publications/legacy)

Continuations and Standing Orders

Preface
Continuations and standing orders represent a frustrating and time-consuming area of book acquisitions. Efficient management of continuations requires a staff knowledgeable in all aspects of standing order procedures, with prompt and accurate service being essential.

Midwest Library Service has been providing continuation and standing order programs to libraries for over three decades with the same commitment to high quality as our firm order service: prompt delivery, accurate invoicing, immediate reporting, convenient communications, and personal Library Service Representatives. Our reputation for excellence is well established and we invite you to place your continuations list with us.

Scope
Our Continuation & Standing Order Service encompasses most series and continuations from U.S. publishers. Our services do not include supplying magazines, journals, or loose-leaf updating services.

Procedure
Our Continuation & Standing Order Service incorporates both automated systems and personal surveillance. Instead of relying on the filing and ordering systems of the publishers, we place orders for specific volumes as books are due to be published. If the next item in a series is not received when scheduled, we initiate a new order for the same item. This procedure helps avoid potentially missed volumes and eliminates any dependence upon the publishers’ fulfillment systems. If in-house information is not available on future volumes to be published, we call the publisher for future projections and publication schedules. This information is then used to update our new title records.

Advantages
1. Because of our method of ordering specific volumes, we are in regular communication with the publishers.
2. Our status reports are prompt and accurate and should eliminate library claims.
3. Specific claims from an individual library resulting in an updated status report will generate new status reports to all libraries ordering the same series.
4. We do not drop ship.

Quality service depends on good communications between the library and the jobber. Your personal Library Service Representative and our convenient communications provide easy access to us regarding your continuation orders. We invite you to try our service by sending us your next list of standing order titles.
