Gambling: What Are the Odds for Indiana Families?

Indiana Family Impact Seminars

November 21, 2005

Sponsoring Organizations

Center for Families, Purdue University

The Department of Family Relations, Ball State University

Family Service Council of Indiana

Indiana Association of Family and Consumer Sciences

The Institute for Family and Social Responsibility, Indiana University

Indiana Association for Marriage and Family Therapy

Indiana Extension Homemakers Association®

Purdue Extension, Consumer and Family Sciences

For a description of the organizations see pages 9 & 10.

Purpose, Presenters and Publications

Family Impact Seminars have been well received by federal policymakers in Washington, DC, and Indiana is one of several states to sponsor such seminars for state policymakers. Family Impact Seminars provide state-of-the-art research on current family issues for state legislators and their aides, Governor's Office staff, state agency representatives, educators, and service providers. One of the best ways to help individuals is by strengthening their families. Therefore, the Family Impact Seminars speakers analyze the consequences an issue, policy or program may have for families.

The seminars provide objective, nonpartisan information on current issues and do not lobby for particular policies. Seminar participants discuss policy options and identify common ground where it exists.

Gambling: What Are the Odds for Indiana Families is the eighth in a continuing series designed to bring a family focus to policymaking. The topic was chosen by the very legislators these seminars are intended to inform. This year's topic focuses on two policy approaches – The Impact of Gambling on Budgets: Households and Beyond and Exploring Gambling as a Public Health Matter. This eighth seminar features the following speakers:

Jennifer Reynolds, M.Ed.
Mgr, Public Health Gambling Project
Dept. of Public Health Sciences
Faculty of Medicine
Univ. of Toronto
Toronto, Canada
(416) 978-8498
Fax (416) 946-0096
jennifer.reynolds@utoronto.ca

Larry DeBoer, Ph.D.
Professor, Agricultural Economics
Purdue University
Krannert Building, Rm. 618
403 W. State Street
West Lafayette, IN 47906
(765) 494-4314
Fax (765) 494-9176
ldeboer@purdue.edu

For further information on the seminar contact coordinator Karen DeZarn, Purdue Extension Administration, Purdue University, 812 West State Street, Matthews Hall 110, West Lafayette, IN 47907-2060

Phone: (765) 494-8252 FAX: (765) 496-1947 e-mail: kdezarn@purdue.edu

We hope that this information is useful to you in your deliberations, and we look forward to continuing to provide educational seminars and briefing reports in the future.

Gambling Links

(Taken from the Center for Families website <http://www.cfs.purdue.edu/CFF>)

1. National Gambling Impact Study (<http://govinfo.library.unt.edu/ngisc/>)

National report released in 1999 that discusses the major issues, such as regulating gambling, problem and pathological gambling, Native American Tribal gambling, Internet gambling, impact on people and places, and future research needs.

2. Gambling Impact and Behavior Study (<http://www.norc.uchicago.edu/new/gamb-fin.htm>)

The National Opinion Research Center at the University of Chicago, in collaboration with a team of consultants, analyzed five new data sets on gambling behavior, problems, and attitudes. Nationally representative surveys were conducted in 1999 with adults and adolescents, and ten community case studies were conducted to study the effects of casino openings. This data was also highlighted in the National Gambling Impact Study.

3. Impact on Gambling: Economic Effects More Measurable than Social Effects (www.gao.gov/new.items/gg00078.pdf)

This report, released in 2000, examined the National Gambling Impact Study and conducted a case study in Atlantic City, NJ from issues raised in the national report. The GAO report focused on four areas:

- the economic effects of gambling, particularly on employment, bankruptcy, and tax revenues and community investment;
- the social effects of gambling;
- the prevalence of pathological gambling, and
- whether communities offer incentives to attract gambling establishments.

Some of the overall findings indicate that there is no direct link between gambling and bankruptcy and it is difficult to clearly identify the social effects of gambling.

4. Center for Urban Policy and the Environment (http://www.urbancenter.iupui.edu/WhatWeDo/WhatWeDo_Projects.asp?subcategoryID=17)

This site provides links to reports that the Center has produced, such as an evaluation of various aspects of Indiana riverboat gambling, needs assessments and market analysis surrounding gambling in Indiana communities. In addition, the Center led the 1999 Indiana Gambling Impact Study Commission and produced a report on the economic and social impacts of gambling in Indiana communities. This report is available by calling the Center at 317-261-3000.

5. Harvard Medical School Institute for Research on Pathological Gambling and Related Disorders

<http://www.divisiononaddictions.org/institute/index.htm>

This site provides links to research, curriculum, and guides that address pathological gambling in adults and adolescents.

6. Public Health Gambling Project, University of Toronto
(<http://www.phgp.org/about.htm>)

The Public Health Gambling project provides links to peer-reviewed research in the areas of gambling and public health. It also provides links to other Canadian and international websites on problem gambling and adolescent gambling.

7. The Centre for Gambling Studies, The University of Auckland
(<http://www.health.auckland.ac.nz/population-health/gambling-studies/>)

Through the Medical and Health Sciences division, this website offers links to international research and researchers on gambling, particularly continuous forms of gambling such as electronic gambling machines.

8. Gambling in America ((<http://www.baylor.edu/provost/index.php?id=28260>))

This book, written by Dr. Earl Grinols, establishes a framework for a cost-benefit analysis to evaluate the social and economic costs of casinos in American communities. Dr. Grinols was one of the first academics to call for a national gambling impact study commission, and was instrumental in bringing attention the social and economic costs of gambling in America. This link is to his faculty website at Baylor University. The book may be ordered through Amazon.com.

A Checklist for Assessing the Impact of Policies and Programs on Families

The first step in developing family-friendly policies is to ask the right questions:

- ❖ What can government and community institutions do to enhance the family's capacity to help itself and others?
- ❖ What effect does (or will) this policy (or proposed program) have for families? Will it help or hurt, strengthen or weaken family life?

These questions sound simple, but they can be difficult to answer.

The Family Criteria (Ad Hoc) Task Force of the Consortium of Family Organizations (COFO) developed a checklist to assess the intended and unintended consequences of policies and programs on family stability, family relationships, and family responsibilities. The checklist includes six basic principles. These principles serve as the criteria for evaluating policies and programs for sensitivity to and support of families. Each principle is accompanied by a series of family impact questions.

The principles are not rank ordered and sometimes they conflict with each other, requiring trade-offs. Cost effectiveness also must be considered. Some questions are value-neutral and others incorporate specific values. People may not always agree on these values, so sometimes the questions will require rephrasing. This tool, however, reflects a broad nonpartisan consensus, and it can be useful to people across the political spectrum.

For the questions that apply to your policy or program, record the impact on family well-being.

Principle 1. Family support and responsibilities.

Policies and programs should aim to support and supplement family functioning and provide substitute services only as a last resort.

Does the proposal or program:

- ❖ support and supplement parents' and other family members' ability to carry out their responsibilities?
- ❖ provide incentives for other persons to take over family functioning when doing so may not be necessary?
- ❖ set unrealistic expectations for families to assume financial and/or caregiving responsibilities for dependent, seriously ill, or disabled family members?
- ❖ enforce absent parents' obligations to provide financial support for their children?

Principle 2. Family membership and stability.

Whenever possible, policies and programs should encourage and reinforce marital, parental, and family commitment and stability, especially when children are involved. Intervention in family membership and living arrangements is usually justified only to protect family members from serious harm or at the request of the family itself.

Does the policy or program:

- ❖ provide incentives or disincentives to marry, separate, or divorce?
- ❖ provide incentives or disincentives to give birth to, foster, or adopt children?
- ❖ strengthen marital commitment or parental obligations?
- ❖ use appropriate criteria to justify removal of a child or adult from the family?
- ❖ allocate resources to help keep the marriage or family together when this is the appropriate goal?
- ❖ recognize that major changes in family relationships such as divorce or adoption are processes that extend over time and require continuing support and attention?

Principle 3. Family involvement and interdependence.

Policies and programs must recognize the interdependence of family relationships, the strength and persistence of family ties and obligations, and the wealth of resources that families can mobilize to help their members.

To what extent does the policy or program:

- ❖ recognize the reciprocal influence of family needs on individual needs, and the influence of individual needs on family needs?
- ❖ recognize the complexity and responsibilities involved in caring for family members with special needs (e.g., physically or mentally disabled, or chronically ill)?
- ❖ involve immediate and extended family members in working toward a solution?
- ❖ acknowledge the power and persistence of family ties, even when they are problematic or destructive?
- ❖ build on informal social support networks (such as community/neighborhood organizations, religious communities) that are essential to families' lives?
- ❖ respect family decisions about the division of labor?
- ❖ address issues of power inequity in families?
- ❖ ensure perspectives of all family members are represented?
- ❖ assess and balance the competing needs, rights, and interests of various family members?
- ❖ protect the rights and safety of families while respecting parents' rights and family integrity?

Principle 4. Family partnership and empowerment.

Policies and programs must encourage individuals and their close family members to collaborate as partners with program professionals in delivery of services to an individual. In addition, parent and family representatives are an essential resource in policy development, program planning, and evaluation.

In what specific ways does the policy or program:

- ❖ provide full information and a range of choices to families?
- ❖ respect family autonomy and allow families to make their own decisions?
On what principles are family autonomy breached and program staff allowed to intervene and make decisions?
- ❖ encourage professionals to work in collaboration with the families of their clients, patients, or students?
- ❖ take into account the family's need to coordinate the multiple services they may require and integrate well with other programs and services that the families use?
- ❖ make services easily accessible to families in terms of location, operating hours, and easy-to-use application and intake forms?
- ❖ prevent participating families from being devalued, stigmatized, or subjected to humiliating circumstances?
- ❖ involve parents and family representatives in policy and program development, implementation, and evaluation?

Principle 5. Family diversity.

Families come in many forms and configurations, and policies and programs must take into account their varying effects on different types of families. Policies and programs must acknowledge and value the diversity of family life and not discriminate against or penalize families solely for reasons of structure, roles, cultural values, or life stage.

How does the policy or program:

- ❖ affect various types of families?
- ❖ acknowledge intergenerational relationships and responsibilities among family members?
- ❖ provide good justification for targeting only certain family types, for example, only employed parents or single parents? Does it discriminate against or penalize other types of families for insufficient reason?
- ❖ identify and respect the different values, attitudes, and behavior of families from various racial, ethnic, religious, cultural, and geographic backgrounds that are relevant to program effectiveness?

Principle 6. Support of vulnerable families.

Families in greatest economic and social need, as well as those determined to be most vulnerable to breakdown, should be included in government policies and programs.

Does the policy or program:

- ❖ identify and publicly support services for families in the most extreme economic or social need?
- ❖ give support to families who are most vulnerable to breakdown and have the fewest resources?
- ❖ target efforts and resources toward preventing family problems before they become serious crises or chronic situations?

Adapted from Ooms, T. (1995). Taking families seriously as an essential policy tool. Paper prepared for an expert meeting on Family Impact in Leuven, Belgium.

The first version of this checklist was published by Ooms, T., & Preister, S. (Eds., 1988). A strategy for strengthening families: Using family criteria in policymaking and program evaluation. Washington DC: Family Impact Seminar.

The checklist and the papers are available from Karen Bogenschneider and Jessica Mills of the Policy Institute for Family Impact Seminars at the University of Wisconsin-Madison/Extension, 120 Human Ecology, 1300 Linden Drive, Madison, WI, 53706; phone (608) 263-2353; FAX (608) 262-5335; <http://sohe.wisc.edu/familyimpact>.

Sponsoring Organizations and Descriptions

The Center for Families at Purdue University focuses on improving the quality of life for families and strengthening the capacity of families to provide nurturing environments for their members. To accomplish this, the center works with four important groups whose efforts directly impact quality of life for families: extension educators, human service providers, employers, and policymakers. With informed sensitivity to family issues, these groups have the power to improve the quality of life for families in Indiana and beyond.

The Department of Family Relations at Ball State University includes a variety of majors from interior design and residential property management to nutrition and marriage and family relations. We offer courses in family relations, infant/toddler, child development, marriage, life-work management, family stress and family policy. Students are also required to take interdisciplinary coursework. In addition, students are required to complete a 400 hour internship at a family or child related facility which also includes government internships. Our curriculum has been designed to fulfill the academic requirements to become a Certified Family Life Educator (CFLE). CFLEs have received academic training in ten substantive areas related to the family, one of which is family policy, and are certified by the National Council of Family Relations, a professional organization.

The purpose of the Family Service Council of Indiana is to represent families and respond to their needs by strengthening member agencies and creating alliances to promote excellence in advocacy and service for families throughout Indiana. With 12 member agencies, the Family Service Council serves the citizens of nearly 60 Hoosier counties. FSCI member agencies offer a wide variety of programs, including counseling, sexual abuse assessment, homemaker services, children's programs, services for victims of domestic violence, as well as many other diverse programs for over 90,000 individuals, approximately 80 percent of whom are low income. These services are offered regardless of race, creed, or color on a sliding fee scale supported by local United Ways and governmental grants. Statewide, FSCI members employ approximately 1,000 people with various professional degrees and specific skills to assist clients in resolving their life issues. The total operating budgets for these member agencies range from \$220,000 to \$3.5 million.

The members of the Indiana Association of Family and Consumer Sciences focus on an integrative approach to the relationships among individuals, families and communities as well as the environments in which they function. The association supports the profession as it provides leadership in: improving individual, family and community well being; impacting the development, delivery and evaluation of consumer goods and services; influencing the creation of public policy; and shaping social change.

The Indiana Association of Marriage and Family Therapy is part of the American Association of Marriage and Family Therapy. Since the founding of AAMFT in 1942, they have been involved with the problems, needs and changing patterns of couples and family relationships. The association leads the way to increasing understanding, research and education in the field of marriage and family therapy, and ensuring that the public's needs are met by trained practitioners. The AAMFT provides individuals with the tools and resources they need to succeed as marriage and family therapists.

The Institute for Family and Social Responsibility is a joint venture of the Schools of Social Work and Public and Environmental Affairs designed to bring the resources of Indiana University researchers to the assistance of public policy makers on issues impacting Hoosier families. The Institute's mission is to bring together the resources of citizens, governments, communities and Indiana University to better the lives of children and families. Ongoing research projects have examined the impacts of welfare reforms, the efficiency of the township system of government, the adequacy of child support guidelines, community responses to the Temporary Assistance to Needy Families legislation, performance contracting for intensive family preservation services, and AIDS education for incarcerated youth. The Institute serves as the National Child Support Enforcement Research Clearinghouse.

It is the mission of the Indiana Extension Homemakers Association® to strengthen families through continuing education, leadership development, and volunteer community support. We share information on new knowledge and research with our members and communities, promote programs on developing skills and family issues, and we support projects which help children and families in today's world.

Purdue Extension Consumer and Family Sciences provides informal educational programs that increase knowledge, influence attitudes, teach skills, and inspire aspirations. Through the adoption and application of these practices, the quality of individual, family, and community life is improved. Consumer and Family Sciences Extension is a part of the mission of the College of Consumer and Family Sciences at Purdue University and the Purdue Extension Service

The Impact of Gambling on
Budgets: Households and
Beyond

Larry DeBoer
Shelley MacDermid

Family Impact Seminar
November 21, 2005

Consumer Expenditure Survey

- Conducted by the Census for the Bureau of Labor Statistics
- Data for 34,883 households which kept diaries or submitted to interviews
- Information on demographics, incomes and expenditures

Research Design

- Divide sample into 6 demographic groups
- Low and high income, divided at median (\$42,946)
- Single adult households, Two adult households, Households with children
- Divide each group into low and high gaming losses, less than and greater than \$100
- Compare characteristics, income and spending for each low/high gaming pair

Twelve Sample Groups

- 669 high gaming households; 34,214 low gaming households
- Incomes for some pairs don't match as well as hoped
- Compare shares of income, shares of expenditures
- Big differences in average gaming expenditures
 - Low gaming: \$10 to \$22
 - High gaming: \$941 to \$1,642

Demographics (table 1)

- On average, High Gaming Households
 - Are older
 - Have fewer children
 - Are more likely to be male
 - Own more cars
 - Are less likely to be college educated
 - Spend more, save less or borrow more
- Than Low Gaming Households.

Spenders vs. Savers (tables 2-7)

- For all six pairs, the high gaming households spent more out of income (or beyond income) than the low gaming households
- The amount of extra spending exceeded the added gaming spending
- Added gaming spending one part of overall preferences?
- Or are there lots of complements to gaming spending?

Complementary Spending

- On average, High Gaming Households also spend more on
 - Food away from home (5 of 6 pairs)
 - Alcoholic beverages away from home
 - Transportation
 - Tobacco products (5 of 6 pairs)
- Than Low Gaming Households.

Consumers vs. Investors

- On average, High Gaming Households also spend less on
 - Housing
 - Owned dwellings (5 of 6 pairs)
 - Rented dwellings (all 6 pairs)
 - Furniture (5 of 6 pairs)
 - Education (5 of 6 pairs)
 - Charitable contributions (5 of 6 pairs)
- Than Low Gaming Households.

Gaming and Education Spending

- High Gaming Households with low incomes and children
 - Have fewer children and spend less on education
- High Gaming Households with high incomes and children
 - Have fewer children but spend more on education
- High Gaming Households without children
 - Spend less on post-secondary education for themselves

Sales and Excise Taxes (table 8)

- Estimate the average sales and excise taxes per \$1,000 of income paid by each group
- Indiana sales tax rate, 6%; tax base:
 - Tangible goods except food and medicine
 - Utilities
 - Rentals
- Gasoline (18 cents/gal.)
- Alcohol
 - Beer 11.5 cents/gal
 - Wine 47 cents/gal
 - Liquor \$2.68/gal
- Tobacco (cigarettes 55.5 cents/pack)
- Gaming (lottery tickets, 29 cents/dollar = state revenue)

Sales and Excise Taxes

- High Gaming Households pay more sales and excise taxes than Low Gaming Households
- They spend more on excise taxable goods (fuel, tobacco, alcohol)
- They spend less on non-taxable spending (housing, education, charity)
- They spend more and save less generally

Cause and Effect?

- When gaming opportunities increased, did some Low Gaming Households become High Gaming Households?
 - Spending more on gaming, tobacco, alcohol, restaurants
 - Spending less on housing, education, charity
- Or is gaming part of a preference for spending on entertainment, so that gaming spending came at the expense of even more tobacco, alcohol and restaurant spending?

“Looking Out for More Efforts to Expand Gambling”

The Indianapolis Star – July 31, 2005

The Gambling Landscape PUBLIC HEALTH PERSPECTIVE A Broad Overview

Acknowledgements

- David Korn
- Lorne Tepperman
- Harvey Skinner

Outline of Presentation

- Gambling expansion
- A public health perspective
- Family focus on gambling

Problem Gambling

"An addictive illness...in which the subject is driven by an overwhelming, uncontrollable impulse to gamble. The impulse progresses in intensity and urgency, consuming more and more of the individual's time, energy and emotional and material resources. Ultimately, it invades, undermines and often destroys everything that is meaningful in his life."

Robert Custer & Harry Milt
When Luck Runs Out: Help for Compulsive Gamblers and Their Families, 1985

Gambling Expansion

**Worldwide
\$900 billion revenue
to governments from citizens
through wagering loses**

*The Collapse of Globalism
John Ralston Saul, 2005*

Definition of Gambling

Gambling is...

Risking money or something of value on an outcome of an event involving chance when the probability of winning or losing is less than certain.

Gambling Occurs in...

- School yards
- Casinos
- Corner Stores
- Racetracks
- Internet
- Homes
- All age groups
- All socio-economic groups
- All cultural backgrounds

Forms of Gambling

- Lotteries
- Casino's
- Scratch tickets
- Nevada tickets
- Raffles
- Games of Skill
- Sports Betting
- Cards
- Bingo
- VLT's
- Slots
- Stock speculation
- Internet
- Pari-mutuel betting

Factors Driving Gambling Expansion

- Revenue: Financial needs facilitated through public policy, enabling legislation & venue expansion
- Technology: VLT/EGM, Web, TV
- Economic Growth: Local community development
- Demand: Advertising, marketing & media exposure

*At any one time,
more people are playing poker on the
internet than in all the USA casinos
combined*

***The Costs & Benefits
Of Gambling Expansion***

- 
- Benefits**
- Socialization & leisure activity
 - Hopefulness
 - Stress management
 - Local jobs
 - Government revenue
 - Charity & local community revenue
 - Aboriginal economic development

- 
- Costs**
- Gambling addiction / problem gambling
 - Family dysfunction
 - Substance abuse
 - Mental disorders
 - Suicide
 - Financial difficulties & poverty
 - Criminal behavior

Canadian Tax Foundation
Economic Study of Gambling

COSTS = 3.6
BENEFITS = 9.1

NET BENEFIT: = 5.5
(billions of dollars CAN)

Gambling & Governments in Canada, 1909-1998
Canadian Tax Foundation, 2000

Canadian Tax Foundation
Economic Study of Gambling

Costs:

- >Crime related
- >Health related
- > Family related
- >Job related

Benefits

- >Employment related
- >Government revenues
- >Consumer surplus associated with gambling demands & activities

**Conclusion of study found that the benefits of gambling in Canada greatly outweigh the costs..*

**Public Health Perspective
On
Gambling**

"The way you define a problem will determine what you do about it."

Dr. Jonathan Mann
GLOBAL AIDS Program
World Health Organization

Public Health

Public health looks at the **factors and forces (determinants)** that cause illness and injury at the **level of the community**.

To make a real difference in public health, you have to **change the culture** of modern society.

John Frank MD, Director, Institute for Population and Public Health,
Canadian Institutes of Health Research

Gambling and Public Health

Study of the distribution & determinants of **gambling-related health problems** in a defined population and the organized public measures to **prevent, eliminate or control** its occurrence, spread and impact

"The enduring value of a public health perspective is that it applies **different 'lenses'** for *understanding* gambling behavior, *analyzing* its benefits and costs, as well as *identifying* strategies for action."

*Harvey Skinner, Chair,
Department of Public Health Sciences,
University of Toronto
Journal of Gambling Studies, 2000*

Public Health "Lenses" on Gambling

Multidisciplinary & interdisciplinary sciences

- Epidemiology & biostatistics (distribution)
- Population health/social epidemiology (determinants)
- Community health/development (actions)

- Environmental health/health ecology
- Workplace health
- Behavioral health (risks/problems)

- Health economics (money)
- Behavioral neurology (neuro-imaging)
- Health Promotion (communication/social marketing)

Value of a Public Health Perspective on Gambling

- Addresses gambling as a whole not solely problem gambling
- Upstream emphasis
- Strategic orientation
- Commitment to partnerships
- Stakeholder engagement
- Multiple interventions
- Balances costs and benefits

Kum, D. & Shaffer, H. (1999). Gambling and the Health of the Public: Adopting a Public Health Perspective. *Journal of Gambling Studies*, 15(4), 289-365.

The Gambling Continuum

Determinants of Problem Gambling

Kum, D. & Shaffer, H. (1999). Gambling and the Health of the Public: Adopting a Public Health Perspective. *Journal of Gambling Studies*, 15(4), 289-365.

Pathways into Gambling Addiction

- Biogenetic Predisposition
- Maladaptive Coping
- Mental Illness & Addiction
- Social Exposure

Public Health Strategy for Gambling

Gambling Strategic Goals

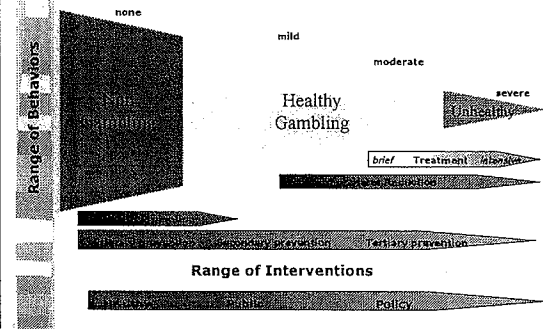

- **Promote:** informed, balanced attitudes & behaviors towards gambling & gamblers
- **Prevent:** gambling related health problems
- **Protect:** vulnerable & at risks populations

Korn, D. & Shaffer, H. (1999). Gambling and the Health of the Public: Adopting a Public Health Perspective. *Journal of Gambling Studies*, 15(4), 289-365.

Guiding Principles for Gambling Action

- Primacy of Prevention
- Healthy Public Policy
- Shared Responsibility

Framework for Public Health Action

Epidemiology and Social Ecology

UNITED STATES The Gambling Economy

In 1996, gross gambling revenues in the USA were \$47.6 billion.

Greater than combined revenues of film box office, recorded music, cruise ships, spectator sports & live entertainment.

Figure 1. U.S. Consumer Spending on Commercial Casino Gaming, 1988-2004 (Adapted from the AGA's "State of the States" report, 1999-2009)

Indiana State Gaming Statistics

- 10 operating casino's (riverboat)
- 16,555 casino employees
- Gross casino gaming revenue = \$2.36 billion
- Gaming tax revenue = \$702.7 million

Indiana Gaming Commission, as viewed on American Gaming Association Website. (www.americangaming.org/industry/state/statistics/emf?stateid=9)

Family Focus on Gambling

The Literature: Role of Family Influences

- Parental gambling is a risk factor for problem gambling
- Parental modeling, tolerance, encouragement, participation
- Problem gambling can start early, through gambling with parents
- Grandparent gambling, sibling gambling are also risk factors

(Brook et al, 1986; Lau et al, 1990; Jacobs, 1989; Gupta & Derevensky, 1997)

The Literature: Effects of Gambling on Marriage

- Some positive effects...

- Many negative effects:
 - Causes financial problems
 - Reduces cohesion, satisfaction
 - Increases marital conflict
 - Harms health of gambler, spouse

(National Council of Welfare, 1996; Lorenz & Shuttlesworth, 1983; Lorenz & Yaffee, 1988)

@ Home with Gambling Study

Lorne Tepperman, PhD
David Korn, MD

Funded by the Ontario Problem Gambling Research Centre

Research Purpose

- To explore patterns of gambling within families and within ethno-cultural groups in the Greater Toronto area.

- Ethno-cultural groups included in the study are:
 - Aboriginal
 - British Isles
 - Caribbean
 - Chinese
 - Latin American
 - Russian

Participants

- Sample: convenience, snowball, self-selection in Greater Toronto area
- 360 = 6 groups X 60 respondents
- Face to face in respondent's language

- Finding the sample:
 - Community partners (e.g., family service agencies)
 - 18 interviewers
 - Advertisements, posters, flyers

The Interview Schedule

- Open- & closed-ended items
- SOGS to measure gambling
- Demographics
- Ethno-cultural identification
- Family patterns
- Gambling perceptions, practices

Findings – Intergenerational Transfer

- Children learn gambling practices and attitudes at home

- Children learn from parents, grandparents, siblings, uncles and aunts

- Pass these practices and attitudes to their children and grandchildren

Findings - Family Communication in Childhood

- Problem gamblers were more likely to have witnessed or heard about their parents gambling than non-problem gamblers
- Problem gamblers were more likely than non-problem gamblers to have witnessed or heard about their grandparents gambling
- Respondents who discussed their gambling with their children were more likely than other respondents to have children who gamble

Findings - The Beginnings of Problem Gambling

- Problem gamblers started gambling earlier than non-problem youth gamblers
 - more likely to remember their first game,
 - more likely to remember having won it
- Problem gamblers gambled when they were growing up
 - with friends, co-workers, siblings, non-family members, and others .

Extent of Problem Gambling, by Ethnicity

Percentage of Ontario sample with problem or moderate risk gambling

- Aboriginal..... 9.4
- Latin American..... 8.6
- Chinese..... 7.9
- Russian.....6.0
- Caribbean.....2.8
- British Isles.....2.7

Limitations of Study

- sample unrepresentative
- small numbers in each group
- need more information about
 - gambling practices
 - beliefs about gambling
 - financial and class position
 - quality of parenting, family life

Partner Influences on Gambling: An Exploratory Study

*Lorne Tepperman, PhD
David Korn, MD
Jennifer Reynolds, MEd*

Funded by the Ontario Problem Gambling Research Centre

Research Question

"In what ways, and with what degree of success, do Ontario adults attempt to regulate their partner's gambling behavior?"

- Do partners influence the problem gambling of their spouses?
- Can they influence their spouses to get treatment?

Participants

- 60 problem gamblers
- 60 spouses of problem gamblers
- 10+ couples
- self-selected in response to advertisement

Interview Schedule

- Administer 9-item CPGI problem gambling severity index
- Gambling/partner behavior
- Marital relations
- Network embeddedness
- Stages of Change
- Openness to treatment
- Financial decision making

TO ACHIEVE THE RIGHT BALANCE
ONE HAS TO BE NIMBLE, SMART &
STRATEGIC

Counterforce – Youthbet.net

Concluding Thoughts

- Gambling is a public health issue based on the evidence related to epidemiology, health and social costs and quality of life concerns
- Advances in the biological, behavioral and computer sciences will shape the gambling field
- Ontario has enormous talent, diverse programs, credible institutions and significant financial support to build upon
- Gambling represents a central and challenging opportunity for innovative public health interventions, strategic partnerships & new knowledge

“Everything should be made as simple as possible, but not one bit simpler.”

— Albert Einstein
