What is Indiana LTAP?

Indiana Local Technical Assistance Program (LTAP) was established by the Federal Highway Administration (FHWA). The purpose of the LTAP program is to translate the latest, state-of-the-art road, highway and bridge technologies into systems usable by local highway agencies. LTAP is funded by FHWA, the local agency distribution of the Motor Vehicle Highway Account and Purdue University. This directory is published annually by the Indiana LTAP office at Purdue University.

Vision Statement

The vision of the Local Technical Assistance Program is to be known and respected throughout the State of Indiana as the primary resource for training, technical assistance, and technology transfer for government and industry officials with local transportation related responsibilities, and to be known throughout the LTAP community as an innovative, aggressive, and productive participant.

Mission Statement

The mission of the Indiana Local Technical Assistance Program is to foster a safe, efficient, environmentally sound transportation system by improving the skills and knowledge of local transportation providers through training, technical assistance, and technology transfer.

Project Name: *Noble County Bridge Number 5*
Owner: *Noble County*
Designer: *Strand Associates*
Construction Inspection: *DLZ, Inc.*
Contractors: *Primco Inc./Fox Contractors Corp*
Description: *With the development of an industrial park on the east side of Kendallville, Noble County Road 1000 East has seen a significant increase in traffic. With a present ADT of almost 5000 vehicles per day it has become the most heavily traveled local roadway in the Noble County Highway system. Norfolk Southern Railroad has approximately 87 trains per day crossing CR1000E at the Noble County/Kendallville Corporate Limits. Concerned with traffic delays and safety issues, Noble County and the City of Kendallville joined forces on a Federal Aid Project to eliminate the estimated 500,000 vehicle stoppages per year. MSE wall was used to limit the bridge span and the right of way needed in the industrial park. A pedestrian walkway was built under the south approach to facilitate use of the adjacent Kendallville Outdoor Recreation Complex and parking areas located on the east and west side of CR1000E. Non-standard right of way purchasing was allowed by the FHWA which saved over $250,000 in construction costs. Partnering was utilized on this five million dollar plus project which was embraced by all parties including utilities, contractors, Norfolk Southern Railroad, the City of Kendallville and Noble County. Working together ensured that the roadway was closed just over a year for construction and was finished before the completion date.*
