Automated Traffic Signal Performance Measures

AASHTO Innovation Initiative (formally TIG) **2013 Focus Technology**

Mission: Investing time and money to accelerate technology adoption by agencies nationwide

- Each year the program selects highly valuable technologies, processes, software, or other innovations that have been adopted by at least one agency, are proven in use, and will be a significant benefit to other agencies.

Automated Traffic Signal Performance Measures

Lead States Team

Automated Traffic Signal Performance Measures

AASHTO Innovation Initiative (formally TIG)

2013 Focus Technology

Accomplishments

- ✓ Presented at several conferences nationwide.
- ✓ ITE Journal article & series of webinars.
- ✓ Worked with equipment vendors incorporating hi-def.
- ✓ Improved the source-code & added additional SPM's.
- ✓ Installed SPMs for several jurisdictions.
- ✓ SPM Workshop.

SPM Workshop State & Federal Agencies

Representation from 20 State & Federal Agencies

SPM Workshop Public Agencies

Representation from 25 Public Agencies

SPM Workshop Universities

Representation from 5 Universities

SPM Workshop Private Sector

Representation from 35 Private Sector Locations

SPM Workshop Participants

169 Representatives from 85 Different Organizations, 28 States, DC, & Canada

Obtaining SPMs

- ❖ Everyone should have SPMs!
- ❖ In process of hiring a technical writer for improved source code documentation.
 - Document logic on building algorithms.
 - How the different pieces work together.
 - Database to web server; services to website, etc.
- ✓ We are **committed** in making available our source code for free to anyone who wants it.
 - Why reinvent the wheel?

Obtaining SPM Source Code

The screenshot shows the UDOT Signal Performance Metrics website. The UDOT logo is in the top left. The main title 'Signal Performance Metrics' is in large blue font. Below it is a navigation bar with links: Charts, Reports, Log Action Taken, Links, and FAQ. The 'Links' link is highlighted with a blue underline. A black arrow points from the word 'Links' (written in large black font to the left of the page) to the 'Links' link in the navigation bar. Below the 'Links' link, a dropdown menu is open, showing a list of links: Udot Performance Measure (PDF), World-Class Signals QIT report (PDF), Utah.gov, UDOT, UDOT Traffic, Minnesota DOT Signal Performance Measures, Indiana Hi Resolution Data Logger Enumerations, and Presentations. At the bottom of the dropdown menu is a blue button labeled 'Download Source Code'. A grey arrow points from the bottom left towards this button.

Obtaining SPMs

➤ Installations take 1-2 days

- It's equivalent to setting up a central system
- Upgrades take just as long

➤ We request the private sector integrate and support SPM's.

- We will provide private sector training (as needed)
- If demand for private sector support becomes burdensome, we may schedule a set time & location for training and support.
 - Semi-annual?, In Utah?
- May consider a link on our SPM site of qualified consultants who can provide the support.

National Traffic Signal Report Card

- ❖ Delays at traffic signals contribute 5% to 10% of all traffic delay on major roadways alone.
- ❖ Benefit-Cost Ratios exceed 40:1
 - What else is higher?
 - These are inexpensive solutions

Before & After Signal Coordination Results

Delay vs Time in Retiming Signals

- Signals should be retimed more frequently

Opportunity – UDOT Executive Leaders - 2011

“What would it take for UDOT’s traffic signals to be World-Class?”

“What’s the trend – are signal operations improving, staying the same or getting worse?”

“What are our areas of most need?”

John Njord

Carlos Braceras

UDOT Annual Self Assessment - Best Practices

UDOT Asset Management (A.M.) Tiers

- A.M. Tiers range from 1 to 3
- Tier 1 assets:
 - Highest value combined with highest risk of negative financial impact for poor management.
 - Very important to UDOT.
 - Receive separate funding source.
 - Targets and measures are set and tracked.

Tier 1 Assets

Pavement

Bridges

ATMS / Signal Devices

Tier 2 Assets

Pipe Culverts

Signs

Barriers & Walls

Rumble Strips

Pavement Markings

Tier 3 Assets

Cattle Guards

Interstate Lighting

Fences

Curb & Gutter

Rest Areas

UDOT Signal Timing Focus Group (July 2014)

- Two 2-hour groups
- Participants
 - Mix of ages 25-55
 - Drive 3 or more times per week
 - Have driven outside of Utah
- Group 1: Female drivers
- Group 2: Male drivers

Focus Group Room

Observation Room

Focus Group Key Findings (July 2014)

UDOT is perceived positively, with innovation as the primary driver of positive impressions.

Drivers believe traffic signal synchronization is improving.

Drivers feel UDOT should be open about its accomplishments in a way that protects its credibility.
