Special Issue: 50 Years of Model Minority Stereotype Research

Nicholas D. Hartlep

Metropolitan State University

Special Issue Editor's Introduction

Since 1966, William Petersen's *New York Times Magazine* article "Success Story: Japanese American Style" has been cited as the scholarly progenitor of the model minority stereotype.¹ However, as Wu (2016) points out in her book *The Color of Success: Asian Americans and the Origins of Model Minority*, "The field [Asian American Studies] ironically has crafted its own mythology of the model minority by insisting that the stereotype originated as an imposition on Asian Americans by others, particularly a handful of mainline journalists and social scientists" (p. 255). Wu's historical analysis is informative to my research, and like her, I've devoted a considerable amount of my time to studying the model minority stereotype. My understanding is that my book *The Model Minority Stereotype: Demystifying Asian American Success* is the only published annotated bibliography on the topic, and my website, "The Model Minority Stereotype Project" likewise, is the only dedicated webpage to the subject.

Scholars must read one another's work for ideas to proliferate, for scholars to coalesce, and for paradigms to shift. The more that I read emergent scholarship on the model minority myth (e.g., see Gin, Ho, Martinez, Murakami, & Wu, 2017; Hsu, 2015; Phruksachart, 2016; Tran & Curtin, 2017), and the more that I reflect upon the existing literature, I am left awestruck in how creative and advanced this scholarship has become. From my perspective, research that challenges the model minority myth is important because it continues to influence future possibilities.

This special issue, intentionally focused on Southeast Asian Americans and the model minority myth, is important because Southeast Asian Americans have been "politically invisible" (Wagner, 2016) and because although "an impressive number of Americans whose ancestors are from Cambodia, Laos, and Vietnam ("Southeast Asian Americans") have achieved tremendous success in education, a disproportionate number have found it difficult to succeed academically" (Yang, 2014, p. 51).

In 2015, I co-edited *Killing the Model Minority Stereotype: Asian American Counterstories and Complicity* with Bradley Porfilio. Part IV of the book highlighted considerations when conducting research on the model minority stereotype. Three chapters in this section of the book stand out in my mind: Grant Morgan and Kari Hodge's two chapters: "A Primer on Research

Validity for Conducting Quantitative Studies of the Model Minority Stereotype” and “Statistical Procedures for Addressing Research Fallacies Such as the Model Minority Stereotype” and Grant Morgan, Kari Hodge, and my chapter “An Asian American Subgroup Analysis of the Restricted-Use ELS: 2002 Dataset: Mixture Modeling as a Way to Problematize the Asian American ‘Model Minority’ Stereotype.” These chapters, collectively, shared statistical and methodological considerations for combatting the deleterious stereotype, something existing scholarship hadn’t explicitly done. The volume also centered what Wu (2016) mentioned in *The Color of Success*: that the field can be self-fulfilling in propping up—not problematizing—the stereotype.

Although Petersen was not really the sole progenitor of Asian Americans becoming America’s model minorities, he is treated as such. This special issue commemorates the unofficial 50-year anniversary of the model minority stereotype, as measured by Petersen’s (1966) *New York Times Magazine* publication. This special issue contains articles that add to model minority stereotype knowledge to be sure, but I also encourage readers of this issue to visit “The Model Minority Stereotype Project” (MMSP)² webpage, which I curate, for more resources on the subject.

According to Wu (2016), “For Asian Americans, then, the challenge has become how to live beyond the model minority, how to navigate the world day to day without being constrained by such expectations” (p. 255). I would add, as other scholars have (e.g., see Poon, Squire, Kodama, Byrd, & Chan, 2016), that while “opposing” the model minority stereotype is important, so too is identifying what it means to be an Asian American in a post-truth era marked by President Trump’s incessant use of the term “fake news.” The stakes are high for education in an era of disintegrating truths. It was Trump himself who said that he “loves the poorly educated.”³

Asian Americans are not passive people. The model minority stereotype didn’t develop only because journalists made them out to be models or exemplars. Although the model minority stereotype is fake, it’s been useful for those in power and even at times, some wealthier more privileged Asian Americans. The articles in this special issue are important, timely, and original. Collectively, the authors offer the field new material that can be used to propose and crystallize post-model minority futures for Asian Americans and society globally.

In closing, I’d like to publicly say that I am deeply appreciative of Dr. Wayne E. Wright who allowed me to guest edit this issue. Dr. Wright, it took a bit longer than planned, but thank you for your involvement in the process, and the support that it took to close out the project. Thanks go to Sung-ae Kim for typesetting the issue. I also would like to thank the reviewers who helped strengthen the articles. They are:

About the Editor

Nicholas D. Hartlep (Ph.D., University of Wisconsin, Milwaukee) is currently an Assistant Professor of Urban Education at Metropolitan State University, St. Paul, MN. In 2015 he received the University Research Initiative (URI) Award from Illinois State University and a Distinguished Young Alumni Award from Winona State University, which recognized him as a graduate who had distinguished himself in his work and community. In 2016 the University of Wisconsin-Milwaukee presented him with a Graduate of the Last Decade (GOLD) Award for his prolific amount of writing. Metropolitan State University presented him with the 2017 Community Engaged Scholarship Award for his practice of community-based teaching, learning, and research. Hartlep serves on the editorial boards of several journals and is lead editor of the “Urban Education Studies” book series with Information

Age Publishing. His scholarly books include *Going Public: Critical Race Theory & Issues of Social Justice* (2010), *The Model Minority Stereotype: Demystifying Asian American Success* (2013), *Unhooking from Whiteness: The Key to Dismantling Racism in the United States* (2013), *The Model Minority Stereotype Reader: Critical and Challenging Readings for the 21st Century* (2014), *Killing the Model Minority Stereotype: Asian American Counterstories and Complicity* (2015), *The Assault on Communities of Color: Exploring the Realities of Race-Based Violence* (2015 with Kenneth J. Fasching-Varner), *Modern Societal Impacts of the Model Minority Stereotype* (2015), *Critical Storytelling in Uncritical Times: Stories Disclosed in a Cultural Foundations of Education Course* (2015), and *Asian/American Curricular Epistemicide: From Being Excluded to Becoming a Model Minority* (2016 with Daisy Ball), and *Pay to Play: Race and the Perils of the College Sports Industrial Complex* (2017 with Lori L. Martin and Kenneth J. Fasching-Varner). He recently finished the edited book: *The Neoliberal Agenda and the Student Debt Crisis in U.S. Higher Education: Voices of Students and Faculty* (2017 with Lucille L. T. Eckrich and Brandon O. Hensley for Routledge).
