FORESTRY AND WILDLIFE AS A CAREER
A Selected List of Publications

Compiled by H. C. Krauch, Jr., Extension Wildlife Specialist

Increased numbers of high schools are participating in career guidance days or similar guidance programs. It has been noted on numerous occasions that little is known of prerequisite educational requirements for forestry and wildlife careers at both the professional and technician level.

The objective of this publication is to provide sources of information to assist guidance personnel and students in finding out more about these two fields at both levels.

Usually single copies are free and may be obtained by writing to the source as given; some are nominally priced.
