The Electronic Journals Library EZB: a successful model of international cooperation

Dr. Evelinde Hutzler
University Library Regensburg, Germany
Elektronische Zeitschriftenbibliothek (EZB) / Electronic Journals Library is a cooperative library service for the use of scholarly e-journals.

Developed and managed by the University Library Regensburg, Germany.

Funded by the German Research Foundation and Federal Ministry of Education and Research.

More than 500 EZB member libraries in Germany and 9 other European Countries.
EZB title content

• Over 40,000 e-journals
  - 20,000 full text journals are freely available

• Additionally about 50,000 full text journals in aggregator databases
EZB offers:

- Structured access to scholarly e-journals
- Freely available e-journals together with licensed ones under a standardized user interface
- Browsing in subject and alphabetical lists
- Search functions
- User information about access

EZB as Cooperative Library Service

- EZB as cooperatively organized service
  - Collaboration of all EZB members
  - EZB offers a technical infrastructure for collaboration:
    - EZB is based on a central database
    - EZB provides decentralized administration tools for adaptation to local requirements
Local access information for each EZB member

University Library Regensburg

Technical University Library Munich

Local access information for each EZB member
EZB Usage Statistics

2008: 22.4 million journal title accesses
Quality management by international Cooperation

• High quality of the EZB for the users:
  – The EZB is the world-wide largest database for academic and scholarly e-journals.
  – The journal data and access information are kept very up-to-date.
  – The utilisation of the EZB is easy and users can see at a glance if they can access the full text articles of the requested journal.
Quality management by international Cooperation

• EZB quality management:
  – Collaboration of the EZB member libraries
    • Common collection of the journal titles
    • Common maintenance of data of title entries
    • Common collection of freely available journals
  – User feedback
EZB linking service

• Networking of the EZB with other Digital Library services
  – EZB linking service with article linking based on the open URL technology
Connecting EZB and GEO-LEO

Access information for the article

The article you have chosen is accessible via an online subscription in your library. Please respect the terms of use.

Published in: Geophysical Journal International (2009) 1
Volume 176, Issue 3, p. 865

view full text

Help for access problems

direct link to the article full-text
EZB linking via Open URL

• EZB links to the full texts in e-journals on various levels
  – Article linking for 16,000 e-journals published by more than 40 publishers/supplier
  – Linking to issues, volumes or to the journal home page
Conclusion

- EZB as a successful model of international cooperation
  - rising number of member libraries
  - ongoing process of networking
Thank you for your attention!
