WHAT WE ASSUMED ...

General purpose of the SUW is to network share bibliographic information and full-text scientific and educational content, authored by university academic staff and students, i.e University Community.

The primary objective of creating the SUW system is to support the academic community, to create a *unified knowledge base* for the purposes of research and teaching (including e-learning) and development of scientific communication.

An additional element of the system will be an ability to exchange views, comments and observations on the shared materials.

The system is dedicated for all Internet users interested in exact, technical sciences.

Cracow University of Technology

The Library

"An old tradition and a new technology have converged to make possible an unprecedented public good. The old tradition is the willingness of scientists and scholars to publish the fruits of their research in scholarly journals without payment, for the sake of inquiry and knowledge."
