PROCEEDINGS OF THE
THIRTY-SECOND ANNUAL
ROAD SCHOOL

HELD AT
PURDUE UNIVERSITY
JANUARY 21-24, 1946

EXTENSION SERIES No. 61
THE ENGINEERING EXTENSION DEPARTMENT
PURDUE UNIVERSITY

Purdue University is a state institution bearing the name of John Purdue, a philanthropic and public-spirited citizen of Lafayette, Indiana, who aided in establishing it. It owes its origin to the Land-Grant Act passed by Congress in 1862, otherwise known as the Morrill Act, and to enactments made by the legislative body of Indiana in 1865 and 1869. It is maintained principally by state appropriations, supplemented by federal grants.

The University began its work in 1874. It now has over fifty principal buildings and controls over four thousand acres of land. Serving on its various staffs are approximately one thousand persons.

Undergraduate and graduate instruction is offered in Agriculture, Agricultural Engineering, Aeronautical Engineering, Air Transportation, Chemical and Metallurgical Engineering, Civil Engineering and Engineering Mechanics, Electrical Engineering, Mechanical Engineering, Public Service Engineering, Engineering-Law, Trade and Industrial Education, Home Economics, Pharmacy, and Science.

The University also maintains extensive experiment stations in engineering and agriculture, and carries on state-wide extension work in both these fields.
