

# Symposium on Management of Indiana County Roads in Relation to Future Community Development

*Editor's Note:* The general session on Tuesday afternoon, March 27, was devoted to a symposium on county road management. Speakers were selected to represent the viewpoints of the various segments of Indiana economy. This session was tape recorded and the following text was transcribed from the oral presentations of Messrs. Hillenbrand, Mounsey, Proctor, Harvey, Pike, Barbour, and Bitz.

We are happy to acknowledge the assistance of Dr. E. T. Weiler, dean of the School of Industrial Management at Purdue University, who served as presiding officer for this session. His skill and personal knowledge contributed much to the success of the symposium.
