been since the beginning. We're committed to providing the best on the eBook side, and that's where we're going to remain focused.

ATG: *You have a long history with eBooks, beginning with netLibrary, I believe. Do you use eBooks? What applications do you find the most useful?*

RR: I'm on the road quite a bit, so I really get the most advantage from our MyiLibrary Audio platform. I can download audiobooks to my iPhone and take them with me wherever I go. It's really convenient.

ATG: *I believe that the market for eBooks is currently very small, except perhaps in Asia and India. The number I have seen is 4-5% of the book market. Is this an accurate figure? Why is the uptake on eBooks so small?*

RR: Those numbers might even be inflated, depending on the source. eBooks are still a niche product in its infancy. Part of the reasoning is because there are so many formats and so much inconsistency among publishers as to the best way to protect and deliver eBooks. Until a standard is universally adopted, similar to the music business, it will remain a niche product. That said, there's still unprecedented growth and opportunity for those who are ready to jump on the bandwagon. The library market is actually one of the areas where there has been a major shift towards eBooks due to the simplicity and low cost to acquire, store, and distribute this type of content.

Rich Rosy

BORN & LIVED: Born in Chicago. I've had the opportunity to live in quite a few locations during my career, both in and out of the United States.

IN MY SPARE TIME: I love to play tennis and am an avid reader.

FAVORITE BOOKS: *Flatlands*, *Billy Bunter*, *Blandings*.

PET PEEVES/WHAT MAKES ME MAD: Overcomplexity and lousy signage and bad spelling.

PHILOSOPHY: Treat people as you would like to be treated. 🐼

ATG: *Will we ever have a standard format for an eBook or an eBook reader platform?*

RR: There is a huge opportunity for the entire industry if a standard can be reached. I don't believe we'll see a coming together anytime soon. However, it's inevitable that we'll eventually get to that point.

ATG: *Please look down the road and tell us what you see in libraries in, say, 10 years.*

RR: I think libraries will continue to evolve into a resource for all varieties of

content and information. As the world becomes more and more virtual, there will be a greater emphasis on making more and better digital content available regardless of format. Libraries will have more to say in the usage of devices and other delivery mechanisms. Library "customers" will demand it, whether public or academic, and the libraries who can make the transition sooner will be in the driver's seat. 🐼

Column Editor's Note: *I am never-endingly impressed with innovations in library instruction. The Library Instruction Cookbook, reviewed this month by ATG reviewer Joey van Arnhem, offers a myriad of ideas and suggestions for active learning in the library. How timely, given that the summer offers many librarians an opportunity to review and refresh lesson plans, class notes, and even syllabi.*

If The Library Instruction Cookbook whets your appetite, might I also suggest a number of pre-conferences and sessions being offered at the ALA Annual Conference?

The Library Instruction Cookbook is a great resource for anyone looking

for innovative ways to incorporate interactive, engaging learning in the many facets of library instruction. The book, edited by **Ryan Sittler** and **Douglas Cook**, is designed around the premise that "students learn best by being actively involved, rather than sitting and listening to Librarian-Speak for an hour." The editors selected "recipes" submitted by librarians worldwide that encompass many aspects of library instruction, with chapters including Library Orientation, Basic Library Skills, Citations and Plagiarism, Evaluating Resources, Specialized Research Skills, Discipline Related Research, and Technology.

Each activity, organized in easy-to-use recipes, concretely ties learning objectives to *ACRL Information Literacy Competency Standards for Higher Education*, addresses changing user expectations, and facilitates the
