Innovation in Collection Development

YBP Library Services' Integrated Electronic and Print Approval Plans

Enjoy the benefits of a single e-book and print approval plan, including comprehensive duplication control.

New Plan Highlights

- Provides libraries with titles in a timely manner, based on the first available format (electronic or print)
- Offers four types of approval plans all based on YBP's profiling methodology: e-preferred, print-preferred, e-only and print-only
- Electronic content available from three aggregator partners: EBL, ebrary and NetLibrary
- GOBI³ boasts an e-approval bookshelf where customers can manage e-books that match their library profile
- YBP and ebrary Academic Complete customers will benefit from the application of Academic Complete usage statistics
- YBP cataloging records are available, supplied at the same time as the e-books

For additional information, please contact your YBP representative at sales@ybp.com or visit our website at www.ybp.com

Launching in 2011

ACS Catalysis

EDITOR-IN-CHIEF: Christopher W. Jones

Georgia Institute of Technology

Covers heterogeneous, homogeneous, and biocatalysis as applied to organic chemistry, materials science, energy, environmental, and biological systems. *ACS Catalysis* will be a monthly online publication with articles ASAP published continuously.

Applications include life sciences, drug discovery and development, household products, polymer discovery & production, environmental protection, fuels & energy

How *ACS Catalysis* Will Serve Your Library's Patrons:

- *ACS Catalysis* fills a gap by providing a high-quality journal, focusing specifically on the broad range of catalysis-related subject matter. In fact, approximately 90% of all chemistry includes some form of catalysis.
- *ACS Catalysis* will serve the community forming around the new ACS Catalysis Science and Technology Division.

ACS has a legacy of producing top-tier journals at an exceptionally low cost to libraries. Contact your ACS Account Manager to subscribe.

For more information, go to www.acscatalysis.org

For a stronger, cleaner, fairer world economy

OECD Economic Outlook, Volume 2010 Issue 2

December 2010 | 978-92-64-08524-4 | 386 pp

The *OECD Economic Outlook* analyses the current economic situation and examines the economic policies required to foster a sustained recovery in member countries. Together with a wide range of cross-country statistics, the Outlook provides a unique tool to keep abreast of world economic developments.

OECD Economic Surveys

The OECD periodic reviews of Member countries' economies and selected non-member countries. Each issue provides a comprehensive analysis of developments in the subject country, along with extensive statistical information and individual chapters covering key economic challenges being faced and recommendations for dealing with the challenges. *OECD Economic Surveys* are reference tools for governments, businesses, academics and NGOs.

Taxation, Innovation and the Environment

October 2010 | 978-92-64-08762-0 | 252 pp

OECD governments are increasingly using environmentally related taxes because they are typically one of the most effective policy tools available. By putting a price on pollution, do environmentally related taxes spur innovation? What types of innovation result? Does the design of the tax play a critical role? What is the effect of this innovation?

In analysing these questions, this report draws on case studies that cover Japan, Korea, Spain, Sweden, Switzerland, the United Kingdom, Israel and others. It covers a wide set of environmental issues and technologies, as well as the economic and policy contexts.

Optics InfoBase— One Resource Serving Multiple Disciplines

More libraries each year realize the boundary-breaking advantages of **Optics InfoBase**, OSA's digital library. Now you can provide readers across your institution with instant access to more than 185,000 high-impact peer-reviewed papers in optics and photonics.

www.opticsinfobase.org

OSA[®]

Relevant.

- Cutting-edge research is facilitated with rapid publication times and our Early Posting pre-publication service

Multidisciplinary.

- Connect readers across departments and domains: biology, chemistry, physics, mechanical engineering, electrical engineering, biomedicine, materials science and more

Authoritative.

- Bring your patrons the best: Optics InfoBase is entirely peer-reviewed, and includes many journals with the highest impact factors in the ISI optics category

Reputable.

- Rely on content from OSA, one of the oldest publishers of physics journals in the world

OPTICS INFOBASE FEATURES:

Advances in Optics and Photonics, Applied Optics, Applied Spectroscopy, Biomedical Optics Express (New in 2010), Chinese Optics Letters, Journal of Display Technology, Journal of Lightwave Technology, Journal of Optical Communications and Networking, Journal of Optical Technology, Journal of the Optical Society of America A and B, Journal of the Optical Society of Korea, Optics & Photonics News, Optics Express, Optics Letters, plus more than 310 conference proceedings and digests.

Cold Spring Harbor Perspectives in Biology

The Authoritative View

NEW!

www.cshperspectives.org

A New Type of Review Journal

Cold Spring Harbor Laboratory Press announces the launch of a new monthly online publication, *Cold Spring Harbor Perspectives in Biology*. Spanning the complete spectrum of the molecular life sciences, the journal offers article collections that comprehensively survey topics in molecular, cell, and developmental biology, genetics, neuroscience, immunology, cancer biology, and molecular pathology. Written by leading researchers and commissioned by an eminent board of editors, subject collections grow with every issue of the journal. *Cold Spring Harbor Perspectives in Biology* is thus unmatched in its depth of coverage and represents an essential source for informed surveys and critical discussion of advances in emerging areas of biology.

Scope: Molecular Biology, Cell Biology, Developmental Biology, Genetics, Immunology, Neurobiology

Monthly, online

ISSN: 1943-0264

Subject Coverage

Angiogenesis	The Extracellular Matrix	Mechanotransduction	Prokaryote Cell Biology
Antigen Processing	The Endoplasmic Reticulum	Membrane Fusion and Exocytosis	Protein Homeostasis
Apoptosis	The Evolution of Gene Networks	Mitochondria	Receptor Tyrosine Kinases
Auxin Signaling	Generation and Interpretation of Morphogen Gradients	Mitosis	Recombination Mechanisms
Axonal Guidance	Germ Cells	Molecular Motors	Regeneration
The Biology of Cardiovascular Disease	The Golgi Apparatus	Muscle Cell Biology	RNA Worlds
The Biology of Schizophrenia	Growth Factor Receptors	The NF- κ B Family	Sex Determination
Calcium Signaling	Immune Cell Signaling	Nuclear Hormone Receptors	Symmetry Breaking in Biology
Cell-Cell Junctions	Immune Tolerance	The Nucleus	Synapses
Cilia and Flagella	Lipid Cell Biology	The Origin of Life	Transcriptional Regulation
The Cytoskeleton	Lymphocyte Cell Biology	The p53 Family	Wnt Signaling
DNA Damage and Repair	Mammary Gland Biology	Prions	The Y Chromosome

LIBRARY INFORMATION SCIENCE

Developing Sustainable Digital Libraries: Socio-Technical Perspectives

Tariq Ashraf (University of Delhi, India), et al.

Developing Sustainable Digital Libraries: Socio-Technical Perspectives presents a compilation of articles discussing the benefits and challenges of digital information and library digitization. Scholars from around the globe investigate Web application development, techniques for digital conversion, composition of digital libraries, digital environments, and much more. This reference work proves valuable to the study and enhancement of digital information systems and technologies, and in assisting practitioners in the implementation and building of such systems and applications.

At the Intersection of Research and Critical Thinking: the Databases of ABC-CLIO

ABC-CLIO's portfolio of history, humanities, and geography research and reference databases combines essential reference, innovative teaching tools, and 21st century challenges for critical thinking. The databases of ABC-CLIO connect your library to the classroom, curriculum, and students in important, innovative new ways.

Content Excellence

Start student research projects with authoritative, curriculum-aligned, reference content... all updated continually. Audio, video, maps, primary sources, images, graphs, and more support academically rigorous research.

Context at a Higher Level

"Explore" organizes resources into curriculum-aligned topics. Each includes materials and connections for further research along with teacher tools, making them effective core or supplemental resources.

Critical Thinking for Understanding

In "Analyze," leading scholars debate key topics. It's a powerful way to integrate basic research strategies, critical thinking, and the communications skills to craft compelling support for ideas and perspectives.

SIAM launches e-books

Available January 2011

siame-books

Beginning in 2011 libraries and institutions around the world will be able to offer SIAM books electronically.

Work has begun to make all of SIAM's more than 400 book titles available.

SIAM will offer institutions two e-book options.

The purchase option (\$12,400 for nonmember institutions; \$9,920 for SIAM academic members) will grant perpetual access to the complete collection. An annual subscription in following years will add access to newly published titles.

The subscription option (\$1,595 per year for nonmember institutions; \$1,276 per year for academic members) will give access to all SIAM books annually.

Institutions that sign on early will save money.

To get the SIAM e-book program started on a money-saving note, all subscribers and purchasers through June 30, 2011 will receive a 20% discount off the prices shown above.

Users will enjoy the convenient format and cross-searching across SIAM books and journals.

All book titles will be offered in PDF format, viewable by chapter. The books will be hosted on the AIP/Scitation platform where our journals reside, allowing convenient cross-searching of both books and journals by readers and researchers.

More than 200 SIAM books will be available at launch.

When the program launches in January, SIAM expects that about half of its books will be included; the remaining titles will be added shortly thereafter. All new books published in 2011 and after will be published in electronic format as well as print. Institutions that purchase the collection will receive access to all backlist e-books as they are made available.

Discover SIAM e-books: the leading edge in applied mathematics.

For more than five decades, SIAM has published books written by renowned experts addressing all facets of applied mathematics and computational science. Now these books will be more widely accessible to readers and researchers via the new SIAM e-book program. Purchase or subscribe today!

"Librarians are accustomed to owning books, and to some extent this has carried over to the e-book arena," notes SIAM publisher David Marshall.

"Accordingly, we want to be able to offer institutions the option to purchase or subscribe to our e-book collection.

Some will want to have perpetual access to our collection; others will want to purchase a more moderately priced subscription."

A New Journal from the Publisher of *Science*

Science Translational Medicine

ScienceTranslationalMedicine.org

Focusing on personalized diagnosis and treatment

"There is an increasing recognition that classical medical diagnoses—prostate cancer, diabetes, atherosclerosis—hide the true heterogeneity of these diseases from patient to patient. Once we can study subgroups of similar patients, the strength of our experimental results will increase and development costs will decrease."

Chief Scientific Adviser,
Elias A. Zerhouni, M.D.

Despite 50 years of advances in our fundamental understanding of human biology and the emergence of powerful new technologies, the rapid transformation of this knowledge into effective health measures is not keeping pace with the challenges of global health care.

Science Translational Medicine provides a forum for interdisciplinary idea exchange between basic scientists and clinical researchers to help advance the discovery of cures and improve patient care worldwide.

Special subscription discounts for institutions available now!

Continuations and Standing Orders

Preface

Continuations and standing orders represent a frustrating and time-consuming area of book acquisitions. Efficient management of continuations requires a staff knowledgeable in all aspects of standing order procedures, with prompt and accurate service being essential.

Midwest Library Service has been providing continuation and standing order programs to libraries for over three decades with the same commitment to high quality as our firm order service: prompt delivery, accurate invoicing, immediate reporting, convenient communications, and personal Library Service Representatives. Our reputation for excellence is well established and we invite you to place your continuations list with us.

Scope

Our Continuation & Standing Order Service encompasses most series and continuations from U.S. publishers. Our services do **not** include supplying magazines, journals, or loose-leaf updating services.

Procedure

Our Continuation & Standing Order Service incorporates both automated systems and personal surveillance. Instead of relying on the filing and ordering systems of the publishers, we place orders for specific volumes as books are due to be published. If the next item in a series is not received when scheduled, we initiate a new order for the same item. This procedure helps avoid potentially missed volumes and eliminates any dependence upon the publishers' fulfillment systems. If in-house information is not available on future volumes to be published, we call the publisher for future projections and publication schedules. This information is then used to update our new title records.

Advantages

1. Because of our method of ordering specific volumes, we are in regular communication with the publishers.
2. Our status reports are prompt and accurate and should eliminate library claims.
3. Specific claims from an individual library resulting in an updated status report will generate new status reports to all libraries ordering the same series.
4. We do not drop ship.

Quality service depends on good communications between the library and the jobber. Your personal Library Service Representative and our convenient communications provide easy access to us regarding your continuation orders. We invite you to try our service by sending us your next list of standing order titles.
