Cities and Climate Change

January 2011 | 978-9264-06366-2 | 276 pp

Cities and Climate Change reveals the importance of addressing climate change across all levels of government. It analyzes trends in urbanization, economic growth, energy use and climate change; the economic benefits of climate action; the role of urban policies in reducing energy demand, frameworks for multilevel governance of climate change including engagement with relevant stakeholders, and the contribution of cities to “green growth” in terms of the “greening” of fiscal policies, innovation and jobs. It explores policy tools and best practices from both OECD and some non-member countries.

Southeast Asian Economic Outlook 2010

January 2011 | 978-9264-09599-1 | 194 pp

The global financial crisis has offered an important opportunity for Southeast Asian countries to rethink past growth strategies and project new development visions. This inaugural edition of the *Southeast Asian Economic Outlook* looks at current efforts to rebalance growth for the region and at what form growth will take in the future.

The 2010 *Outlook* also addresses the fact that the future development of Southeast Asian countries is likely to be uneven across sectors and economies, unless necessary measures are taken. Sectors of new growth in the region will need to be supported by going beyond the current narrow range of electronic products and developing more niche and speciality products that are priorities of the Association of Southeast Asian Nations.

Health at a Glance: Asia/Pacific

December 2010 | 978-9264-09618-9 | 91 pp

This first edition of *Health at a Glance: Asia/Pacific* presents a set of key indicators of health status, the determinants of health, health care resources and utilisation, and health care expenditure and financing across 27 Asia/Pacific countries and economies in the Asia/Pacific region.

AIP Advances

A new, rapid-publication journal
for the physical sciences

Advance your reputation—advance your career

AIP Advances (aipadvances.aip.org) is a new open access journal, just launched by the American Institute of Physics. Focusing on research in applied physical science, it uses the latest technology to help your work stand out, putting it at the heart of conversations taking place in science today.

Authors of accepted manuscripts pay a processing fee to make their work freely available and articles are published under a Creative Commons license, ensuring that authors retain copyright to their work. Peer review is overseen by a prestigious team of Editors—including Vincent H. Crespi, A. T. Charlie Johnson, Enge Wang, Robert H. Austin, and Masaaki Tanaka.

AIP Advances offers:

- Rapid publication and an accelerated peer review process
- An innovative system of post-publication evaluation by your peers
- Hosting on AIP's Scitation platform to make your work easily discoverable
- Free, permanent, worldwide access to your article
- Worldwide media coverage of top work

Hard-to-Obtain Books?

Midwest Library Service

Won't Take "No" For An Answer

Publisher buyouts, takeovers, mergers, and distribution changes all have contributed to an industry-wide dysfunction affecting book **order fulfillment**. Inadequate fulfillment is especially felt by the librarians who bear ultimate responsibility for meeting patron demand.

At Midwest, we realize that **accurate and timely** order fulfillment is the benchmark service by which vendors (and librarians) are judged. We do not accept an out-of-print or out-of-stock notice from a US publisher as final proof that the book is not available, having found that inventory is often available in the UK and elsewhere.

By taking the time and effort to research these titles, Midwest has a **superior level of success** in supplying them. Some trade jobbers will often simply relay the publisher's report and cancel such titles.

We do not accept publishers' OP, NOP, and TOS reports without further research to determine their validity. Our **research specialists** are dedicated to locating hard-to-obtain titles.

By diligent research we are able to **locate many book orders** that would otherwise be lost due to publishers' bad reports, inadequate research, or database dead-ends. Our researchers take over the hunt for titles where computers leave off. We will not cancel an order until we determine that a book is truly unavailable.

Contact Midwest and watch your fulfillment level and patron satisfaction improve!
