This document has been made available through Purdue e-Pubs, a service of the Purdue University Libraries. Please contact epubs@purdue.edu for additional information.

tioned earlier, it is our goal to give librarians what they need in light of their shrinking budgets. We want to accommodate them as much as possible. Again, we began releasing Topic Collections and Subject Subscription Packages that include a targeted selection of books or journals on key areas and at a reduced cost to buy as a set.

ATG: *How do you see the growing availability of open access resources impacting IGI Global? Have you noticed any effects so far? Do you still offer electronic access to your title free-of-charge for those who purchase the print as a response to the issues raised by open access?*

MK-P: Knowing the volume of research carried out by researchers worldwide, open access is a natural phenomena. **IGI Global** has always embraced this movement and views it as one more way of sharing research findings. We have a strong partnership with the **Information Resources Management Association (IRMA)**, a professional association offering nearly 2,000 documents from previously-published research free-of-charge. Unlike other publishers that redirect the cost of publishing to researchers or institutions, we help with such contributions. From April to October 2012, **IGI Global** will be adding more than 750 previously-published articles and chapters to the **IRMA** research community free-of-charge, and is planning even more initiatives for 2013. To learn more about **IRMA**, I would encourage readers to visit www.irma-international.org.

In terms of any effects of open access on **IGI Global**, in general, we haven't noticed any effects of the open access movement on our business due to the fact that we never viewed open access as a threat, but rather a complement to the current publishing industry.

In regard to offering complimentary electronic access to libraries when they purchase **IGI Global** print books, we still offer complimentary access, but we've made some adjustments to the program in order to address the recent needs of our library customers.

ATG: *When we spoke to you a few years ago, you said that you "had trouble with the prediction that within the next ten years everything will be in electronic format. The truth of the matter*
