As the age of Big Data emerges, it becomes necessary to take the five dimensions of Big Data—volume, variety, velocity, volatility, and veracity—and focus these dimensions towards one critical emphasis—value. The Encyclopedia of Business Analytics and Optimization confronts the challenges of information retrieval in the age of Big Data by exploring recent advances in the areas of knowledge management, data visualization, interdisciplinary communication, and others. Through its critical approach and practical application, this book will be a must-have reference for any professional, leader, analyst, or manager interested in making the most of the knowledge resources at their disposal.
