Trends in Health Sciences and Biomedical Sciences Information and Services Provision

by Ramune K. Kubilius (Collection Development / Special Projects Librarian, Northwestern University, Galter Health Sciences Library) <r-kubilius@northwestern.edu>

The overarching title for this Against the Grain (ATG) special issue builds on the titles used for the Nov. 2008 and Dec. 2011-Jan. 2012 special issues. Adding the concept of “services” to this special issue’s title serves as a reminder that “if you build it,” they (users) will not necessarily come (paraphrasing a phrase voiced in the movie, *Field of Dreams*). “Services,” as used in this context, incorporate the necessary activities of marketing, training, partnering, and collaborating. This ATG special issue includes seven contributions by experienced authors who share insights and their own experiences. They address current trends and opportunities addressed or undertaken by those who work with persons involved in the triad of patient care, education, and research, and beyond. Hopefully, all of the articles will have elements that resonate with ATG readers or pique their interest.

Without a doubt, those who work in the health and biomedical sciences information sector are familiar with phrases such as “global health” or “one health.” The second was selected as the theme of the historic 2013 annual meeting of the Medical Library Association (MLA) and its partners in Boston, MA. The National Program Committee (NPC) worked for three years to create a federated international meeting incorporating the 2013 Annual Meeting and Exhibition of MLA, the 11th International Congress on Medical Librarianship (ICML), the 7th International Conference of Animal Health Information Specialists (ICAHIS), and the 6th International Clinical Librarian Conference (ICLC). The onsite report of the 2013 meeting recorded representatives from 46 countries. In the 2011/2012 special issue of ATG, staff from the U.S. National Library of Medicine (NLM) shared examples of information innovation, often with a global focus. Although most librarians are not qualified to offer clinical medical assistance in global health initiatives or after international disasters, there are other ways for librarians to act globally, by participating in the initiatives of NLM, their institutions, or their professional associations. Many health sciences librarians belong to the MLA, a professional association that has never focused on only one country. The International Cooperation Section of MLA celebrates its 25th anniversary in 2014. As T. Mark Hodges wrote in the section history posted in the MLA Website, (http://www.mlanet.org/archive/history/uni-history/international.html), “…although ICS was only founded in 1989, its antecedents go back to the earliest years of the association and are an integral part of the history of the section. From the outset, the MLA has had an interna-

If Rumors Were Horses

The wonderfully cheerful Eileen Lawrence (have you ever seen her frown?) tells us that her hard-working colleague Jenni Wilson has left Alexander Street Press for a new career adventure. They have begun the hiring process. In the meantime, Mary Siegel will be handling Jenni’s accounts, <siegel@alexanderstreet.com> or 800-889-5937 ext. 903. The position is posted at: http://alexanderstreet.com/careers/regional-sales-manager-us, and information about working at Alexander Street Press is at http://alexanderstreet.com/careers.

Heard from Hendrik Edelman the other day. He was in Florida for a funeral and then popped in to Charleston for the Family Circle Cup, the big tennis match on Daniel Island. I did not see Hendrik unfortunately but he was in touch with Julie Arneheim who as we all know is living in Charleston and lives on Pitt Street behind the Addlestone Library and working with yours truly. Hendrik says they enjoyed the tournament and the weather so much that they plan to return. Maybe we will hook up next year?
From Your (reading to my recovering husband) Editor:

One reason I haven’t retired is that I can’t figure out what I would do with all my time. But I now know, I can go to nursing school. I know there is a shortage! Have been spending some time in hospitals and there are many great role models. But when I wasn’t reading, I was pursuing the occupation of editing Against the Grain. This is easy when you have a guest editor like Mark Herring when I wasn’t reading, I was pursuing the and there are many great role models. But it’s now finally time for a break after the hot Charleston summer. But I have been playing nursemaid, taking care of my husband who had an operation a few weeks ago. I have been running errands, cooking and cleaning.

Had planned to go to the 16th Fiesole Retreat in Cambridge England but the doctor called instead. The Retreat has just ended and what a spectacular event it was. The weather in Cambridge was delightful and so were the presentations. Watch for them shortly on the Casalini Website www.casalini.it.

Speaking of the Fiesole Retreats and Cambridge. Our second Retreat was in Oxford (2000). An Oxford name from the past! Philip Blackwell is now CEO of Solum Group Plc. Memories... Philip trained as a bookseller and publisher before completing an MBA at London Business School in 1996. After four years as a strategy consultant with Cap Gemini, he became chief executive officer of Blackwell Limited in 2000 until 2006. In 2002 he became a director of Blackwell Publishing (Holdings) Limited until its sale for approximately £572 million in 2007. Mr Blackwell is a former member of the Bodleian Library Development Board and the Google publisher content advisory board, and is a trustee of the Royal Green Jackets Museum in Winchester. As we all know, the Blackwell family has owned rare and antiquarian book-dealing businesses for over 100 years. Read many of Rita Rickert’s tales of the Blackwell businesses in Against the Grain. https://www.linkedin.com/

The NASIG Executive Board has appointed the energetic Angela Dresselhaus editor of the NASIG Proceedings. Angela is Acquisitions and Electronic Resources Librarian, University of Montana, Missoula. She is an active member of NASIG and NASIG newsletter editor-in-chief.

The Association for Library Collections & Technical Services (ALCTS) has named the industrious, energetic, and awesome Patrick Carr, assistant director for acquisitions & collection management, Joyner Library at the East Carolina University, Greenville, N.C., the winner of the 2014 Esther J. Piercy Award. The award will be presented on Saturday, June 28, at the ALCTS Awards Ceremony during the 2014 American Library Association (ALA) Annual Conference in Las Vegas. The Esther J. Piercy Award was established by ALCTS in 1968 in memory of Esther J. Piercy, editor of Journal of Cataloging and Classification from 1950 to 1956 and of Library Resources & Technical Services from 1957 to 1967. The Piercy Award recognizes the contributions to those areas of librarianship included in library collections and technical services by a librarian with no more than ten

Letters to the Editor

Send letters to <kstrauch@comcast.net>, phone or fax 843-723-3536, or snail mail: Against the Grain, MSC 98, The Citadel, Charleston, SC 29409. You can also send a letter to the editor from the ATG Homepage at http://www.against-the-grain.com.

Dear Editor:

Re: Nancy Herther article on the ATG NewsChannel (http://www.against-the-grain.com/2014/03/newsflash-celebrating-10-years-scopus-announces-major-archival-expansion-program/)

Many congratulations to Nancy Herther on putting together such an informative article. These are very exciting times to be around in publishing, and I look forward to a future opportunity to bring the challenging work of the SCOPUS Content Advisory Board to a wider audience through your ATG NewsChannel newsletter.

With Best Wishes,

David Rew, TD MA MChir FRCS Consultant, Surgeon University Hospital of Southampton <DavidRew.rew@soton.ac.uk>

Rumors from page 1

The weather has finally gotten reasonable in Charleston after three months of nothing but cold rain and clouds, no sun. It’s now finally time for a break after the hot Charleston summer. But I have been playing nursemaid, taking care of my husband who had an operation a few weeks ago. I have been running errands, cooking and cleaning.

**AH, THE POIGNANCY OF MIDWEST YEARNINGS**
by Bruce Strauch (The Citadel)

Here’s some good old stand-bys about the Midwest. (1) Theodore Dreiser, *Sister Carrie* (1900) (Carrie takes to the Chicago stage; becomes rich and famous; all her lovers end up in the gutter); (2) Sinclair Lewis, *Main Street* (1920) (desperate for culture in Gopher Prairie); (3) F. Scott Fitzgerald, *This Side of Paradise* (1920) (not sure how this one quite fits, other than Fitzgerald being Midwestern and filled with yearnings to be rich); (4) Booth Tarkington, *Alice Adams* (1921) (desperation to escape middle class-dom); *Jetta Carleton, Moonflower Vine* (1962) (a four-women-go-out-in-the-world novel; 1962 bestseller often compared to *Little Women*).

(Diane is, of course, the author of the marvelous “Le Divorce,” and “The Marriage,” in which she captures all the subtleties of the French. Her new book is *Flyover Lives: A Memoir.*)

**WHITHER WARNER MUSIC?**
by Bruce Strauch (The Citadel)

Leonard “Don’t call me an Oligarch” Blavatnik was born in Odessa, immigrated with his family to NY aged 21 in the ’70s when Jews were allowed to leave the Soviet Union. He did *Columbia* and *Harvard* B-School. When Russia began selling off state industries, he bought into aluminum manufacturing, mixed it up with the crime groups, sued and was sued by partners, survived, and is now billionaire rich.

He lives in a £41 million mansion on Kensington Palace Gardens, lunches with Lord Weidenfeld, shmoozes with the Clintons. Gave £117 million for a Blavatnik School of Government at Oxford; gave $50 million to Harvard.

In 2011, he bought *Warner Music* for $3.3 billion. It’s said he bought it not out of a love for music but for social cachet. The execs were shocked by his tastes which run to *Fiddler on the Roof.* Blavatnik got rid of the wild overcompensation to exes, making them take dividends from increased value in the company.

The coke-fueled heady days of the ’70s music biz are gone. Doomsters talk about the “CD cliff,” the point when CDs vanish from retail. Listeners don’t want to pay for streaming subscriptions.

Blavatnik seems to see Warner as a real estate buy rather than media-and-entertainment. He’ll profit from the gigantic catalogue of recordings dating to the ’60s.

**MEMORY LANE ROCK**
by Bruce Strauch (The Citadel)

One of the forgotten giants of early rock was Jerome Feldman AKA Doc Pomus. Born in 1925, crippled from age 7 by polio, he spent his early years in an iron lung and casts and fell in love with music. At 17, he staggered into a Greenwich Village club on crutches and in leg braces, announced he was a blues singer. He was given a $40-a-week gig and went on from there to write and record 50 blues numbers in the 1950s for *Atlantic*.

“Save the Last Dance for Me,” *This Magic Moment,* “Little Sister,” “Can’t Get Used to Losing You,” and “Teenager in Love” were among his greats.

Business fell off in the ’60s when rockers started writing their own music. Then he was hit by a wrecked marriage and big back taxes owed.

In the ’70s and ’80s he staged a comeback, collaborating with B.B. King, Dr. John, and Bob Dylan.

Speaking of *Against the Grain,* in the current print issue Ramune Kubilius has done her usual thorough job of updating us on the state of the medical library community. There is a whole lot of library rethinking going on which is necessary in this environment that we find ourselves in, and this issue focuses on the medical library community. I was especially fascinated by Elizabeth Lorbeer’s article about being a library director of “nothing” and making it into something that is viable — building an opening day collection for a virtual health science library. The school received over 3,570 applications for 50 spots in the first class which begins August 2014. Elizabeth says that there is no physical space for print material but an adjoining information commons allows students to pass through easily between lecture hall and the learning community. See this issue, p.36.

continued on page 18
For the past two years, all workshops have included a cross-program training module titled “Research4Life Programmes: Similarities and Differences.” The HINARI, AGORA, and OARE Web interfaces are reviewed, as are the different databases and search tools. This is most useful for participants from universities where there is access to multiple Research4Life programs. By the end of 2014, all the programs will have the same search tool (SUMMON) and this will increase the similarities among the programs. Also, during the past year, the HINARI training staff has developed better tools to evaluate the impact of training besides the post-workshop surveys that are now used. This includes evaluating pre- and post-workshop usage of the HINARI resources and sending an “outputs” survey six months after a workshop is concluded.

Challenges

Some challenges for the e-library training program have been Internet and Wi-Fi access and the availability of laptops. The speed of Internet access has slowly but surely increased in many countries although bandwidth and minutes still can be expensive. For example, in Sub-Saharan Africa, the increase often is the result of access via cables strung to East and West Africa with less reliance on satellite links. Also, the eligible institutions have increased bandwidth as there is a better understanding of the potential of the Internet as a source of academic and research information.

Approximately three years ago, participants began bringing laptops to workshops. In most cases, the host institutions have also added Wi-Fi access. Consequently, participants can bookmark Internet links and save files directly to their laptops. Also, bibliographic management software such as Zotero or Mendeley can be downloaded directly onto these laptops.

Finally, a continuing challenge is to maintain funding for the program. We hope to continue to work with the Elsevier Foundation and several other partners to continue this very valuable program.

Conclusion

The MLA/Librarians Without Borders e-library training initiative has successfully worked for the past six years in partnership with a variety of other organizations to train health and health-related professionals, including librarians, to effectively access and use health-related databases. The program has also trained U.S. health sciences librarians to be trainers of their international colleagues. This global outreach project has not only renewed MLA’s historic international commitment to assist people anywhere in the world, but in a practical sense has demonstrated a consistent ability to work with a diverse group of individuals and funding organizations to build in-country capacity for improved health of all participants.

PROFESSIONAL CAREER AND ACTIVITIES: Coordinator of the MLA/LWB e-library training initiative since 2006. The project’s principal activities are conducting workshops and the developing/updating training material for HINARI (www.who.int/hinari) — a collaborative WHO and Partner Publishers project for access to 11,400 health e-journals, 18,500 eBooks, and 70 other institutions resources for institutions in low-income countries. Since 2007, I have conducted 51 workshops in 29 countries and developed more than 20 training modules. I also update the training material for the Research4Life and am the compiler of the “Essential Health Links” gateway that contains over 800 annotated links for health professionals in low-income countries (www.healthnet.org/essential-links). A University of Florida emeritus librarian, I have worked with libraries and health information professionals in low-income countries since 1990, concentrating on the delivery of electronic information, (www.research4life.org/) partner programs in agriculture research and environmental research.

HOW/WHERE DO I SEE THE INDUSTRY IN FIVE YEARS: Maybe I should address where I think the Research4Life programs will be in five years. Currently, the Research4Life partner publishers are committed to the project through 2019. These publishers will need to renew their commitment for the activities to continue. The programs regularly add content as more publishers participate. The mix of countries and territories eligible for the RAL programs will continue to change as some will graduate while others may go up or down in category (free access vs. low-cost access). The platform for all the programs also will continue to evolve as currently a new authentication system is being installed and the Summon search engine is being piloted. Each technological change should result in enhancements to accessing the resources.

Endnotes

Rumors

Speaking of which, one of the books reviewed in this issue is Reinventing the Library for Online Education by Frederick Stielow. See this issue, p.44.

Reinventing the library operation(s) is being explored everywhere we turn. The work that Outsell is doing to survey the information industry gives us a longitudinal snapshot of our end users. In this issue, we have a look at Outsell’s End-User Study of Faculty and Students. Interesting that faculty are more loyal to print than expected and both faculty and students find digital textbooks more difficult to work with than with their print counterparts. See this fascinating summary, this issue, p.90.

continued on page 22
ant part of the collection. Our history information is not only about the books physicians used at the time they were practicing, but it also contains information about the history of medicine, history of obstetrics and gynecology, biographical or historical information on famous obstetricians, gynecologists, and other famous figures, as well as the histories of some medical schools.

**Museum** — The History Museum is the visual history of obstetrics and gynecology. You can find a display on forceps, destructive instruments, pelvimeters, sounds, pessaries, kegel meters, vibrators, models, IUDs (including the Dalkon shield), birth control pills (from the very complex to the very simple), condoms, and medicines of many types.

**Publications Support** — Resource Center staff provide publication assistance to College staff by verifying the references that are used in our publications. Often we find that a reference has been replaced by something newer or is rather questionable and should not be used. We provide alternatives if necessary. Staff attend committee meetings and often are asked for input as to what kind of questions we get from members and consumers that would be relevant for guideline development.

**Website** — The Resource Center maintains its section of the College Website and often provides information to other staff about a broken link or the need to update a page. We provide the “coding” for the documents to Web services staff to use to provide access to the documents on the Web page.

**Conclusion**

Many health association libraries are an integral part of their organizations. They provide traditional and non-traditional services not only to the organizational staff, but to members and non-members as well. The Medical Library Association’s Health Association Libraries Section provides members with feedback on how other societies may be handling a specific need within their organization. We like to help each other evolve and grow as librarians and libraries. Without each other we would not be able to learn adaptive techniques, fulfill the needs of our organization, and thrive.

for Google. For intellectual property, not so much. For small- to medium-sized publishers, again, not at all. For discovery of materials, yes and no. Yes, because they can be found; no, because they are likely to be lifted, for free, or you’ll get a snooty email asking why you’re a stinking, dirty, money-grubbing capitalist. (And for your information, all those billionaires in Silicon Valley are not capitalists; they just got rich quick, that’s all!)

In a sense, we all work for Google now, free of charge. I suppose that fits since we all now attend the “University of Google,” right? 😊

You Gotta Go to School for That? from page 41

I want to spend the time and money to travel somewhere just to “screen” films when I can do it from the comfort of my office computer screen? This experience at the National Media Market answered that question for me.

I suppose I’m making a case for the film “experience.” I’m trying to say that viewing a few seconds of a film from one’s desktop is not really “screening” a film. The fact is that randomly reviewing films from my desktop cannot hold a candle to sitting in a screening room with an audience and getting the full film experience. There really is a big difference between watching a film, even a trailer, and experiencing a film in its natural environment on the big screen with a big audience.

Of course we often have to make buying decisions based solely on reviews or the few minutes we can give to online trailers. So, yes, one can get an idea of the worth or appropriateness of a film title by a quick desktop trailer. We have to do that most of the time. But, I posit that we media librarians (dare I say “film” librarians?) cannot fully grasp the medium we cherish, promote, and nourish without being regularly washed in the real/reel thing upon occasion. Just as one cannot live on fast food alone, one should spend at least one week a year savoring a full film meal at the National Media Market. Next year it is in Charleston again just ahead of the Charleston Conference. Certainly, this is yet, another reason to come to Charleston early.

Rumors from page 22

Speaking of the Charleston Conference, the Call for Preconferences at the 2014 Charleston Conference is out. And the Call for Papers opens tomorrow! Get on the stick! Time’s a wastin’! http://www.katina.info/conference/call-2014-preconferences-now-open/ and http://www.katina.info/participate/call-for-papers/

The 2014 Charleston Conference program is shaping up! We can let everybody in on a few things.

First, the fantastic Anthea C. Stratigos will be our main keynote speaker. We mentioned Outsell’s End-User Study of Faculty and Students above in this issue. Ms. Stratigos is co-founder and CEO of Outsell, Inc. (founded in 1994), a leading research and advisory firm that focuses exclusively on the information and publishing industries, providing analysis and recommendations for high-level executives regarding markets, trends, benchmarks and best practices. Anthea is Outsell’s primary spokesperson, and chairs Outsell’s Leadership Council, a member-service for CEOs and senior executives of publishing and information-provider firms. Ms. Stratigos holds a B.S. degree in Communication from Stanford University (1983) and graduated from the Executive
drawn from the disciplines of social psychology, sociology, history, business, political science, cultural anthropology, moral philosophy, theology, law, family studies, … and more. From the “little white lie,” to lying on a resume, to the grandiose lies of presidents, this two-volume reference explores the phenomenon of lying in a multidisciplinary context to elucidate this common aspect of our daily lives.”

ABC-CLIO is also publishing a couple of new sets in April.

- Famous Assassinations in World History: An Encyclopedia (978-1-61069-285-4, $189) is edited by Michael Newton and provides “complete and up-to-date coverage of assassinations of key figures throughout history and around the world… Each entry identifies the assassination target and summarizes that person’s significance; discusses the person’s assassination, including the factors that led up to it and its political and cultural contexts; and explains the powerful effects of the assassination in world history… . In addition, 23 primary source documents provide accounts of assassinations throughout world history.”

- Muhammad in History, Thought, and Culture: An Encyclopedia of the Prophet of God (978-1-61069-177-2, $189) Editors Coeli Fitzpatrick and Adam Hani Walker, offer readers “more than 200 A-Z entries” that “summarize views of Muhammad from the earliest editors of the Qur’an to contemporary Muslim theologians” and “explores the traditions, ceremonies, and beliefs of Islam as they have spread worldwide, and examines Muhammad’s role in other religious traditions as well as the secular world.”

IGI Global has recently added one new title to their reference list.

- Encyclopedia of Business Analytics and Optimization (9781466652026, $2560) is a five-volume set edited by John Wang that looks at the “challenges of information retrieval in the age of Big Data by exploring recent advances in the areas of knowledge management, data visualization, interdisciplinary communication, and others. Through its critical approach and practical application, this book is … for the professional, leader, analyst, or manager interested in making the most of the knowledge resources at their disposal.”

Wiley has also added a new reference to their list.

- The Wiley-Blackwell Encyclopedia of Health, Illness, Behavior and Society (978-1-4443-3076-2, $795) is co-edited by William C. Cockerham, Robert Dingwall, and Stella Quah and provides a “comprehensive, interdisciplinary, and international reference work on all aspects of the social scientific study of health and illness…”

In case you missed it, January saw Oxford University Press add a number of new titles to their online Oxford Quick Reference collections.

- A Dictionary of Genetics (8 ed.)
- The Concise Oxford Dictionary of the Christian Church (3 ed.)
- A Dictionary of Food and Nutrition (4 ed.)
- A Dictionary of Epidemiology (5 ed.)
- A Supplementary Dictionary of Sports Personalities (1 ed.)

Oxford also added one title to its online Oxford Reference Library.

- The Oxford Encyclopedia of Biblical Interpretation (1 ed.)

You can find more information along with relevant links at: http://www.oxfordreference.com/page/new/whats-new.

Rumors from page 43

Marketing Program at Harvard University (1992). Read all about her in Forbes, BusinessWeek, etc.

We will also have a keynote from John Rennie. John received a Bachelor of Science in Biology from Yale University and worked as a science writer and researcher at Harvard Medical School. He currently teaches science writing as adjunct professor at New York University’s Arthur L. Carter Journalism Institute, and writes his The Gleaming Retort on the PLOS Blogs Network. John served as editor in chief of Scientific American between 1994 and 2009. Based in New York, he continues to work as a science writer and editor, and as an adjunct instructor in New York University’s Science, Health and Environmental Reporting Program.

and Rob Tench (Acquisitions & Preservation Services Librarian, Old Dominion University, 4427 Hampton Blvd., Norfolk, VA 23529; Phone: 757-683-4144) <ftench@odu.edu>

and Anne Elguindi (Deputy Director, VIVA, George Mason University, 3351 Fairfax Drive, MS 1D1, Arlington, VA 22201; Phone: 703-993-4652) <aelguindi@gmu.edu>

Column Editor: Michelle Flinchbaugh (Acquisitions and Digital Scholarship Services Librarian, Albin O. Kuhn Library & Gallery, University of Maryland Baltimore County, 1000 Hilltop Circle, Baltimore, MD 21250; Phone: 410-455-6754; Fax: 410-455-1598) <flinchba@umbc.edu>

Introduction

Can you have too many demand-driven acquisitions (DDA) programs? Is one DDA program enough? In the Commonwealth of Virginia, we’re not sure how to answer the first question. However, our answer to the second question is an unequivocal NO! Well, that is at least true if you examine the experience of Old Dominion University (ODU) and the Virtual Library of Virginia (VIVA), the Commonwealth’s consortium of nonprofit academic libraries.

In the last 18 months, both organizations have implemented DDA pilots, and ODU participated in both of them. Because the same vendor was used for each pilot, it’s not surprising that the plans have similar characteristics. Both plans only include eBooks, and their basic acquisitions models match. They have similar browsing periods, and both allow unlimited simultaneous users, although the overall number of uses is limited for purchased titles. The programs differ in a number of ways, however, including the number of allowable Short Term Loans (STLs) before purchase, the kind and number of books available for use, and the maximum list price for titles (Figure 1).

These plans also have different challenges. The primary issues faced by ODU have been training staff, avoiding duplication, creating end-user awareness, and developing efficient workflows. VIVA’s primary issue has been communicating the plan effectively across the consortium and bringing publishers into the plan.

Some issues do affect both the individual library and the consortium, however. For both programs, record loading and record management are complex and challenging issues. Also, since both programs are pilots, creating and applying effective assessment tools to determine future viability and funding will be critical.

Old Dominion University DDA Background

Located in Norfolk, VA, Old Dominion University was founded in 1930 and currently serves just under 20,000 undergraduate and just over 5,000 graduate students. ODU offers 70 bachelor’s degrees, 54 master’s degrees, 42 doctoral degrees, and 2 educational specialist degrees. More than 70 degree programs are available through Distance Learning.

Figure 1: Basic Comparison – ODU and VIVA DDA Plans

The University Libraries’ collections total approximately 3.2 million items, including over 1 million monographic volumes, over 20,000 journals and other serial publications, over 2 million microform units, and over 68,000 maps, computer data files, audiovisual, audio, film, and cartographic materials.

DDA at ODU

Like many other college and university libraries, ODU’s University Libraries have been coping with material budget issues over the last few years. In response to these challenges and in order to expand the universe of available titles and provide immediate access to materials, the University Libraries allocated funds to begin a DDA program in 2012. DDA would also serve the University’s extensive Distance Education Program.

In August 2012, the University Libraries selected EBL as its vendor and implemented a DDA eBook pilot program. New titles were based on the Library’s YBP existing monographic approval plan, and the plan only included titles published since 2010. All subjects were represented, although textbooks and popular titles were excluded, and the maximum prices were set at $300 per title and $30 per STL with staff mediating requests that exceeded the maximum limits.

Standard parameters for STLs, purchase triggers, loan periods, numbers of users, and course reserves were established. Three STLs were allowed, and on the fourth use of a title, the book was purchased. ODU opted for the seven-day STL, and, following the EBL model, once purchased, a title had 325 available loan days per year. Initially, 19,500 EBL titles were loaded into the libraries’ Sierra Integrated Library System (ILS), and duplicates were removed as they were discovered.

And there are several more speakers so be sure and look at the Charleston Conference Website for updates. www.katina.info/conference

We will have a change of pace for the Saturday Rump Session. There will be a Charleston Seminar Luncheon and program from noon to 3:30 organized by Michael Arthur, Meg White, Rebecca Seger, Jonathan Harwell, and others. More information will be posted on the Charleston Conference Website. www.katina.info/conference

Collecting to the Core
from page 85

Student Resources), and his Cryptography and Network Security, now in its sixth edition, is a useful model for a textbook that blends basic information with practical applications and could be used by an undergraduate student or as a reference by practitioners.2,3

Another benefit of selecting and recommending course books to computing students is that it orients them to those foundational texts recognized across the computing industry. One particularly good example of a course book that is also arguably the definitive introductory text in the subject is Introduction to Algorithms, published by MIT Press.1 While there are other books available on this topic, this is a work that anyone in the industry will have studied from and is required reading for most computing professionals.

As universities and accrediting agencies place higher importance on job placement after graduation, libraries should consider collecting certification manuals for myriad reasons. Certifications are increasingly being promoted and supported by computing departments, which underscores the importance of acquiring these materials for the library. In “Integrating IT Certification into an Information System Course,” authors Akram Al-Rawi, Azzedine Lansari, and Faouzi Bouslama prescribe a strategy for incorporating certification exams into the university computing curriculum.1 In computing, a degree alone does not necessarily show employers that a potential new hire has a certain breadth of knowledge, whereas certification proves competence and the ability to pass an accredited industry-wide exam. Certifications ensure common and measurable fluency on a topic, since students or professionals sitting for the exam must be able to demonstrate their knowledge. Popular certification paths that can be tied to the undergraduate curriculum, library materials, and professional certifications are the tracks for Network+ and the CCNA (Cisco Certified Network Associate).

Much of the material in these courses mirrors the material taught in any introductory college networking course. Certification exams provide effective surveys of their topic areas and give the student a solid foundation on which to build a career. Though industry-recognized certifications can be resumed builders, they are not necessarily correlated with job placement, and library selectors should also recognize that computing faculty may have mixed feelings on incorporating certification training into the curriculum. Some programs have successfully integrated certification manuals into courses, supplemented with more theoretical texts; other computing departments opt to offer certification courses as electives. To support these efforts, bibliographers might look toward purchasing certification manuals and texts from the following group of publishers and series: Cisco Press (Official Cert Guide Series); McGraw-Hill Osborne Media (All-in-One Series); Microsoft Press Books (also available as electronic books through O’Reilly Media and Safari Books Online); and various series from Wiley’s Sybex imprint. Texts from these series can be easily integrated into collections and as universities become more accountable to students’ postgraduate career placements, supporting computing certification becomes more critical.

Once bibliographers decide to add selective textbooks and certification manuals to the computing collection, challenges remain. One practical concern is that it can be difficult to locate hardcover texts that will stand up to the wear and tear of users, as these titles are routinely heavily used. Certain works, such as the CCNA Routing and Switching Study Guide, will often be continuously checked out from the moment they are received.2 They will also probably be stolen, highlighted, dog-eared, and ripped apart, so it may be necessary to buy two copies or a physical copy and an electronic copy, allowing students to choose their preferred format. The consideration of whether to provide electronic texts is still an important question for computing students, who do not necessarily want to read books online, especially when they are trying to code or cross-reference materials. Nevertheless, when purchasing computing course materials and certification manuals in an electronic format, it is important to purchase a concurrent user license so that as many users as possible can access the needed materials. Given the general affordability of these works in both print and electronic formats, they are low-cost yet high-value additions to the undergraduate collection.

It is important to remember that, despite falling outside the scope of most traditional selection policies, instruction manuals — both textbooks and certification guides — are often the preeminent books in computing. They are intentionally written to be easy to understand, which makes them ideal for self-directed learning; they are usually highly vetted and well known in the industry; they are frequently edited and reissued, which is key in a fast-changing field; and they often directly support certification study, all of which make these materials excellent options for the undergraduate library collection. In fact, libraries of different sizes serving distinct communities — from liberal arts colleges to universities, technical schools to large public libraries — should find little reason to exclude these important and useful instructional materials from the computing collection. After all, it is often said that collection development is an art, not a science. When it comes to computer science, course books and certification guides can be critical for helping students learn their chosen art.

Rumors from page 62

We are excited to have a UNC-Chapel Hill School of Library and Information Science Data Curation Course which will take place for one-and-a-half day on the Monday and Tuesday prior to the Charleston Conference! Stay tuned!

www.katina.info/conference

Brainstorming the other night with the awesomes Mitchell Davis and Carolyn Morris and the newly-hired Biblioboard employee Steve Sutton (yes, you heard me right) and my wonderful husband Bruce, we had the idea for a Charleston Conference band… or music group… There are so many musicians in our midst! In fact, I was talking by email to Scott Plutchak about this since he is part of the Bearded Pigs who I have always wanted to get to perform in Charleston. But Scott says they retired the annual Bearded Pigs event at the MLA meeting after last year since there were too many logistical and other issues. Of course the initial challenge is getting the right core group of musicians together, as Scott says. But he adds a thought — suggests an open mike session one evening during the Charleston Conference. People would sign up for fifteen minute sets ahead of time. That could be a fun event in itself and help identify some people we could tap for something the next year. What musicians out there want to help with this crazy idea? Jack Montgomery, how about you? Seems like every other person mentions music in the Against the Grain profile! Fun, fun, fun! Who is interested? Please let me or Leah Hinds know! <leah@katina.info>

In the case of the subtitle example above, that would be:

$page->subtitle()

The worst thing I could say about Kirby is that it prescribes a directory structure and naming scheme to a certain extent. Visible content should be in a subdirectory of Kirby’s content folder, named according to number-name scheme such as “01-blog” or “02-comics.” Unnumbered folders are “invisible,” meaning they are still Web-accessible but do not appear in auto-generated navigation. Subdirectories follow this same scheme, with the numbers starting over from 01 in each folder.

Again, I found this hierarchy sensible and didn’t consider it limiting to the project at hand. Admittedly, it does mean that media content like my image files are spread out in each individual post subdirectory. If you need to house all media together in one directory or in another structure, as I could see being useful for a digital library admin who didn’t want to reinvent a wheel, you could get around this limitation with Kirby’s custom metadata fields.

After considering your projects needs, I recommend experimenting with each of these flat file systems to see if it’s right for the project and the people working on it. All are available on GitHub (Kirby’s licensing is based on the honor system). Jekyll is very capable and probably fairly simple to use and maintain if you develop in Ruby. If you’re more comfortable in PHP, Pico and Kirby are very similar on first, and in auto-generated navigation. Subdirectories they are still Web-accessible but do not appear in auto-generated navigation. Subdirectories in each folder, named according to number-name scheme such as “01-blog” or “02-comics.” Unnumbered folders are “invisible,” meaning they are still Web-accessible but do not appear in auto-generated navigation. Subdirectories follow this same scheme, with the numbers starting over from 01 in each folder.

And then there’s the fact that I was making Webcomic, and what comics creator could resist a name that recalls the King, Jack Kirby?
