Wandering the Web — How About a (Virtual) Cuppa?
A Highly Selective Introduction to Tea Online

by Roxanne Myers Spencer (Associate Professor and Coordinator, Educational Resources Center, Western Kentucky University Libraries)

Column Editor: Jack G. Montgomery (Professor, Coordinator, Collection Services, Western Kentucky University Libraries)

<jack.montgomery@wku.edu>

Tea Is Good for You

The second most popular beverage on Earth? Yes, tea. Second only to water, tea is the most-consumed beverage on the planet. Why? From help with weight loss to stress relief (there’s a symbiotic relationship there!) to fighting free radicals to improved exercise endurance and more, the humble cuppa — elsewhere in the world the most-consumed beverage — is coming into its own in the United States.

The Blog at HuffPost Healthy Living posted “6 amazing health benefits of tea” (2013). Time magazine online touted “13 reasons tea is good for you” in their Health and Family section (2012). WebMD created a short video clip reporting on the increase in tea consumption and published online articles on the health benefits of different types of tea (2013). After viewing the WebMD material, you can even take a quiz to test your knowledge on green tea! Dr. Oz and Fox News also showcase information on the health benefits of tea.

Getting interested? Good. I’ll put the kettle on, and we’ll learn some more over a nice hot cup of tea. What kind of tea? Glad you asked!

A (Very) Few Tea Vendors (among Many): A Drop in the Vast Teapot of Online Tea Vendors

Tea grows best in high, moist elevations, and the *camellia sinensis* plant can be found all over the world. According to the Tea Association of the USA:

Much of the world’s tea is grown in mountainous areas 3,000-7,000 feet above sea level, situated between the Tropics of Cancer and Capricorn in mineral-rich soil. Leading tea-producing countries include Argentina, China, India, Indonesia, Kenya Malawi, Sri Lanka, Tanzania, and Taiwan (Tea Fact Sheet, 2013).

There are a number of small, artisanal tea gardens in the United States, but the best-known commercial U.S. tea producer is the Charleston Tea Plantation, owned by Bigelow Tea, which produces American Classic Tea.

You say you like flavored teas? Well, sit back and take a fortifying sip or two, this could take a while. Popular online tea vendor Adagio Teas boasts more than 57,166 blends, as of May 2014. How is this possible? Brilliant social media marketing: Adagio customers create and rate tea blends online, often based on popular culture fandom. For example, TV series fandom blends include highly subjective and wildly varied teas based on characters from *Sherlock, Dr. Who*, and the late, lamented *Firefly*, to name but a few of the popular groups of blends.

Teavana, now owned by Starbucks, is opening tea specialty stores following the phenomenally successful Starbucks coffee bar model. Originally in upscale malls or freestanding stores, with colorful walls of tea tins and heavy on the screen space of the Upton Tea Imports Website (as of this writing). There are a number of small, artisanal tea gardens in the United States, but the best-known commercial U.S. tea producer is the Charleston Tea Plantation, owned by Bigelow Tea, which produces American Classic Tea.

Tea grows best in high, moist elevations, and the *camellia sinensis* plant can be found all over the world. According to the Tea Association of the USA:
Parties for the blue-haired set. The Upton difference, however, is in the details. Every one of “the 480 loose teas and tisanes” offered is as eloquently described, carefully sourced, and thoughtfully priced as on other, flashier tea vendor Websites. Their extensive catalog is available in a simple plain white paper format or online as a PDF. Upton Tea Imports is serious about the quality of its tea sources.

Somewhere between the busyness of Upton Tea Imports and the colorful graphics of Adagio Teas or Teavana is the stately yet welcoming Harney & Sons, a family business in upstate New York that imports and blends tea for international royalty — and the rest of us — at reasonable prices. Experience Palm Court, blended for the Plaza Hotel’s elegant room of the same name, or Paris, an homage to French Breakfast Tea that adds that je ne sais quoi to your morning cuppa. A key to navigating the various tea varieties on the Harney & Sons Website (as of this writing): Click the photo of the white cup of tea nestled in tea leaves — that links to the main page for each blend. Like most online tea vendors, you can try a variety of Harney & Sons original blends in inexpensive sample packets.

Another friendly tea vendor is the English Tea Store, which carries a variety of established brands from Barry’s to Typhoo, in addition to their own blends of tea, many of which are simply delicious and are also available in variety samples. If you like a good Earl Grey, try their Dorian Grey, Double Bergamot, or Earl Grey Cream. There is even a C02-decaffeinated Earl Grey — not too much of a good thing for the true fan.

Tea and Social Media

Beyond suggesting online sites to buy tea for your patrons, there is a growing social media aspect of tea for the novice as well as the connoisseur. Care to debate the merits of raw versus aged pu-erh? Want recommendations on fair-trade, organically grown white tea? Confused about the caffeine content in green tea? No worries — there’s a forum — and an app — for that. Tea drinkers have always been a social bunch, that much is evident from tea’s illustrious — and commonplace — history (see suggested reading below). Technology has made reaching out to fellow tea-lovers amazingly easy. Tea reviews, tea swaps, tea FAQs, tea Q&As, and virtual tea-tastings abound at sites like Steepster and TeaChat.

Thirsty for more information on this near-miraculous beverage? If you are planning a program about tea, there are some wonderful visuals to illustrate the impact of tea on SharePowered’s “It’s Tea Time: A Collection of Tea Infographics,” or you can add to the wildly creative tea swaps, tea FAQs, tea Q&As, and virtual tea-tastings abounding at sites like Steepster and TeaChat.

Reports of Meetings — ASA Annual Conference and 33rd Annual Charleston Conference

Column Editor: Sever Bordeianu (Head, Print Resources Section, University Libraries, MSC05 3020, 1 University of New Mexico, Albuquerque, NM 87131-0001; Phone: 505-277-2645; Fax: 505-277-9813) <sbordeia@unm.edu>

Reported by: Anthony Watkinson (Principal Consultant, CIBER Research) <anthony.watkinson@btinternet.com>

AJT readers may not be aware that for some years now the ASA with Peter Lawson of Karger Libri at the helm and Nawin Gupta as Secretary-General (both resident in the USA) have established an international conference in England that routinely draws between 120 and 160 registrants. February is a good time for an event as it is not surrounded by other conflicting conferences and seminars: it is a boring time in London! It is also an event that, like the Charleston Conference, brings together librarians, vendors, and publishers and because of the special position of agents and intermediaries presents new perspectives on much discussed topics — see the title.

The organising committee were very fortunate in getting Y.S. Chi of Elsevier to give the keynote. It was probably easier to get him because he disclosed that for eighteen months now his base has been in London. His presentations are perhaps the best from the publishing giants, and this one was no exception. On the whole he avoided a sales pitch, but on the whole the sort of initiatives described were ones where Elsevier is in the lead. He spoke about the evolution of publishing: about what is new, what is changing, and what is staying the same. “Traditional” publishing is regarded by many outside the industry as a relic but actually the traditional functions are still required by the academic authors and readers: publishers were early into technology and are just doing their old jobs better with its help. However, publishers have now embraced new roles and it is these that he concentrated on. There is much to be done with content. His company provides augmented content, no longer just content as received — “content-based experience” is delivered and dead content becomes live (interactive) content. Publishers are also delivering solutions and tools. Users save time because the right content is being delivered at the right time and in the right context. Tools take traditional content and mix it with analytics. He faced up to big data head-on and advertised the right mix for the right time and in the right context. [Web log post].
