New journals launch with complimentary online access to the first volume for the first year.
Cold Spring Harbor Laboratory Press announces the launch of a new monthly online publication, Cold Spring Harbor Perspectives in Medicine. Covering everything from the molecular and cellular bases of disease to translational medicine and new therapeutic strategies, each issue offers reviews on different aspects of a variety of diseases and the tissues they affect. The contributions are written by experts in each field and commissioned as Subject Collections by a board of eminent scientists and physicians. These Subject Collections gradually accumulate articles as new issues of the journal are published and, when complete, each Subject Collection represents a comprehensive survey of the field it covers. Cold Spring Harbor Perspectives in Medicine is thus unmatched for its depth of coverage and represents an essential source for informed surveys and critical discussion of advances in molecular medicine.

**Scope:** Translational Medicine, Molecular Pathology, Cancer Therapy, Genetics, Infectious Disease, Immunology, Molecular Cell Biology

**Frequency:** Monthly, online

BLOOMSBURY
Bringing People Together Around Information Resources

Explore all that Choice has to offer!
Set 1: Thermal Packaging Techniques (A 6-Volume Set)

The books included in “Set 1: Thermal Packaging Techniques” focus on the technology “building blocks” used to assemble a complete thermal management system and provide detailed descriptions of the underlying phenomena, modeling equations, and correlations, as well as guidance for achieving the optimal designs of individual “building blocks” and their insertion in the overall thermal solution.

Specific volumes deal with microchannel coolers, cold plates, immersion cooling modules, and thermoelectric microcoolers.

Volume 1: Microchannel Heat Sinks for Electronics Cooling
Suresh V Garimella & Tannaz Harirchian [Purdue University, USA]

Volume 2: Air- and Liquid-Cooled Cold Plates
Allan Kraus [Kraus Associates, USA]

Volume 3: Dielectric Liquid Cooling of Immersed Components
Karl Geisler [3M Center, USA] & Avram Bar-Cohen [University of Maryland, USA]

Volume 4: Thermoelectric Microcoolers
Bao Yang & Peng Wang [University of Maryland, USA]

Volume 5: Energy Efficient Solid State Lighting
Mehmet Arik [Ozyegin University, Turkey], Anant Setlur, Stanton Weaver Jr. & Joseph J Shiang [General Electric, USA]

Volume 6: Experimental Thermofluid Characterization of Electronic Components
Gary Sobolikken [University of Missouri at Columbia, USA]

Set 2: Thermal Packaging Tools (A 4-Volume Set)

The books included in “Set 2: Thermal Packaging Tools” focus on the experimental and analytical tools used by practitioners and researchers in this community to accelerate product development and achieve “correct by design” thermal packaging solutions.

Volumes offered in Set 2 of the Thermal Packaging Encyclopedia will deal with experimental characterization, the thermal design of solid state lighting systems, development and use of compact models and thermally-informed electronic design.

Volume 1: Cooling of Microelectronic and Nanoelectronic Equipment: Advances and Emerging Research
Madhusudan Iyengar [Facebook, USA], Karl J. L. Geisler [3M, USA] & Bahgat Sammakia [SUNY Binghamton USA]

Volume 2: Energy Optimization and Thermal Management of Data Centers
Bahgat Sammakia [Binghamton University, State University of New York, USA], Yogendra Joshi [Georgia Tech, USA], Dereje Agonafer [University of Texas, Arlington, USA] & Emad Samadiani [State University of New York]

Volume 3: Compact Thermal Models of Electronic Components
Clemens Lasance [Philips Research Laboratories, Emeritus, The Netherlands] & Mohammed-Nabil Sabry [Mansoura University, Egypt]

Volume 4: Thermally-Informed Design of Microelectronic Components
Sachin Sapatnekar [University of Minnesota, USA], Ankur Srivastava & Yufu Zhang & Bing Shi [University of Maryland, USA]
