This document has been made available through Purdue e-Pubs, a service of the Purdue University Libraries. Please contact epubs@purdue.edu for additional information.
When I was ten years old, I wanted to read Mickey Mantle’s autobiography: The Mickey Mantle Story, by Mickey Mantle as told to Ben Epstein, with a Foreword by Casey Stengel (1953). I knew I would someday play center field for the Yankees and wanted to study the Mick’s secrets. (I’m still available if they need me.) I had the run of the Post Library at White Sands Missile Range in New Mexico after my parents explained to the librarians that it was ok for me to check out any adult books I wanted. (Thank you, Miss Tolson, for being so accommodating.) Every week for two years on my library prowl, I went by the Biography shelves and looked under the Ms, ever hopeful, always disappointed. It never dawned on me that the book had gone missing and would never appear.

That was my first experience of the frustrations of browsing shelves. I’ve spent a good part of my life since with the joys and the frustrations of browsing and now, like many, find myself just spending less time, joyful or frustrated. How can we think about this familiar, challenged cultural practice?

Yes, serendipity happens when you browse. You find things you didn’t know exist. But other stuff happens too. You can plunge into an unfamiliar subject and get a snapshot of what we know about it. (Minus, of course, the books that are checked out at the moment, which may be the most current, the most generally helpful, and the most popular.) You can survey known territory to detect what’s new — with, again, the risk that the novelty is most likely to be off-site and thus unbrowseable. (The less popular materials usually? Well, but mightn’t the less popular be just the ones that most benefit from random scrutiny by the curious?)

Second, it requires us to send into the stacks on a daily basis curious and fearless students and faculty with time to spend there and the habit of shelf-browsing built up over years. How is the supply of that population doing? Does this generation of students have the habit, the curiosity, the fearlessness that my generation did long ago? There was nothing so magical to me as the stacks of my first great research library, when every shelf was heavily laden with material I couldn’t imagine finding in any other way. The eyes of your young, on the other hand, are jaded by knowing both too little and too much.

Third, it requires us to pass over lightly the unavoidable fact that many, many, many people, even institutions with great research libraries, will never have that opportunity. (I’m particularly thinking of browsing shelves at large public libraries.) As an adolescent, I was one of those, in a town where even if I had looked very hard I could not have found books printed in the Greek alphabet or Latin books that weren’t either church books or school books. Now I’m a classics professor — and there it was! I sprang for it. Only when I got home did I look at the flyleaf: “To Pete — Best Wishes — Mickey Mantle.” Autographed. (I may yet change my name to Pete.) Last time I saw a similar copy on AbeBooks, it was going for $3,500. Attentive browsing does pay off sometimes.

So how long does this model sustain itself? What does it depend on?

First, it requires us to keep our main collections together on publicly available shelves. That’s problematic both for the huge increase in what we have on our shelves (more than doubled in the last thirty years) and for the increasing number of items that don’t show up in print form — either unavailable in that form or chosen for e-purchase by libraries deliberately. Remember that many of our greatest libraries are already shelving appreciable portions of their collections off-site and thus unbrowseable. (The less popular materials usually? Well, but mightn’t the less popular be just the ones that most benefit from random scrutiny by the curious?)

That’s problematic both for the huge increase in what we have on our shelves (more than doubled in the last thirty years) and for the increasing number of items that don’t show up in print form — either unavailable in that form or chosen for e-purchase by libraries deliberately. Remember that many of our greatest libraries are already shelving appreciable portions of their collections off-site and thus unbrowseable. (The less popular materials usually? Well, but mightn’t the less popular be just the ones that most benefit from random scrutiny by the curious?)

So what do we do? Easy to say, harder to do: build online browsing tools one or two orders of magnitude more powerful than anything we have today, and at the same time reimagine completely the in-the-building experience of a print collection. At ASU we’re pushing on both fronts and I hope to write about both in coming months. Browsing is powerful and necessary — and challenged as never before. Browsing deserves immense respect as cultural practice — and our best efforts to rescue it from oblivion.

Oh, did I ever get to read the Mick’s confessions? Well, when I was thirty, I was tottering to the checkout line at the Ithaca (NY) Friends of the Library bookstore, one of the great cultural institutions of our age. I was heavy laden with a tottering double armload, but I had time to look at the $25 table just before the cash register — and there it was! I sprang for it. Only when I got home did I look at the flyleaf: “To Pete — Best Wishes — Mickey Mantle.” Autographed. (I may yet change my name to Pete.) Last time I saw a similar copy on AbeBooks, it was going for $3,500. Attentive browsing does pay off sometimes.

Partnerships, great author care and consistently superb customer service.” At the same awards ceremony, EEP was also awarded the ProQuest Academic & Professional Publisher of the Year Award 2017. Tim Williams is Managing Director. Congratulations! [https://www.e-elpag.com/]

Tom Gilson and I just got off a conference call with Keith Webster, Dean of Libraries Carnegie Mellon University and Daniel Hook, Managing Director, Digital Science about their new collaboration to create the 21st century library. With the goal of championing new forms of scholarly communication, Carnegie Mellon is creating a number of research platforms that will work together to enable innovation and provide opportunities for interactive research among the university’s researchers. As part of this effort, the university is building out an ecosystem of support, processes and tools that underpin the full research lifecycle from ideation to dissemination. Just off phone with Charleston Conference directors! The theme of 2017 will be *The Past is Prologue from The Tempest!* The Directors also endorsed the slight date change of the 2017 Conference. See you in Charleston Monday, November 6 through Friday November 10. [www.charlestonlibraryconference.com]
