Katina Strauch and Tom Gilson paid me a huge compliment earlier this year with their invitation to guest edit this issue of *ATG* around the theme of things keeping me awake at night. This theme was specially chosen in honor of a terrific article on the same theme that the supremely talented Karen Hunter did 20 years ago. Welcome fellow insomniacs!

The context in which that article was written was in the interim between the end of Project Tulip and the eventual launch of the ScienceDirect digital publishing platform which flowed in part from it. Karen was at the nexus of a huge transformation in scholarly communications, though no one could be certain of that at the time. What was clear, however, were some of the challenges that needed to be tackled.

Fast forward 20 years, and there are epic shifts underway again. I enjoy an interesting perspective within Elsevier which is well on its way through a transformation from publisher to information analytics company that improves research performance. What that exactly means continues to develop and become more clear, and we’ll see the eventual impact and outcomes. At least two things are different this time around: I am not nearly as awesome as Karen Hunter, and the epic shift is not happening in the same environment of collaboration between libraries and publishers. Indeed, a theme I often reflect on with real sadness is the rather parlous state of this fundamental, and potentially hugely powerful, strategic relationship. Now it too often feels the relationship is defined, at least by some, as a competitive one rather than as a symbiotic one. Neither community has made a radical transformation to the benefit of our shared users without the other. Anyway, while this is honestly something that does keep me awake at night, I have discovered that my sleeplessness by itself does not lead to change on this front.

It is a profound commitment to working symbiotically with librarians that shaped the way this issue of *ATG* evolved. My first action was to list my angst on paper, and to share it with the extremely thoughtful members of our North American Library Advisory Board (thank you — you know who you are!), and then Katina and Tom kindly offered to extend this consultation to members of the Charleston Advisory Board for thoughts and additions. I am so glad of having done this, as these wise professionals surfaced two additional themes that were keeping them awake at night, and have come to keep me awake now too. Problems shared are problems halved they say, and I certainly hope this proves to be true in time.

So what are some drivers of our shared angst:

1. Information authenticity in an age of both misinformation and overload
2. Metrics to demonstrate our impact
3. Making “open” a reality
4. Rights — by which I mean in this context copyright, copyright exceptions, and the rights of different scholarly communication stakeholders
5. Data access and preservation
6. Big data and privacy

So to each topic in turn…

Fake news and fake research are both eroding the trust that has traditionally been placed in published material. As is the case with news, fake research in its purest form is fabricated.

I hope you read Nancy Herther’s two part article about Amazon and Jeff Bezos. What a piece of great research and journalism. I am just sorry that I didn’t buy Amazon stock when it was cheap. At last look it was nearly $1000 for one share. Ouch! Anyway, more power to Amazon and Jeff Bezos.

SSP (Society for Scholarly Publishing) is entering its fortieth year and is celebrating the occasion by launching a new logo. “As scholarly publishing has evolved over the years, we felt now was the right time to refresh our logo to better reflect who we are today and to symbolize the dynamic nature of our future. SSP’s strength is within our membership and our new brand pays homage to our past while providing a new and exciting look for the Society going forwards,” said the wonderful Melanie Dolechek, SSP Executive Director.

Hey everyone! It’s summer in Charleston which means high 80s! Not sure how we would be able to survive without air conditioning!

*“Linking Publishers, Vendors and Librarians”*
Well, it wasn’t that bad but I did get your attention, right?

Bruce and I have been living out in the country since we retired in September 2016. Did you ever see “Green Acres”? with Eddie Albert and one of the Gabor sisters? I feel like I am in that sitcom regularly out here. There are many issues that we city folks have never encountered. Plus we were renting from the Citadel and we could always ask them to fix stuff.

A few weeks ago, in the middle of the night, we heard this huge boom and “sizzle.” The electricity did not go off so we thought we were okay. Ha! In the morning we learned a) the computer router was fried, nothing, b) the computer printer was fried, c) the dishwasher didn’t work, d) the refrigerator was on the fritz and last but not least, the golf cart did not work! Bummer! Shucks! They never had this problem on Green Acres.

In spite of some bills and time to fix everything, we persevered and this issue of ATG was finished! Thanks to the wonderful never-give-up Alicia Wise’s wonderful guest editing I was able to sleep at night! Whew! The theme came from Karen Hunter who I miss all the time! Our papers are by Alicia, Donald Barclay (fake news phenomenon), T. Scott Plutchak (insufficiency of facts), Roger Schonfeld (new metrics and strategies), Gemma Hersch (open access, open data, etc.), Maggie Farrell (blueprints and cranes). Our OpEd is about predatory journals by Rick Anderson, and Ann Okerson’s Back Talk takes us to Fiesole in Lille France and some visits to chocolate shops.

Our interview is with Kent Anderson of RedLink. We have book reviews and discussions by Regina Gong, Tom Gilson, Donna Jacobs, Dr. Matthew Olsen, Tom Leonhardt, and a brand new column by John Riley. Bruce Strauch and Lolly Gasaway keep us up to date with Cases of Note and Questions and Answers. We have a new column from Sven Fund about Knowledge Unlatched, Mark Herring wants us to remember who our funders are, Myer reminisces about PSP, Barbara Blummer and Jeffrey Kenton write about mobile initiatives, Caryl Ward talks about extended time off, Glenda Alvin encounters a flood, Bob Kief reflects on current developments in shared print collections, and Michael Gruenberg is making deals happen.

Donald Beagle has provided part two in a three part series on QEP at Belmont Abbey College and Antje Mays returns to Biz of Acq to discuss impacts and insights of migration.

Sorry to cut this off but they are calling for thunderstorms! I can even see the lightning! Bummer! I have to go shut off my electricity. Don’t want more trouble at Green Acres!

Have a great summer! Yr. Ed.

Rumors from page 1

Speaking of which, SSP is sponsoring one of the Charleston Conference preconferences in November. We had many submissions for preconferences for Charleston 2017. Registration for the Main Conference and preconferences will open the 19th of June. Sooner than we think!

http://www.charlestonlibraryconference.com/

And be sure and mark your calendars forward a day for the Main Conference — 2017 Theme: What’s Past is Prologue. Preconferences/Seminars: Monday, November 6-Tuesday, November 7. Charleston Vendor Showcase: Tuesday, November 7. Main Conference: Wednesday, November 8-Friday, November 10.

And the Call for Papers for Charleston 2017 has opened. Visit http://www.charlestonlibraryconference.com/call-for-papers/.

Moving right along, there are many people who help us to keep the Charleston Conference and ATG running! One of our main technical advisers is Matt Branton. Matt has worked at the College of Charleston for most of his young lifetime! He has two darling girls — Lockie and Tallulah and a wonderful wife Leighton. The family has recently welcomed a brother. Benjamin Luke Branton was born April 22 and is hard at work getting bigger! Matt helps us with every eventuality quickly and efficiently whenever we need him! Thank you, Matt and congratulations to the Branton family! We hope to be able to include a picture of the Branton family in the September print issue of ATG!

The hard-charging Alison Mudditt has been appointed CEO of PLOS effective June 19, 2017. For the past six years Alison has served as Director of the University of California Press where she ushered in new strategies to lead the company into the digital age, including the innovative journal and monograph...
of context and lacking key metadata, such as the name of the original creator of the information or its date of creation. A fourth, and final, difference is the ease with which digital information can be altered. Digital tools that make it simple to deceptively edit text, images, and video have been widely available for years.

In 2016, Adobe raised the stakes by introducing a new technology described as “a Photoshop for audio.” With Adobe’s new technology and twenty minutes of any individual’s recorded voice, editing speech becomes as simple as editing text in a word processing document. Imagine, for example, how easy it would be for someone equipped with this technology and access to historic audio recordings to create, say, a convincing recording of Lyndon Baines Johnson admitting in his own voice that he was personally responsible for the assassination of John F. Kennedy.

But just as technology can make the problem of misleading information worse, it can also be used to fight back. FaceBook, for example, has (somewhat belatedly) undertaken initiatives to flag fake news and discourage FaceBook users from forwarding discredited stories. Websites like Snopes, Politico, and Blue Feed/Red Feed exist to help people make informed decisions about the information they encounter in their daily lives. The website Climate Feedback was established by climate scientists to evaluate stories on climate change and challenge stories that present unscientific information about climate change. In March 2017 the Omidyar Network pledged $100M to fight fake news, a welcome development that should lead to even more resources that support seekers of trustworthy information.

While such efforts to fact check fake news and propaganda are commendable, the problem is that such resources exist as silos. Is it reasonable to expect that the average person will take the initiative to find and make use of any of these tiny islets spread across a vast ocean of digital information? Another problem with isolated fact checking resources is that any site claiming to be the enemy of misinformation could very well be the exact opposite. Given the nature of the digital world, there is nothing to stop propagandists or purveyors of fake news from claiming that their site is the go-to destination for accurate, trustworthy, fact-checked information.

What Can Librarians Do?

While librarians cannot stop the phenomenon of untrustworthy information being spread via the tools and behaviors of the Digital Age, they can, and are, doing things to help individuals make better choices about what information to trust and what to doubt. A tangible example is the recent iFLA infographic “How To Spot Fake News,” a document I have frequently shared with others. Also, librarians readily recognized the recent uproar over fake news to be a rare teaching opportunity: after decades of relegation to the margins of education, the importance of being able to evaluate information is suddenly headline news. But as commendable and necessary as such actions on the part of librarians are, it feels a bit like the library community is trying to stop a forest fire with a squirt pistol. There is simply too much untrustworthy information coming too fast and from too many sources for high-touch techniques like reference interviews, lecture/demonstrations, or the sharing of well-made infographics to have the necessary impact.

Which is not to say that such techniques are worthless or should be entirely abandoned, merely that they are not going to win the day all by themselves. Individual initiatives that rely on substantial, on-going investments of librarian labor, such as compiling lists of untrustworthy websites or sharing techniques for ferreting out fake news, simply do not scale in the digital world. It is all a bit reminiscent of the librarian-backed initiative (circa mid-1990s) to catalog the entire Internet — a commendable goal that collapsed under the sheer impossibility of keeping up with the growth of online information. Instead of pursuing small wins, the library community should seize the opportunity presented by the fake news phenomenon to do something huge; namely, undertaking a thoroughly coordinated campaign to established libraries and librarians as the brand-name antidote to fake news, propaganda, and all forms of misinformation in much the same way that Google has established itself as a brand name for searching the web or Microsoft Word has established itself as the brand name for word processing.

While I cannot spell out every detail for making so large an initiative a reality, I have some thoughts on the high-level requirements:

- National and international library associations must agree to work jointly on this initiative and make it their top priority. The work must start soon, before the world becomes complacent about the fake news phenomenon and turns its fleeting attention elsewhere.

- A united library community must approach this initiative with as much impartiality as is humanly possible. If the initiative is perceived as being influenced by market forces, partisanship, or special interest, it will die on the vine.

- Librarians must leverage the power of digital technology to have any meaningful impact.

Of the above high-level requirements, finding a technological solution is probably the biggest stretch. That said, here is a blue-sky idea about how a technological solution might be achieved: A united library community teams with a willing technology giant (say Google or FaceBook) to develop a search engine that employs algorithms designed to favor characteristics of trustworthiness and factuality rather than favoring a site’s popularity. Librarians and allied information scientists would be excellent consultants for identifying the characteristics of trustworthiness and factuality as well as for testing beta versions of the search engine. In the ideal scenario, the final product not only retrieves links ranked by trustworthiness, but also provides a sophisticated “Trustworthiness Rating” for each link retrieved.

Crazy idea? Probably. But we live in crazy times, times in which either doing nothing or doing what we have always done are not formulas for success. The library community must either fight the rising tide of misinformation or drown it in the words of the late, great Johnny Cash, “How high’s the water, Mama?”

Rumors

Open Access programs Collabra and Luminos. It has been an incredible transformation. The opportunity to lead the ground-breaking PLOS which has spearheaded a revolution in scientific communication was too tempting. Alison acknowledges that the OA market has evolved and matured. Her top priority will be charting what comes next for PLOS — how does it remain true to its mission and continue to push boundaries? Alison loves the public advocacy part of her work and is looking forward to expanding that at PLOS. Prior to

UC Press, Alison was Executive Vice President at SAGE Publications, Inc., leading publishing programs across books, journals and digital platforms. Her 25 plus years in the publishing industry include leadership positions at Blackwell Publishers in Oxford, UK, and Taylor & Francis Inc., in Philadelphia, U.S. Alison received her Bachelor of Arts degree from the University of Bath and her Masters in Business Administration from The Open University. Congratulations, Alison! Looking forward to the next steps!
Interview — Kent Anderson from page 30

vided by the RedLink SiteLeads service that is also intended to assist with sales efforts?

KA: Sales and management teams at publishers often have to go through IT or analytics staff to get reports. This can be a slow process, and often the reports don’t quite hit the mark. We’ve even spoken to sales and marketing teams at large, well-established publishers with dedicated analytics departments who experience delays when requesting a customized report. For salespeople out in the field or third-party agents, this is especially challenging. Publisher Dashboard puts all the vital reporting in a secure Web app that’s available 24/7, with the ability to give limited access to certain sales people. For instance, maybe the agents in Asia just have access to data from customers in Japan, China, and South Korea. This all has a few positive effects on retaining customers and acquiring new ones. First, salespeople can take customers through the usage data “live” and show them how demand has increased, costs have changed, and so forth. Second, if sales agents halfway around the world have access to the data, they can be selling while the home office rests, making the entire operation more efficient.

SiteLeads is a unique service that takes publishers beyond the customers they have, and helps them identify and contextualize institutions generating demand. It uses proprietary technology to quickly and precisely identify unmet demand for a publisher’s content, and puts it into the context of their current customer base, so they know how good a lead might be.

SiteLeads uses Publisher Dashboard data to put data about new leads into context, but the data from SiteLeads represents a new source of information about the market. So far the publishers who have signed on love it. The new leads generated either point to otherwise unknown opportunities, or provide real evidence of potential usage to prospects that are on the fence.

ATG: What should librarians and publishers expect to pay for subscriptions to these services?

KA: Our goal is to have wide adoption across the industry, so our prices are affordable. Generally, a library will pay a one-time setup fee and then a low annual subscription fee of a few thousand dollars. We have some different pricing based on library type and whether it’s part of a consortia. For publishers, we differentiate between non-profit and commercial publishers, but it’s essentially the same approach — a one-time setup fee, and then a low annual subscription. SiteLeads works a little differently, because we sell bundles of “unlocks” on top of the subscription, but again, the goal is to make the investment level manageable.

ATG: Privacy is always a concern with data collection. What steps does RedLink take to ensure librarian and publisher privacy is protected?

KA: Privacy and security are interrelated issues, both of which we take seriously. We use two-step authentication across our product suite, 256-bit SSL, secure facilities, and other techniques to ensure top-shelf security. As for privacy, which is also a policy issue, we review our privacy policies regularly with our counsel, and ensure they comport with various regulations and expectations. Running a data company is really code for running a privacy and security company. We know that.

ATG: We understand that new products are under development. Can you give us a heads-up and tell us what the market can expect from RedLink in the future?

KA: The most exciting new product just rolling out now is Remarq. This is designed to give researchers, authors, editors, and practitioners convenient tools to collaborate, annotate, and share articles, all without changing their workflows by drawing them away from the journals and online content they know and trust. Players like ResearchGate and Academia.edu have tried to draw researchers away into their “walled gardens,” but we feel the better solution is to bring the tools to the users, not the other way around.

Beyond this, we have other things in the works, but nothing I’m ready to talk about yet.

ATG: Kent, if you were conducting this interview what question would you ask yourself?

KA: I’d want to know how a former publisher is doing with the library market. And, I have to say, it’s going pretty well. I’ve always felt that we both serve a common customer, and the vantage point I have now at RedLink makes this even clearer, while giving me direct ways to realize this perspective. The library community has been nothing but generous in its reception. I think there is a lot of interest in market innovations, and that our commitment to doing a good job and finding solutions helps reassure people that we’re serious.

Got a nice note from the awesome David Worlock via Anthony Watkinson and Becky Lenzini about the publication of the latest volume of Liber Quarterly which marks the retirement of Pat Manson who has made a huge contribution to Library and Information work in Europe! Congratulations! https://www.liberquarterly.eu/586/volume/26/issue/4/.

I understand that many of the Fiesole Retreat speakers have papers in the above-referenced issue of Liber Quarterly. I was so sorry to have to miss Fiesole in Lille which I heard from Leah Hinds and others was spectacular for content and tour! There are several reports on Fiesole Lille in this issue of ATG which will be mailed shortly as well as posted on the ATG NewsChannel. Leah’s report will be posted online shortly as well. Many of the papers from the Fiesole Retreat are loaded on the Casalini website. Visit http://www.casalini.it/retreat/retreat_2017.html. https://www.liberquarterly.eu/586/volume/26/issue/4/.

We met many years ago in Fiesole, Italy, when she as working for Casalini Libri and later at Ithaka. And the vivacious Colleen Campbell has a new position as Partner Development in the Open Access 2020 Initiative at the Max Planck continued on page 42
This new version of Salem Health: Cancer is a welcomed update of the 2009 edition. It provides essential information in a well-organized accessible reference that will be of value to patrons ranging from high school students to lower level undergraduates doing papers to patients and their family seeking understandable, candid background information about their conditions and options. High school, public and undergraduate libraries should all give it serious consideration.

As is the case with all Salem Press reference works, access to the online version is included with a print purchase.

Extra Servings

Salem Press has just released a couple of new titles:

- **Great Events from History: The 21st Century, 2000-2016** (May 2017, ISBN: 978-1-68217-305-3, $295; eISBN: 978-1-68217-306-0, eBook Single User Price: $295) is a new three-volume set that "continues Salem's award-winning coverage into the twenty-first century, providing thoughtful, detailed essays on major events between 2000 and 2016... This text documents it all-the 9/11 attack on the Twin Towers, the wars in Afghanistan and Iraq, natural disasters around the globe, the elections of the first African-American President...."

- **Defining Documents in World History: Nationalism & Populism (320 B.C.E.-2016 C.E.)** (May 2017, ISBN: 978-1-68217-293-3, $295; eISBN: 978-1-68217-294-0, eBook Single User Price: $295) is a two-volume work that "investigates important historical documents from influential nationalist and populist movements from countries and territories around the globe. Readers will find in-depth analysis of a broad range of historical documents, historic events and speeches from leaders that shaped these ideas and movements, combined with documents that define Nationalism and Populism in today's society and how they affect politics, ethnic relations, democracy and international tensions...."

ABC-CLIO Greenwood has added a few titles:

- **War and Religion: An Encyclopedia of Faith and Conflict** (March 2017, ISBN: 978-1-61069-516-9, $310; eISBN: 978-1-61069-517-6, call for prices) is a three-volume set by Jeffrey M. Shaw and Timothy J. Denny. This reference "provides a complete guide for readers investigating the crucial interplay between war and religion from ancient times until today, enabling a deeper understanding of the role of religious wars across cultures.... This all-inclusive reference work will serve readers researching specific religious traditions, historical eras, wars, battles, or influential individuals across all time periods...."

- **Economics: The Definitive Encyclopedia from Theory to Practice** (March 2017, ISBN: 978-0-313-39707-3, $399; eISBN: 978-0-313-39708-0, call for prices) is edited by David A. Dieterle. It is a "comprehensive four-volume resource that explains more than 800 topics within the foundations of economics, macroeconomics, microeconomics, and global economics, all presented in an easy-to-read format.... This expansive reference set serves to establish basic economic literacy of students and researchers, providing more than 800 objective and factually driven entries on all the major themes and topics in economics...."

Academic Press has published a couple of substantial sets recently:

- The **Encyclopedia of Evolutionary Biology** (2016, ISBN: 9780128000496, $1575; eISBN: 9780128004265, 1575; Bundle: $1890) is a four-volume work edited by Richard Kliman that "provides a fully comprehensive review of the field in an easy to search structure. Under the collective leadership of fifteen distinguished section editors, it is comprised of articles written by leading experts in the field, providing a full review of the current status of each topic. The articles are up-to-date and fully illustrated with in-text references that allow readers to easily access primary literature...."

- The **Encyclopedia of Immunobiology** (2016, ISBN: 9780123742797, $2450; eISBN: 9780080921252, $2450; Bundle: $2940) is edited by Michael Ratcliff and consists of five-volumes that provide "the largest integrated source of immunological knowledge currently available. It consists of broad ranging, validated summaries on all of the major topics in the field as written by a team of leading experts. The large number of topics covered is relevant to a wide range of scientists working on experimental and clinical immunology, microbiology, biochemistry, genetics, veterinary science, physiology, and hematology...."

Bloomsbury Academic has a new work in the offing:

- **A Cultural History of Theatre** (Nov. 2017, ISBN: 9781472585844, $550) is edited by Christopher B. Balme, Tracy C. Davis and "presents an authoritative survey from ancient times to the present. The set of six volumes covers a span of 2,500 years, tracing the complexity of the interactions between theatre and culture.... Each volume discusses the same themes in its chapters.... This structure offers readers a broad overview of a period within each volume or the opportunity to follow a theme through history by reading the relevant chapter across volumes...."

---

**Wryly Noted from page 40**

George Whitman. I had him all to myself that afternoon and he generously told me stories of Samuel Beckett who was a regular customer and a favorite author of both of us. I half expected to see Beckett come in the shop while I was there. I too took inspiration enough from George Whitman to eventually open my own bookshop which I named the Madeleine in honor of the time I spent in Paris that winter.

I never got to live in the shop, much to my regret, but I have heard many stories from those who did. In the 1960s a friend of mine bunked in the free lodging space upstairs of the shop with Eldridge Cleaver who was on the lam from the police and the courts back home.

George Whitman passed away in 2011, two days after his ninety-eighth birthday. He lived by his twin credos: “The book business is the business of life,” and “I’m tired of people saying they don’t have time to read. I don’t have time for anything else!”

I hope you too can read this wonderful book and that you too take inspiration from this one of a kind literary treasure.

And They Were There
from page 56

The Evolution of E-books — Presented by Tony Horava
(Moderator, University of Ottawa); Mitchell Davis (BiblioLabs);
James O’Donnell (Arizona State University Libraries);
David Durant (East Carolina University)

Reported by: Susan Whiteman (University at Albany Libraries)
<swhiteman@albany.edu>

O’Donnell opened the program by stating that currently available eBooks are dysfunctional. “They are not books and are only moderately E.” Navigating eBooks, he said, has the functionality of papyrus scrolls and they are crippled by DRM restrictions that inconvenience users. By contrast, bootlegged (DRM-free) eBooks are easy to use, allowing cutting and pasting and limitless printing. O’Donnell also noted that sales of the Kindle peaked in 2011 and has since flattened. For eBooks to be here in 50 years, what’s needed are fewer platforms, better standards, and more functionality.

Durant pointed out that the technology-substitution model has not done for eBooks what it has done for journals. Referencing the writings of Nicolas Carr and Naomi Baron, he noted that eBooks are not conducive to reading at length, nor do they offer the ease of in-depth learning that print provides. Devices such as smart phones and tablets encourage skimming and multitasking and are best used for more superficial reading. The eBook market needs a complementary model to print that better encourages the acquisition of knowledge.

Davis described the pilot project at the University of Liverpool of an innovative new model of e-textbook. Written by university faculty, it’s being hosted by Charleston-based BiblioBoard, a cross-platform system that allows multi-user access to digitally based information.

Davis stressed that open educational resources (OER) with unlimited simultaneous user and peer review will be the industry’s revolution. Student-user experience of this pilot has been overwhelmingly positive, and access to OERs has the potential to save students thousands of dollars. BiblioBoard still seeks to realize consistent returns even as access to the lucrative e-textbook market is sought by competitors such as Amazon.

That’s all the reports we have room for in this issue. Watch for more reports from the 2016 Charleston Conference in upcoming issues of Against the Grain. Presentation material (PowerPoint slides, handouts) and taped session links from many of the 2016 sessions are available online. the Max Planck Society’s competitiveness in the international science community. The MPDL and its predecessors have featured as one of Europe’s largest purchasers of scientific information for more than ten years now. The MPDL arranges for access to a wide range of scientific journals, eBooks, specialist databases and extensive open access publication services. Together with the libraries at the Max Planck Institutes, it takes care of an excellent supply of scientific information and opportunities for publication. Teams from the MPDL have been playing an active role in preparing and supplying research data and research results from the 80 Max Planck Institutes since 2007. The

W e announced in late May that the Charleston Vendor Showcase will be moving to the Grand Ballroom of the Gaillard Center this year. We’re very excited about the extra room and the ability to keep all the vendor tables in one location. Toni Nix, the powerhouse who manages the event, worked tirelessly to facilitate all logistics that made the move possible. Please note that the Registration Check-in Desk will remain at the original location in the lobby of the Francis Marion Hotel, and shuttle transportation will be available between both locations.

Speaking of the registration desk, our Conference Registrar Sharna Williams has retired from the College of Charleston Addlestone Library as of May 31! She will continue to work with us for the conference (whew!) and is looking forward to a more flexible schedule. Congrats, hugs, and high fives, Sharna!

Excited to announce some of our plenary presenters for 2017! Brewster Kahle, Founder and Digital Librarian of the Internet Archive, Loretta Parham, CEO and Director of the Atlanta University Center (AUC) Robert W. Woodruff Library, and Georgios Papadopoulos, Founder and CEO of Atypon, will all be presenting in Charleston this year. We are greatly looking forward to hearing their contributions. More to be announced soon!

We had a large number of top notch preconference proposals this year! A full list of sessions is available at http://www.charlestonlibraryconference.com/preconferences/. Some of the topics included are an acquisitions bootcamp, budgeting, electronic resources management, combatting “fake news,” enriched metadata, negotiating with vendors, and more! Registration for the preconferences is available on the main conference registration page.

The launch of the Charleston Fast Pitch session was a great success at last year’s conference. The aim of the contest, which was modeled after venture capital funding competitions, was to recognize and reward new innovation in academic library and information management. From a pool of many qualified applicants, the committee selected four finalists to present their “pitches” at the conference. Two winners were selected, one by a panel of judges and one by popular audience vote. Winners were awarded $2,500 each to further fund their projects. We’re happy to say that the Fast Pitch competition will be back for 2017! Application information will be posted on the conference website. Summaries of the 2016 winners and runners up can be found at http://www.against-the-grain.com/2017/01/atg-special-report-the-charleston-library-conference-fast-pitch-2016/. Start warming up your pitch!

Speaking of conference sessions returning for 2017, the Charleston Premiers are going to be back and better than ever! Get ready to walk the red carpet to a Hollywood-style awards show. Designed to offer publishers and vendors the chance to showcase their newest and most innovative products, platforms, and/or content, this session will be augmented with an audience voting segment this year. We will be awarding several “Best Of” categories to increase audience engagement and participation. Presentations will still be organized in a “lightning round” format with 5 minute presentations, back-to-back. The Premiers are organized and moderated by Trey Shelton, Chair, Acquisitions & Collections Services at the George A. Smathers Libraries, University of Florida.

That’s it for now — stay tuned to the Charleston Conference website and the Against the Grain NewsChannel for more updates: www.charlestonlibraryconference.com and www.against-the-grain.com.

front! Let us claim the moment and say that we are librarians. There is no shame in saying that!

Scholarly Communication

Publishing Without Walls — A new digital publishing initiative funded by the Mellon Foundation, Publishing Without Walls (PWW), has recently begun at the University of Illinois. A partnership between the University Library, iSchool, Illinois Program for Research in the Humanities, and Department of African American Studies, it will seek to understand the needs of scholars in a contemporary environment, particularly how they want to produce and consume digital publications. Two series of projects have been established: Humanities Without Walls Global Midwest (HWW) and AFRO-PWW, which focuses on African American Studies.

The majority of scholars are generally comfortable using word processing software, but only 21% of them are comfortable with text markup languages, so it was decided to base the PWW project on a Word-based workflow. The strategies and priorities of the project are:

• Outreach and education,
• Production and workflows, and
• Research and education.

The Research Lifecycle — A study at Cornell University Library looked at the research lifecycle and how libraries can support it.

Academic libraries have traditionally focused on the acquisition and searching for information, but they also can have a role in researchers’ other activities:

• Managing the flow of information and writing papers,
• Searching for information, which is the most common task for all researchers,
• “Brain work”: thinking, understanding, and figuring things out,
• Self-discipline: tools used to curb and manage interruptions, and
• Technology, which is used in all environments and maintains the flow of work.

Students’ Information Literacy Skills — Candice Benjes-Small, Head, Information Literacy & Outreach, Radford University (RU), wondered if students’ information literacy skills improve over time. She and her colleagues analyzed citations in papers written by seniors and compared them with those in papers written by first-year students. In general, the first-year students used more popular and general sources, and seniors used a wider variety of sources. There was not much difference between the two groups in the use of quotations and paraphrasing. In departments where information literacy was rigidly enforced and taught by library staff, students showed more sophisticated use of sources; the conclusion was that RU and the library in particular added value to students’ information literacy skills.

Library Operations and Services

“Let Me Learn” or “Just Give Me the Answer”: Research Consultations and Mindsets — We want to provide assistance to our students and better understand their motivations to doing their research and consulting librarians for assistance. Carol Dweck, a professor of psychology at Stanford University, has promulgated a theory of “mindsets” which can be applied to students and research consultations. Dweck identified two types of mindsets: growth mindsets result in achievements based on hard work; fixed mindsets are based on natural ability.

A study by librarians at several universities explored the goals of students who meet with librarians for research consultations. The efforts of librarians seem to improve academic performance; however, a growth mindset does not necessarily lead to a performance orientation. A study of about 100 students who came to the library for consultations led to new ways of thinking about how they approach the research process, their expectations of receiving help from an information professional, and how librarians could approach research consultations differently for students with a fixed mindset.

Open Access (OA) and Decision Making — How can we use the level of OA to make journal decisions? According to Kristin Antelman, University Librarian at the California Institute of Technology (Caltech), many journals are openly available, so the value of subscription-only journals is declining. Publishers are concerned that OA allows cancellation of OA journals (for which there is a charge) to cut costs, and there is still a significant resistance to the idea of using OA as a factor in journal cancellation decisions.

Altmetrics

Metrics Selection in the Research Lifecycle — How can librarians select the best metrics to use in the research lifecycle to help satisfy a user’s needs? Articles are not the only things that can be measured; for example, for books, one could not only derive metrics for the chapters in the book but could ask questions such as:

• How many libraries hold this book?
• How many Wikipedia articles mention the book?
• What do Amazon’s reviews say about the book?
• For eBooks, how many abstract views, downloads, and clicks did this book get?

The “Golden Rules” of research metrics are to always use qualitative and quantitative input decisions, and to always use more than one metric as the quantitative input.

Bibliometric Services at the NIH Library — An illustration of the use of metrics is in the services offered by the library of the National Institutes of Health (NIH), where bibliometrics are used in consultation (study designs, etc.), training in bibliometric theory, and conducting analyses on research topics. Analysis categories include publication counts to determine the productivity of an organization, research topics, and citation impact.

Metrics for Research Impact — To determine research impact, we need to understand the numbers and look at the metrics in an appropriate context. For example, we need to recognize that journal impact factors can be manipulated and can skew citation count distributions. And papers might be cited for other reasons than acknowledging influence (to point out errors, etc.). Therefore, it is important not only to put metrics in context but to use metrics closest to the impact you wish to document.

The Altmetrics Way of Measuring Scholarly Impact — Altmetrics can be used to supplement traditional ways of scholarly impact, which frequently revolve around citation counts. Altmetrics have the advantage that they become available much faster than citation data. An article’s

New Era of Personalized Medicine — as well as co-author with Nobel laureate Jim Watson of an updated edition of DNA: The Story of the Genetic Revolution. In April of this year, Davies won a prestigious Guggenheim Fellowship for science writing. “I am delighted to be joining the Mary Ann Liebert team,” said Davies. “I have long admired the company’s penchant for identifying emerging areas of science and medicine, and sought to emulate the longstanding success of Genetic
Bruges City Center, “and 14 of them are on my street,” she said. Happily, I’d done my online research about Bruges’s offerings and, having bought a few wares from 8 of them, I declared victory!

Next year’s retreat is scheduled for Barcelona, Spain. As one who has participated in several Fiesole Retreats, I predict a wealth of ideas and discussion; and as a previous one-time visitor to Barcelona and its cultural treats, I can attest that the chocolate shopping there, while not as diverse as in Bruges, is also hugely excellent.

See you there!
