This is an Open Access journal. This means that it uses a funding model that does not charge readers or their institutions for access. Readers may freely read, download, copy, distribute, print, search, or link to the full texts of articles. This journal is covered under the [CC BY-NC-ND license](https://creativecommons.org/licenses/by-nc-nd/4.0/).

## Journal of Pre-College Engineering Education Research (J-PEER)

ISSN: 2157-9288

<http://docs.lib.purdue.edu/jpeer/>

### About this Journal

The graduates of today and tomorrow enter into a world that requires them to be engineering-literate and technologically savvy. The integration of engineering education in grades P-12 will better arm students with essential tools and skills to enter into the workforce or postsecondary education. Additionally, due to a 20 percent slip in the number of engineers graduating from U.S. institutions and with more than half of the U.S. workforce in the sciences and engineering approaching retirement age, the need for a diverse group of students interested in and prepared to study engineering in college is ever growing.

It is essential that young engineers from the U.S. be involved in the next generation of innovative ideas that support our society's needs. This interest and drive to participate in engineering must be fostered at an early age. The *Journal of Pre-College Engineering Education Research (J-PEER)* is dedicated to addressing the downward trends in engineering interest, preparedness, and representation; to transforming P-12 education to include engineering; to preparing a globally competitive engineering workforce; and ultimately to creating a society of engineering-literate citizens.

*J-PEER* is issued twice a year electronically and serves as a forum and a community space for the publication of research and evaluation reports on areas of pre-college STEM education, particularly in engineering.

*J-PEER* targets scholars and practitioners in the new and expanding field of pre-college engineering education. This journal invites authors to submit their original and unpublished work in the form of (1) research papers or (2) shorter practitioners reports in numerous areas of STEM education with a special emphasis on cross-disciplinary STEM approaches incorporating engineering.

Broadly the topics include but are not limited to research articles on elementary and secondary students learning, curricular and extracurricular approaches to teaching engineering in elementary and secondary school, professional development of teachers and other school professionals, comparative approaches to curriculum and professional development in engineering education, parents' attitudes toward engineering, and the learning of engineering in informal settings.

### Editorial Board

Editor: Johannes Strobel, Purdue University

Editorial Assistant: Maria Granic-White, Purdue University

Monica Cardella, Purdue University

Robin Clark, Aston University, United Kingdom

David Crismond, City College of New York

Christine Cunningham, Boston Museum of Science and  
Technology

Lyn D. English, Queensland University of Technology,  
Australia

Tirupalavanam Ganesh, Arizona State University

Jan Hansen, University of St. Thomas, Minnesota

Stephen Krause, Arizona State University

Rich Lehrer, Vanderbilt University

Marcia Linn, University of California, Berkeley

Jack R. Lohmann, Georgia Institute of Technology

Ingelore Mammes, Paderborn University, Germany

Mitchell Nathan, University of Wisconsin-Madison

Anthony Petrosino, University of Texas

Senay Purzer, Purdue University

Bob Sherwood, Indiana University

### Submission Guidelines

#### *Who Can Submit?*

Anyone may submit an original article to be considered for publication in *Journal of Pre-College Engineering Education Research (J-PEER)* provided he or she owns the copyright to the work being submitted or is authorized by the copyright owner or owners to submit the article. Authors are the initial owners of the copyrights to their works (an exception in the non-academic world to this might exist if the authors have, as a condition of employment, agreed to transfer copyright to their employer).

#### *General Submission Rules*

Submitted articles cannot have been previously published, nor be forthcoming in an archival journal or book (print or electronic). Please note: "publication" in a working-paper series does *not* constitute prior publication. In addition, by submitting material to *Journal of Pre-College Engineering Education Research (J-PEER)*, the author is stipulating that the material is not currently under review at another journal (electronic or print) and that he or she will not submit the material to another journal (electronic or print) until the completion of the editorial decision process at *Journal of Pre-College Engineering Education Research (J-PEER)*. If you have concerns about the submission terms for *Journal of Pre-College Engineering Education Research (J-PEER)*, please contact Maria Granic-White at [mgranicw@purdue.edu](mailto:mgranicw@purdue.edu).

#### *Formatting Requirements*

*Journal of Pre-College Engineering Education Research (J-PEER)* has no general rules about the formatting of articles upon *initial* submission. There are, however, rules governing the formatting of the final submission. See <http://docs.lib.purdue.edu/jpeer/styleguide.html> for details. Although bepress can provide limited technical support, it is ultimately the responsibility of the author to produce an electronic version of the article as a high-quality PDF (Adobe's Portable Document Format) file, or a Microsoft Word, WordPerfect or RTF file that can be converted to a PDF file.

It is understood that the current state of technology of Adobe's Portable Document Format (PDF) is such that there are no, and can be no, guarantees that documents in PDF will work perfectly with all possible hardware and software configurations that readers may have.
