Benefits and Strategies for Open Access
For more information visit Open Access @ Purdue (http://www.lib.purdue.edu/openaccess)
Or contact David Scherer dscherer@purdue.edu 4 6511

What is Open Access? Several uses or ‘flavours’ of open access. For our purposes there is:
1. Open access that an individual author makes his or her published peer-reviewed articles publicly accessible on a
   website, repository, digital open archive. Also called "Green Open Access".
2. Open access journals:
   a. These are peer reviewed scholarly journals whose access model is "open", that is, no subscription costs
e   to readers/institutions are required.
   b. They are online.
   c. They are peer reviewed and ALL issues/articles are publicly accessible.
   d. "Hybrid" Open Access Journals are journals published by commercial (usually) publishers that will change a fee for an individual article to be "open" in an otherwise "closed" access journal.

Benefits?
1. To the individual:Higher citation rates on individual papers:
   a. More eyes on the work, more scholars (at less wealthy institutions), more promising students and future scholars, policy makers, news reporters, and the unexpected reader and citizen scholar.
   b. Studies have shown higher citation rates for work that is publicly accessible. See, Swan, A. (2010) The
   Open Access citation advantage. Studies and results to date. Technical Report. School of Electronic &
   Computer Science, University of Southampton.
2. Greater visibility/traffic to your department/school/university—a way to showcase publicly the scholarly output,
demonstrate accountability to the public that funds the school, satisfy the public mission of the university.
3. See e-Pubs download stats.

How to do OA?
As easy as the individual author reads her publication agreement and when allowed by the agreement sends a copy to Dave
for deposit in e-Pubs. Period. If the author is unsure we are here to help:
Low time commitment:
1. Read the publication agreement, (see http://www.sherpa.ac.uk/romEO/ if you need help understanding it). (A few
   minutes)
2. Email your CV to us, with any questions you might have. (A few minutes)
Visit Open Access @ Purdue (http://www.lib.purdue.edu/openaccess) for more information on Open Access.

Purdue e-Pubs? (http://docs.lib.purdue.edu/)
1. What does e-pubs offer for open access? Secure, preserved, stable URL, open to Google search engines, excellent
   download and usage stats.
2. We will now submit work on your behalf.
3. OPEN ACCESS Journals—Purdue hosts several in-house published scholarly journals available in e-pubs.

Sharing Hinges on Ownership issues
Read it carefully:
The next publication agreement you are asked to sign for a scholarly journal article you are publishing:
• Does it allow the peer-reviewed version (often called “post-print” or “author accepted manuscript”) to be shared
publicly?)
• When publishing with traditional, closed-access journals those publication agreements are critical if you want to
make a copy of your published work available. Read them. They may allow open sharing. We can help.

Agreements can be altered:
Those agreements can also be altered, if you feel you want to, but it often isn’t needed. Just a careful read of the document
so you know what rights you are giving away and what rights you are retaining—especially related to open sharing.

Authors as Stewards: We scholars are the stewards over the access of the work we author, and if we aren’t careful we
sign away rights and the access is then completely locked down in a way that perhaps we aren’t aware of or are
uncomfortable with.

Explain what Open Access is at Purdue
Green vs. Gold
Explain the benefits
How to do OA at Purdue
Asking for CVs
Introduce Purdue e-Pubs to faculty
Relate the benefits of Purdue e-Pubs
Increase awareness and participation
“Getting started with Open Access at Purdue can be done in three easy steps....”
Why CVs?

Inputting CV citations into internal CV review spreadsheet (Most recent 5 years)

Students utilize approved Sherpa/RoMEO review
  - Which articles can be added to Purdue e-Pubs?
  - Which versions could be deposited (AAM/PDF)?
  - Embargoes/Publisher requirements for deposit?
We can retrieve the published version for those where Publisher PDF is acceptable; however, for those with Author Accepted Manuscript as the depositable version, we will need you to forward the final version of the document(s) you submitted to the journal to us for it to be included in Purdue e-Pubs.

Email results to faculty members

Review of what can be added and what version

Request copies of AAMs

Consent of Purdue e-Pubs Non-Exclusive License Agreement

Continued communication between repository staff and faculty member until deposit is “complete”
Increase awareness of the repository and repository services

Increase participation with and exposure of the repository and Purdue Libraries

Ensure what is being deposited can be deposited

Educating faculty of their rights as authors

Expand faculty participation and content beyond previously published works

Opportunities for grey literature and new publishing ventures

Increase Open Access to Purdue scholarship and research
Thank You
