Announcing Release 2.1!

You told us what you want—and we listened. New enhancements make FOLIO your link to an ever-expanding range of YBP services for both approval and firm order customers. If you’re one of the rapidly growing number of FOLIO users, you’ll like the new capabilities developed in response to your needs. If you’re not using FOLIO yet, sign up and sign on to see what the excitement is all about.

This Just In—Order Any Title through FOLIO.
Simply key an ISBN—if it’s found in our extensive title file, FOLIO will display the bibliographic data for you. Or enter author, title, imprint, publication data, and preferred binding. Then, with a single keystroke, place your order through FOLIO via the Internet.

A Need to Know—On-line Notification.
Access the most recent four weeks of approval notification slip data specific to your account. Select an item for ordering, review selected items, and place orders for selected items instantly—all in an on-line environment. No waiting for notification slips to appear on your desk.

What Goes Around, Comes Around—File Transfer via the Internet.
Transfer bibliographic data from YBP to your library’s system, then back again as an order.

The Bottom Line—Expenditure Reporting.
Get the budgetary and returns information you need in the format you want. FOLIO tells you what you’ve spent by date, LC classification, and publisher—based on the parameters you enter.

In 1986, Pergamon published *THE ENCYCLOPEDIA OF MATERIALS SCIENCE & ENGINEERING*, which helped to define the field of materials science. Since then, research has greatly increased into how the properties of a material can be adapted to perform specific applications.

**THE ENCYCLOPEDIA OF ADVANCED MATERIALS** defines and broadly covers this area, taking into account the many different views encountered in research, as well as emphasizing the multidisciplinary nature of the subject.

Articles will cover the composition, structure, applications and processing/synthesis of advanced materials, as well as the characterization, properties and phenomena of advanced materials as a group.

Alphabetically organized, the work will consist of approximately 550 articles in four volumes. Each article moves from the general to the specific and from the elementary to more subtle aspects of the given topic. They will concentrate on the present state of the field and its possible future evolution. All articles are extensively cross-referenced and indexed.

**EDITORS:**
- David Bloor, University of Durham, UK
- Richard J. Brook, University of Oxford, UK
- Merton C. Flemings, Massachusetts Institute of Technology, USA
- Subhash Mahajan, Carnegie Mellon University, USA

**SENIOR ADVISORY EDITOR:**
- Robert W. Cahn FRS, University of Cambridge, UK

Many libraries are preparing for the next big step in automation—downsizing from mainframes in favor of systems that not only provide integrated modules but integrate fully with larger computing environments. These libraries are selecting open systems with client-server architecture. They are selecting Marquis.

Marquis is way out in front in terms of client-server expertise. We offered the first true client-server applications for libraries and have already gained the experience of installing dozens of systems. Every module—even Serials—is done and done well. Clear screens, nimble movement between modules, and full features. That's Marquis.

If you're interested in client-server network computing—whether you serve users enterprise-wide, across the country, or around the world—Marquis is ready to work for you.

Close the gaps in your collection.

With Faxon Quest you have a single source for finding missing issues, exchanging duplicates and fulfilling back orders.

If you are missing issues, have duplicates to exchange, or need a back order fulfilled, then you’ll be interested in Faxon Quest™.

The Faxon Quest service consists of two comprehensive, cost-effective ways to enhance and restore your serials collection.

**Superior back order fulfillment.**
First we offer, ReQuest™ — a comprehensive back volume fulfillment service. With ReQuest, you simply let us know what you’re looking for and we do the rest.

We’ll inquire price and availability of your in-print and out-of-print needs from publishers and over 40 back-volume vendors from around the world. If it’s out there, we’ll find it — at the most cost-effective price available.

**Automated serials exchange.**
To complement ReQuest, we offer SerialsQuest™ — a unique online service for locating and trading back issues and hard-to-find serials. With SerialsQuest all you do is enter your "wants" and "trades" into the database.

SerialsQuest automatically matches the wanted and available items and notifies you when a match is found. It’s never been so easy to obtain or trade missing issues.

**Complete your collection today.**
With the Faxon Quest service you have the power to fulfill all your serials back-order needs, quickly and economically.

Call us today at 1-800-627-2216 (press #3 for direct connection).

We’ll be happy to show you how quickly the gaps in your collection can disappear.

**Encyclopedia of Food Science, Food Technology and Nutrition**
Edited by Robert Macrae, Richard Robinson, and Michele J. Sadler

"This is the most well-written, well-indexed, up-to-date reference of food and food-stuffs available...This was an obvious mammoth undertaking which has resulted in a publication which has expertly filled a void in the scientific reference literature...This is a beautiful reference set and I highly recommend it as a general reference compendium for any basic science or health-related science library."
—Johan S. Williamson, University of Mississippi, in SIM INDUSTRIAL MICROBIOLOGY NEWS
