OECD Insights:
International Trade: Free, Fair and Open?
International trade influences a whole range of activities including jobs, consumption and the fight against poverty. It also affects the environment and relations among countries. In turn, trade is shaped by a host of influences ranging from natural resources to fashion. Trade-related issues can give rise to strong feelings, and trade measures such as banning or limiting imports are often called for to respond to major economic problems. An understanding of the benefits and downsides of trade, and of what trade policy can and cannot achieve, will help us to form our own opinions on debates about international trade.

Society at a Glance: OECD Social Indicators 2009
Society at a Glance offers a concise quantitative overview of social trends and policies across the OECD. This 2009 edition includes a wide range of information on social issues – such as demography and family characteristics, employment and unemployment, poverty and inequality, social and health care expenditure, and work and life satisfaction – as well as a guide to help readers understand the structure of OECD social. For the first time, the report provides a condensed set of headline social indicators summarizing social well-being in OECD countries. A special chapter examines leisure time across the OECD.

Health at a Glance 2009: OECD Indicators
This 2009 edition of Health at a Glance provides the latest comparable data and trends on different aspects of the performance of health systems in OECD countries. It shows the variations across countries in indicators of health status and health risks, as well as in the inputs and outputs of health systems. It includes a special feature with new indicators for and data on the long-term care workforce. A statistical annex provides additional information for most indicators, often presenting time series going as far back as 1960. The publication also includes StatLink, URLs linking tables and charts via the internet to Excel® spreadsheet files containing the underlying data.
