Our Service Tells The Tale:
We Go To Extremes

At Baker & Taylor, we go to extraordinary lengths to make your life easier, even when that means locating a hard-to-find title in a remote location. Of course, it helps that we have ESP, our Enhanced Services Program. Our brand of ESP doesn't take clairvoyance — it takes a long tradition of building publisher relationships.

With ESP, we now offer more than 1.8 million active titles and representation from more than 66,000 imprints. And our newly expanded vendor relations team offers personal attention you won't find anywhere else. Experience peak performance with ESP.

GREAT PROFILE*

Introducing a Better Approach to Approval Plans

At Academic Book Center, we build our Approval Plan Service around you... your library’s very individual, very specific collection development profile.

It’s not a formula. It’s not a mechanized process. It’s a human, one-to-one, book-in-hand review precisely executed to meet your criteria and unique perspective — all backed up by state-of-the-art computer systems.

We’re helping libraries around the world build relevant and useful collections, efficiently. And we’re delivering measurable results.

- Our Approval Plan customers enjoy return rates lower than 3.2%.
- Ninety-percent of new titles arrive within 30 days of publication.

With the comprehensive coverage of more than 1,200 domestic publisher imprints and optional coverage of 10,000 UK titles, we offer Approval Plans that support your collection strategies.

Your profile. Our resources. That’s how great collections grow.

*Who is the gentleman in this profile? Name him in our online contest at www.acbc.com and you may be the winner of a classic set of mugs!

Health, Safety, and Environmental Data

In One Affordable Reference

Easily-to-use and completely up-to-date, this definitive compendium of health, safety, and environmental data gives your patrons the most sought-after information on the 4,700 chemicals and compounds most commonly used and studied in occupational and environmental settings.

Compiled by Genium, one of the world's leading providers of health, safety, and environmental information, the Handbook is full of vital information from chemical manufacturers, suppliers, and distributors—plus over 200 authoritative references and databases.

Unlike competing references, this book and CD-ROM includes both environmental and human effects. Pictograms for hazard statements and target organs, chemical structure, and extensive health, fire and reactivity overviews are other features that make Genium's a unique reference in the field. What's more, this resource is more affordable than alternative compilations and with our prepublication offer, you can save even more!

To order, contact your library wholesaler or call 1-800-722-4728. For a brochure, call or email Rebecca Seger at 212-337-5036; rebecca_seger@mcgraw-hill.com www.books.mcgraw-hill.com

Ullmann’s Encyclopedia of Industrial Chemistry

Save Money with Our Special Pre-Publication Offer!
Pre-Publication Price:$1,995 - Valid until December 31, 1998
Post-Publication Price: $2,295
Available Through your Vendor.

Why an Encyclopedia Dedicated to Inorganic Chemicals and Products?

Without inorganic chemicals, the chemical industry could not exist. Modern developments such as chips for microelectronics or superconductors have only been possible due to continuous development of the inorganic chemical industry.

The encyclopedia Industrial Inorganic Chemicals and Products brings together all the information on inorganic chemicals and products from Ullmann’s Encyclopedia of Industrial Chemistry into an accessible reference work. This six-volume reference with over 130 articles written by more than 300 renowned experts from industry and academia will set the standard in the field. It is the unique Ullmann’s style that will set this encyclopedia apart from any other work.

Industrial Inorganic Chemicals and Products is tailor-made for anyone interested in inorganic chemicals and materials. It bridges the gap between the basic research, chemical engineering, and chemical marketing. It is and will remain a benchmark work.

From Reviews of Ullmann’s Encyclopedia of Industrial Chemistry

“This is a major work, which will prove immensely valuable to institutions and authorities related to the chemical industry…a welcome alternative, in structure and content.”
—Chemistry and Industry

“The organization of each subject is excellent…Ullmann’s is put together well. One should expect immediate success for the set.”
—American Scientist
SwetsNet

Electronic journals
now you can streamline ordering and access!

Growing numbers of electronic journals bring with them new challenges for library managers and end users.

SwetsNet is a major new service, providing a single source for accessing a broad range of publishers' electronic titles.

SwetsNet offers:

- browsing of contents of specific journal issues
- full searching across all titles in SwetsNet or those subscribed to by your library
- searching of tables of contents and abstracts
- regular management information
- full information and support services
- simplified password administration
- SwetsNet is accessible via the WWW

For further information and trial access, contact Brian Noone at 800-447-9387

Breaking Common Ground.

The World Wide Web. It's the ultimate meeting place for like-minded researchers from different parts of the world. But only if they can get there easily and inexpensively, find one another in the midst of the mayhem, and communicate clearly over the din of the crowds. With Community of Science, they will.

Our products and services are based upon powerful, next-generation technologies designed specifically to support and advance the scientific communication process. As a result, they enable thousands of individual researchers, institutions, and societies to accomplish their objectives in ways that are most natural and productive for them. On the Web.

For instance, COS's international faculty information system, which includes the largest database of first-person researcher profiles in North America, enables them to easily disseminate information about themselves to peers, prospective collaborators, and funding supporters around the world. Our Web-based bibliographic databases, intelligently linked to the system, enable them to directly uncover even more robust information. And our mechanisms for collaborative Web-based authoring permit professional societies to manage abstract submission, peer review, and meeting management in a seamless database environment.

We understand the complexities of the scientific communication process. After all, our work originated in 1988 with the Human Genome Project at Johns Hopkins University, the boldest, most comprehensive undertaking in the history of scientific research. Since then, we've learned even more from you about what you do, what you need, and what it takes to cost-effectively secure your long-term success.

We continue to apply that knowledge today. So researchers with common interests can collaborate, communicate, and conduct research on common ground.

You don’t have to live here
to love the East Coast.

Absolute Backorder Service, Inc. offers a great way to dispose of your duplicate and unwanted material.

Our East Coast Exchange program enables your library to eliminate your deselected journals in one step. You simply send us your journals from the past 2 years and you are automatically a member. We accept any issues (within the time frame above) with the exception of newsletters, state periodicals and multiple copies of the same issue. Weekly magazines are acceptable, provided they are not the majority of the shipment.

Here are some of the East Coast Exchange benefits:

A - No start-up fees.
A - No membership fees.
A - No renewal fees.
A - Flat rate single issue fulfillment.
A - Volume and issue specific online inventory which is updated daily.

As a member, you will receive any issue(s) in our automated inventory (does not include complete volumes) for $10.00 per bibliographic number plus postage and handling.

If you do not see what you are looking for in our automated inventory, don’t worry - Absolute has you covered. We will fulfill your complete volume/single issue order requests utilizing our global vendor network and publisher’s backstock (even for single issues!) at competitive prices.

Coast to Coast Absolute is your #1 back order provider, searching world-wide to fulfill all your library needs.

"Using a tool such as this to study literary texts quickly persuades one that this is the future."

CHOICE, September 1997

This CD-ROM series that you've come to rely on for productive literary research is now available with convenient web access. The full facsimile images of all published works and full-text searching that have made these discs such an unparalleled and indispensable resource are affordable for all institutions.

The series will publish all five authors online in 1998 beginning with Walt Whitman. In 1999, each author will become the spearhead of a collection of texts and manuscripts by other authors within the genre. A must-have for all literature scholars, this database offers full-text searching of several or all of the author sites, supporting thematic research across authors and genres. In addition, research within each single author is enriched by availability of a thesaurus and multiple search fields.

Contact us today for information about a no-obligation 30-day trial and charter subscription.
From ordering to invoicing, libraries all across the country are designing service to meet their needs. Why shouldn’t you?

"A monument of historical scholarship. These biographical narratives, well-written and riveting, often read more like character sketches than dry, dusty history."
—Henry Louis Gates, Jr.

"American National Biography will be a work that every library must have."
—Arthur Schlesinger, Jr.

20,000,000 words. 24 volumes. 6,500 distinguished contributors. And 17,500 all-new biographies of the men and women whose lives have shaped the life of the nation—welcome to American National Biography.

ANB is on schedule for a January, 1999 publication. Here's why ANB will set the standard in biography for your library for years to come:

- The most inclusive biographical resource available—capturing the extraordinary diversity of American lives and achievements, from presidents to poets, folk heroes to forgers
- The most up-to-date resource of its kind, featuring biographies of notable Americans who died as late as 1995
- The work of the nation's leading historians and other scholars—and a treasury of new interpretations, new findings, new understandings of our past
- Engagingly written, accessible, easy to use, with extensive bibliographies and exhaustive indexes
- Save $500 on the special introductory offer
- Choose split billing plans that meet your budget needs.

In its relatively short history, computational chemistry has become one of the mainstays of modern industrial & academic chemistry. The Encyclopedia of Computational Chemistry provides a comprehensive reference work for many aspects of this young & fascinating discipline. All aspects of computational chemistry are discussed and methods and important applications are described. ECC is aimed at both computational chemists and experimental chemists who employ computational methods.

Introducing the new standard in American history

"An indispensable ready-reference tool for any public or academic library."
—Library Journal

Prepared under the sponsorship of American Heritage magazine, and under the guidance of an advisory board of seven prominent historians headed by John Mack Faragher of Yale University, the Encyclopedia presents the best of recent scholarship—spanning the pre-Columbian period through the 1990s—in nearly 3,000 alphabetically arranged entries written by more than 140 contributors.

• First new single-volume encyclopedia of American history in 25 years

• Full coverage of topics at the forefront of American history scholarship today including American women, African Americans, Native Americans, family life, urban history, and popular culture

• Complete and authoritative treatment of traditional subjects in American history

• 400 b&w illustrations, photos, and maps—including a portrait of every president

• A biography of every Supreme Court Justice and extensive treatment of fundamental Court rulings

• Appendices include the Declaration of Independence, the Constitution, the Presidents and Vice Presidents, the Justices of the Supreme Court, the 50 States of the Union, and Timetables of American History from 10,000 B.C. to 1998

• Comprehensive cross-referencing, index, and bibliographies

JOHN MACK FARAGHER is the Arthur Unobskey Professor of American History at Yale University. He received the Frederick Jackson Turner Award for Women and Men on the Overland Trail and was the winner of the Los Angeles Times Book Review Prize for History for his biography, Daniel Boone.

Against the Grain / November 1998
Sounds sublimely simple.

But that’s what we sell.

Books from the UK to libraries anywhere in the world.

(And especially North America.)
Obtaining the research articles you need from journals to which you don't subscribe is no longer the headache it once was. Articles In Physics®, AIP's exclusive document delivery service, now offers online purchase and delivery of single articles to anyone on the Internet—and for a very low price.

With Articles In Physics, you have access to nearly 100,000 articles from 33 of the most prestigious physics journals. You can find the articles you need by browsing on AIP's Online Journal Publishing Service (ojps.aip.org) or by searching the SPIN database on AIP's subscription-based service, PINET Plus.

Articles In Physics is fully integrated into AIP's Online Journal Service, and articles can be ordered via credit card on a secure online form. Every order is absolutely confidential and is handled by the Secure Sockets Layer (SSL) protocol, a security standard supported by the latest versions of Netscape and Microsoft web browsers.

The Articles In Physics online collection includes all AIP journals (beginning with January 1997 issues or earlier) and those of many AIP Member and Affiliated Societies. Give it a try the next time you need an article fast. To learn more, visit http://ojps.aip.org/html/artinphys/aipmain.html.

Speed, convenience, and results.
All from your ultimate document source—
ARTICLES IN PHYSICS.

Best Is Less.

Books In Print® is holding its low price.
And speed and ease of use can even pay for that.

First, let's set the record straight.
No other print source in the world gives you the wealth of bibliographic information that Books In Print does. We include more authors, more titles, more data.
Ironically, users tell us that Books In Print — even compared to electronic sources — is actually faster and easier for the majority of their searches. So easy, in fact, that library patrons can use it themselves.
It means you save money because your staff's time can be devoted to more important tasks.
Especially valuable in times of shrinking budgets.

Note, too, that ours is an exhaustive list. Why not the others? Because they're booksellers themselves, anxious to push the books they warehouse. We don't have that problem. As our name suggests, we are Books In Print. All the books in print. It's another reason why patrons can be served quickly, efficiently, economically.
Order today. Our price of $525 (just $1.45 a day) is firm only till December 31, 1998.

The 7-volume Subject Guide. The quick research route.
A must for reference and acquisition librarians and collection development specialists, Subject Guide is the quick, reliable way to look up over a million non-fiction titles, arranged by Library of Congress subject headings. It's easy enough for patrons to use themselves. And a superb guide to building specialized sections. Still at last year's price of just $369.95 ($1.02 a day) until December 31, 1998.

The 3-volume Supplement keeps you current.
Printed in March, it sums up six months of book publishing news, complete with more than 92,000 new and forthcoming titles. Supplement is only $260 (72c a day) until December 31, 1998. Get in touch now to enjoy significant savings.
