eBooks ex machina? Dispatches from the New Digital Information Order ...... 1 by Miriam Gilbert — What a difference a year makes! Between the hype and the hope, all of us in the information industries are now struggling to define (and redefine) a strategy for the place of eBooks in the digital environment. The Shot Heard ‘Round the Publishing World ........................................... 20 by Kelly Franklin — Decades ago Marshall McLuhan raised questions of matching medium to message. Most of today’s eBooks don’t yet constitute a new medium; rather they offer a new delivery mechanism for a 500-year-old medium. But, by working together to clear the hurdles to delivery of today’s peer-to-peer analog books through digital channels, we are building the infrastructure and market necessary to support the eventual realization of the promise of interactive digital books.

eBooks Two Years Later: ........................................... 22
The North Carolina State University Perspective by Nancy J. Gibbs — The Libraries at NC State University began their eBook projects on a small scale; but in reality they purchased access to a large amount of materials available electronically, became very comfortable with this new technology, and were much the richer for the experience.

Nylink’s Shared Collection: ......................... 26
A Collaborative Introduction of a New Technology by Mary-Alice Lynch — It seems inevitable that eBooks will become a growing percentage of library acquisitions, just as Internet use has exploded in the last six to eight years.

The eBook and the National Library .. 30 by Mark Bide & Kim Richardson — What is the appropriate strategy for a national library in the age of the eBook? Is this an irrelevant question or is the expenditure of hundreds of millions of dollars in the provision of infrastructure and services to make books available in electronic formats a trend that will continue?

Health Science eContent Distribution: The Challenges and Opportunities ...... 34 by Sherry Thompson — The health science marketplace offers the opportunity to distribute not only online eBook content and PDA content, but a variety of networked digital resources as well.

The Host with the Most: eBook Distribution to Libraries ..................... 35 by Rick Lugg and Ruth Fischer — Some of the current confusion in the eBook market stems from competition and uncertainty over who in the supply chain (Publishers? eBook aggregators? Book vendors? Ejournal vendors?) will perform which of the roles of content acquisition and/or delivery, and which transaction involves order and payment, or delivery of content to the end user.
