What’s new in Collection Manager?

The world’s best web-based collection management tool has just gotten better. Collection Manager, from Blackwell’s Book Services, now offers you the most advanced features in the industry. . .

Streamlined search screens
Expanded online help
More onscreen narrative instructions
Downloadable reference sheets
Efficient, one-click ordering
Support for multiple orders and orders for titles not in the database
Ability to ensure inclusion of specified titles in approval shipments
Coming soon, customized lists that can be saved, reviewed and edited

All these features, plus Tables of Contents for current year’s titles, combine to guarantee that your collection development decisions are informed by the most authoritative information available.

Collection Manager

Against the Grain / December 1999-January 2000 <http://www.against-the-grain.com> 3
It's as heroic as a life preserver, without getting wet. Now, in less time than it would take you to ask for someone's library card, you can utilize the speed and convenience of the Internet to: consolidate orders, download MARC records before the book even arrives, build and transfer carts to multiple users, sort by demand to see the bestsellers, or set your own budget to prevent overspending, and more.

The Title Source™ II is the only research tool you will ever need to uncover comprehensive information on over 2.4 million book, audio and video titles at the click of a button. Save time by searching tables of content for authors, short stories, and specific topics; and search annotations with keywords to zero in on the correct title. View book jackets, full-text reviews, and excerpts in one easy step. Discover the power of technology with the world's leading title-information database on the web.

► Once you have it, you won't know how you lived without it.

Want to see more? Absolute's unique automated inventory allows you to view absolutely everything we have in stock for immediate delivery. For your convenience, our inventory is segregated by complete volumes, single issues and is updated daily.

In the event that your required material is not listed, Absolute will assist your library in searching for missing journals by utilizing our world-wide network of vendors. In addition, we also contact publishers for complete volume and single issue orders. *If it's out there, we'll find it!*  

Absolute provides a multitude of services for your library. Browse our web page or ask for our brochure and see ALL Absolute has to offer!
YOUR SEARCH IS OVER.

You don't have to sift through a pyramid of information to find the full text of journal articles anymore.

EBSCO's integrated services now notify you of relevant articles in electronic journals if you begin your search in one of our proprietary or licensed databases. Soon you'll also be notified of appropriate full text articles in these databases, even if you start looking for information in an electronic journal. And when the article you're searching for isn't available electronically, you'll be advised if it's available in your print collection. All at your desktop. All from one system.

EBSCO provides all the services you need. No more going to the ends of the earth for the information you want.

P.O. Box 1943 • Birmingham, AL 35201-1943 • (205) 991-6600 • Fax (205) 995-1636 • http://www.ebsco.com
Mergers and Acquisitions 101

Back to School!? Again??

It's simply a fact. Mergers can have a profound effect on your acquisition department. Many things can change—pricing structures, the people you normally deal with, the ordering process. It can be as confusing as your first day on campus.

Since 1962, the Book House has maintained steady and solid growth by expanding on superior service and a solid foundation.

So, if you don't want to "start over" or if you don't have time to "wait and see if you like the new instructor," call the Book House — where it's business as usual.

Jobbers serving libraries with any book in print.
In an area of study as complex as the mind, brain, and behavior, presenting material in a manner that makes it both accessible to the novice and useful to the expert is no small feat. Throughout its long history, *The Corsini Encyclopedia of Psychology and Behavioral Science* has balanced the task admirably. Now, under the editorial guidance of a dynamic team of behavioral science editors, the *Third Edition* extends the tradition of succinct yet thorough coverage of the field. It has been expanded to include not only updated entries on timeless ideas in psychology and related disciplines, but also complete coverage of breakthrough discoveries.

This eagerly awaited revision of the classic psychology reference features:

- Over 1,200 entries—all updated—with 300 entirely NEW to this edition
- Authoritative entries from over 700 experts from around the globe
- Extensive cross-referencing throughout
- A unified bibliography of over 10,000 citations
- Four volumes (nearly 2,700 pages)

Available in the Summer of 2000 through your vendor
One flavor just wouldn’t do.
Every month, we receive thousands of books.
Billie Jo knows where each one goes.

Over the past 16 years, Billie Jo has worked in almost every department at Emery-Pratt. She currently supervises our receiving department. That's where all the books are sorted and prepared to fill customer orders. It's also where many of our specialty services take place. You see, we help our library customers by preparing their books to be "shelf-ready" before we ship them out. That includes paperback binding and reinforcement, bar coding, cataloging, theft detection devices and more. It's just another way we try to make things a little easier for the libraries we work with.

Ask about our specialty services for your next order. Billie Jo will make sure it happens.

SUBSCRIPTION SAVINGS USING INTERNET-BASED SOLUTIONS

For well over a quarter century, Cambridge Scientific Abstracts journals have provided bibliographic access to over 7,500 sources of scientific data published worldwide.

Now, most of the 58 journals that we publish are searchable on the Internet, updated weeks or months before the print or CD version goes to press. Subscription advantages include:

- **15% savings** from electronic-only option, plus much higher savings in 2000
- **Perpetual rights** to data published during your subscription
- **1-year backfile** at no additional cost
- **Campus-wide access** for an unlimited number of users
- **Cost-effective alternative** for keeping up with 7,500 sources of scientific data
- **Option to access complete archive** cumulated from 10 – 30 years of data

For a sample copy or 30-day complimentary access to any electronic journal, please contact your subscription agent or Cambridge Scientific Abstracts:

Q: How can you make your journals more valuable?

Elsevier Science is a leader in developing new products and policies for the digital library – from the ScienceDirect® platform to new approaches in journal pricing and archiving. We have worked closely with and have listened to the concerns of both scientific researchers and librarians. Here are some of the ways in which we have responded.

A Commitment to Electronic Archiving

Permanent archiving of electronic information and assured access to those archives are essential in scholarly communication. Elsevier Science is committed to maintaining an active electronic archive of its journals and to providing access to that archive to all subscribers. Elsevier Science is also working with library leaders to identify other archiving strategies that will assure libraries of the permanence of the electronic files. We know this is important and we have made it a priority.

A Leader in Electronic ILL

Elsevier Science has been licensing electronic files for network use since 1991. Using these files for interlibrary loan is important to library partners. Elsevier Science was a leader among science publishers in permitting articles from licensed electronic journal holdings to be printed and sent by mail, fax or Ariel to fulfill ILL requests. Libraries can retrieve articles more efficiently and fulfill ILL requests from subscriptions held only in electronic form. And now we are exploring options for delivering electronic files.

Standards Make Things Work

Elsevier Science has long advocated sharing of research with others in the industry to create standards. We made our detailed SGML document type definition (DTD) freely available. Results of our TULIP experiment were shared openly, as well as the data format standards that resulted from TULIP. We led the development of the unique publisher item identifiers (PIIs) and initiated a project for the creation of a comprehensive scientific font set which, when completed, will be available without charge on the Web. And we have continued to support the development of the digital object identifier (DOI). We know it requires cooperation to make things work.
Science Delivered to the Desktop

The data is clear: journals are used much more when they are available electronically at the desktop. The Elsevier Science vision is to increase scientists' efficiency by integrating information and delivering it conveniently. That has been part of the notable success of ScienceDirect®, the robust and sophisticated platform built to deliver science "at the speed of the 21st Century." We are working with other information providers to create seamless links. And we have invested in community services such as El Village®, BioMedNet® and ChemWeb, to offer discipline-specific resources. Electronic journals: in context and at your fingertips.

New Journal Pricing Policy

For more than a decade, libraries have coped with often dramatic price swings. Journal prices increase for many reasons: growth in pages, currency fluctuations, inflation and compensation for cancellations. Beginning with the subscription year 2000, the price for the complete package of Elsevier Science print journals will increase annually less than 10% (in our invoicing currencies). This new policy significantly reduces the effects of currency fluctuations—the main factor causing dramatic journal price increases. Elsevier Science will share the risks and protect library customers by providing greater price stability.

Authors and Rights

Copyright transfer is widely misunderstood and not all publishers' policies are alike. At Elsevier Science we are sensitive to authors' needs. Scientists publishing in Elsevier Science journals have wide rights to use their works to support their research and teaching. For example, authors can share their articles with colleagues, post them on campus networks and use them electronically for courses. There is neither a charge to authors nor a need to ask permission for these uses.

A: Partner with The New Elsevier

We understand your needs:

- To get better value from serials budgets.
- To provide the formats users require.
- To customize information resources.
- To deliver information faster and more efficiently than ever before.
- To provide reliable and continued access to a rapidly growing universe of research information.

Our job is to make your work easier.

Against the Grain / December 1999-January 2000

New needs New solutions
IRELAND...

Essential research resources

Gale Group offers two new research collections for historians and scholars studying Irish politics, economics, cultural history and colonialism, in particular nationalist issues and the role of terrorism.

IRELAND: POLITICS AND SOCIETY THROUGH THE PRESS 1760-1922
General Editor: Dr Marie-Louise Legg, University of London.
Newspapers have been an essential strand in the growth of Irish society and the Irish economy. They were at once the maker of, and a response to, the self-awareness of Ireland as a country separate from Britain, and their advertisements furthered the burgeoning commerce of the country. Sourced from several libraries, this collection is designed to show the rise of the modern Irish state and society in all their complexity and will be valuable to all studying and writing on politics, the arts, literature, the economy and leisure. Advisory Board members include Professor James S Donnelly, Professor D George Boyce, Professor R V Comerford, Professor Nancy Curtin, Dr Philip Bull and Dr James Kelly.

THE BRITISH IN IRELAND
Part 7: Sinn Fein and Republican Suspects, 1899-1921
Sectarian and seditious action continues to be an integral part of Ireland’s development. Part 7 of The British in Ireland Collection (Series One), documents the movements of many important suspects active in the period directly prior to 1921 and will enable scholars to trace the chain of events during the final stages of Home Rule negotiations. The archive publishes recently revealed police reports and surveillance information on individual Sinn Fein and Republican suspects: in total over 440 suspects are represented in this collection. Notorious suspects include Eamon de Valera (1882-1975); Michael Collins (1890-1922); Sir Roger Casement (1864-1916). Other Sinn Fein and Republican suspects include: Ernest Blythe; James Connolly; Major John MacBride; Maud Gonne; Countess Markievicz; Sheehy Skeffington; Arthur Griffith; Thomas Ashe and Douglas Hyde.
For more details regarding collection size, availability and price contact your Gale Group representative.

Midwinter Meeting 2000
San Antonio, Texas
January 14-19
Project MUSE® now includes scholarly journals from ten university presses! Building on the original 47 scholarly titles offered by Johns Hopkins, the MUSE collection now offers 112 full-text journals online. By merging these titles into a single database, MUSE provides scholars with the critical content they need, combined with all of the benefits of electronic subscriptions, including full-text and field searching, easy navigation, and full campus availability 24 hours a day. With our expanded list, faster servers and increased searching options, your users will find research has never been easier. And as a librarian, there's no better value for your dollar—the list price of $8,000 is much less than the cost of subscribing to these titles in print. Our flexible subscription options include discipline-oriented packages and single-title ordering to best meet your collection development needs. Substantial discounts are also offered for consortium, smaller and special libraries. Contact us now to see why there's more to MUSE than ever before.

Now MUSE includes journals from:

- Carnegie Mellon University Press
- Duke University Press
- University of Hawai'i Press
- Indiana University Press
- Johns Hopkins University Press
- MIT Press
- Oxford University Press
- Pennsylvania State University Press
- University of Texas Press
- University of Wisconsin Press

Project MUSE®
Setting the standard for scholarly electronic journals in the humanities and social sciences.

See what we've built.
The Johns Hopkins University Press
AMR is among the most widely used engineering journals in research collections around the world.

For over fifty years, Applied Mechanics Reviews (AMR), has enabled researchers and practicing engineers to manage the flow of technical information. In each monthly issue, AMR features abstracts from 475 international journals, book reviews, retrospectives, and review articles surveying the current literature and analyzing recent trends.

New in 2000

- In June, free access to online bibliographic database of article abstracts beginning in 1989

New in 2001

- Newly-designed AMR published six times a year
- Expanded selection of articles and reviews in print
- Available only online, the bibliographic database is updated monthly with the latest abstracts as had previously been available in print

Scope

Applied mechanics foundations and basic methods, dynamics and vibration, automatic control, mechanics of solids, mechanics of fluids, heat transfer, earth science, energy and environment, and bioengineering.

http://www.asme.org/pubs/amr
• full-text PDF files — including figures, tables, and high-resolution images — of all articles (from 1997) from nearly 400 journals

• easy, no maintenance access via one-time domain-name registration: no IDs or passwords required

• full search capabilities allow cross-holdings look-up from one search page

• take electronic access to only the journals you want (no bundling requirements)

• single-site, multi-site, or consortial licenses available

• access directly through Kluwer, or your regular subscription agent

• includes science/technology journals formerly published by Thomson Science/Chapman and Hall; Plenum journals to be added in 2000
