Multiscale Modeling and Simulation
A SIAM Interdisciplinary Journal

Editor-in-Chief: Thomas Y. Hou, California Institute of Technology
http://www.siam.org/journals/mms/mms.htm

Multiscale Modeling and Simulation (MMS) bridges the growing gap in communication between mathematics, chemistry, physics, engineering, computer science, environmental science, and more.

Featuring a distinguished, international editorial board, MMS is a peer-reviewed, interdisciplinary journal that stresses integration, collaboration, and communication between applied mathematics and specific application areas. Unlike application-oriented journals in specific areas, MMS focuses on new ideas and methodologies that can be used in various application fields.

As part of the family of high-quality, distinguished SIAM journals, MMS will benefit from global distribution, accelerated electronic publication, and low subscription prices.
