From Your (I-love-fall) Editor:

Every year about this time I question my sanity. So much is going on! But the weather always rejuvenates me. It’s almost cool outside and you may even need a sweater.

Well, this issue of ATG is another great one. The incredible Kristen DeVoe has put together a series of eight papers on changing workflows in technical services. And boy, are they all right on! You’ll also find that most of the authors in our “features section” have provided a behind-the-author-look in their “people profiles.”

Tony Ferguson’s Back Talk is about Freedom to Read and President Mahmoud Ahmadinejad’s speech at Columbia University, and Mark Herring ventures about eBooks in our Op Ed. This issue’s interview is with Laura Dawson, Consultant to the Book and Library Industries, and Founder of Bloggedapia. Bryan Carson’s “Legally Speaking” is about Virtual Copyright: The Applicability and Ownership of Copyright in Second Life, while Bruce Strauch asks, Can CAN-SPAM Can SPAM?

Michelle Flinchbaugh is back as our column editor for “Biz of Acq” and she provided us with two great articles for this issue. Unfortunately, you’ll only find one of them in this issue of ATG since we ran out of space. We promise to run more “Biz” in our next issue, so stay tuned! And speaking of column editors, don’t miss Sandy Thatcher’s “Anachronisms or Innovators? Reflections on University Presses As Portrayed in the Ithaka Report” in his regular column. Another regular, Peter Shepherd, has more on COUNTER, and let’s not forget our hard-working review staff, Tom Gilson, and Debbie Vaughn, who also submitted copy that we were forced to save for our December-January issue.

Plus, there really is much more, even though we had to hold over several columns for the next ATG. Be sure and renew your subscription so you don’t miss anything! And watch for the new online ATG coming soon to your desktop!

Gotta run. My cell phone and land lines are both ringing. Happy fall! Yr. Ed.

Letters to the Editor

Send letters to <ksstrauch@comcast.net>, phone 843-723-3536, or fax 843-805-7918, or snail mail: Against the Grain, MSC 98, The Citadel, Charleston, SC 29409. You can also send a letter to the editor from the ATG Homepage at http://www.against-the-grain.com.

Dear Editor:

YOUR LETTER AND NAME COULD BE HERE!

Please send letters/emails to <KStrauch@comcast.net>. — Yr. Ed.

Address: 291 Tower Drive, Saline, MI 48176.

Rumors from page 1

which he founded. Sounds like it was great fun!

Just back from the Fifth Readex Digital Institute in Chester, Vermont. It’s another world up there. No traffic lights, no one locks their doors, the flowers are beautiful and the leaves in autumn are spectacular.

Speaking of spectacular, the digitizing setup at Readex (it’s in an old funeral home) is impressive. The scanning is done with the Kirtas technology. And, guess what? Lotfi Belkhir the founder and CEO of Kirtas is speaking at the Charleston Conference on Thursday from 3-3:50. He will tell us all about it!

At the Readex Institute (above) there was a lot of talk about “sustainability.” Anyway, speaking of sustainability, the National Science Foundation (NSF) and the Andrew W. Mellon Foundation are funding a blue-ribbon task force to address the issue of economic sustainability for digital preservation and persistent access. The Task Force will be co-chaired by Fran Berman, director of the San Diego Supercomputer Center at University of California, San Diego and a pioneer in data cyberinfrastructure; and Brian Lavoie, an economist with strong interests in data preservation, and research scientist with OCLC Programs and Research. OCLC Online Computer Library Center, Inc. The Blue Ribbon Task Force on Sustainable Digital Preservation and Access will also include support by the Library of Congress, the National Archives and Records Administration, the Council on Library and Information Resources, and the Joint Information Systems Committee of the United Kingdom. Founded in 1985, the San Diego Supercomputer Center (SDSC) enables international science and engineering discoveries through advances in computational science and high performance computing. www.sdsc.edu/index.html; www.oclc.org.

And, speaking of the SDSC (above), Robert McDonald from the SDSC will be speaking on Saturday morning from 9-9:45. Check it out. The entire program is loaded at www.katina.info/conference.

And speaking of the 2007 Charleston Conference – AAAARRRRGGGG! It is coming up! And there are so many, countless people who make it what it is! Beth Bernhardt <beth.bernhardt@uncg.edu> has single-handedly fixed the program (have you looked at it?). Regina Semko <semkor@cofc.edu> has done all the registrations herself and the local arrangements as well, Leah Hinds <leah.hinds@hotmail.com> has handled the Website, the Sponsorships, and the Juried Product Development Forums, and David Lyle <david@katina.info> our IT Director has cleaned up all of the messes that we have made with the computer files and Conference registration information. And, you know what? These people are just the tip of the iceberg. Planning a Conference is not as easy as you might think! You heard it here! continued on page 10
