According to a *Library Journal* independent study, the number one barrier to eBook circulation in a library is that:

**Patrons are unaware of eBook availability in their institutions**

**Bring eBooks to where your users are...**

Increase usage and visibility by bringing your eBooks into the EBSCOhost experience.

Doing Better for Families

April 2011 250 pp. 9789264098725

All OECD governments want to give parents more choice in their work and family decisions. This book looks at the different ways in which governments support families. It seeks to provide answers to questions like: Is spending on family benefits going up, and how does it vary by the age of the child? Has the crisis affected public support for families? What is the best way of helping adults to have the number of children they desire? What are the effects of parental leave programmes on female labour supply and on child wellbeing? Are childcare costs a barrier to parental employment and can flexible workplace options help? What is the best time for mothers to go back to work after childbirth? And what are the best policies to reduce poverty among sole parents?

African Economic Outlook 2011:
Africa's Emerging Partners

June 2011 280 pps. 9789264111752

This tenth edition of the African Economic Outlook finds the continent on the rebound and expects it growth performance in the next years to resume at pre-crisis levels. The focus is Africa's Emerging Economic Partnerships, presenting a comprehensive review of Africa's expanding economic relations with countries outside the continent that until very recently did not belong to the club of traditional "donors", the OECD Development Assistance Committee. Africa benefits not only from the visible direct interactions with large emerging countries – investment, trade, aid – but also from the macroeconomic, political and strategic advantages that their rise has produced. As always, country chapters provide detailed information on a country-by-country basis and the statistical annex provides a wide variety of indicators for the countries covered.
