Do you have the need ... to WEED? Let collection development products from Bowker® keep you on track.

Collection development products like Resources for College Libraries™ (RCL) and Bowker Book Analysis System™ help thousands of academic librarians sort core titles quickly.

Academic libraries face the task of weeding on a regular basis, and collection development policies are built on it. There are many good reasons why:

- To ensure currency and relevance – purge outdated materials
- To protect or discard worn items
- To provide access to the right titles per core recommendations
- To increase shelf space for print titles or make way for the new learning commons
- To determine and take action on gaps in the collection

But weeding is hard and downright emotional at times, not to mention costly, in both time and money. With the right toolset from Bowker, weeding projects can be streamlined, decision time capped, resources and budgets saved, and collections, developed!

Let Resources for College Libraries™ (RCL) and Bowker Book Analysis System™ help.

ABC-CLIO’s eBook Collection is a perfect match for the way students conduct research today.

“Bottom Line:
For design, this rates a ten. For content, it also rates a ten. For ease of use, it’s a ten. For rational pricing (keeping the discounts firmly in mind!), ten again. All in all, this is a truly viable alternative to printed reference books. Enthusiastically recommended to public and academic libraries. It’s something your researchers can, and will, use.”
