Not Everyone Wears a Size 2.0

A Panel Discussion on Why One Size Doesn’t Fit All in the World of Discovery User Interfaces

Are you preparing to collect feedback from your users on their experience using your discovery interface? This is a presentation you won’t want to miss! Join members of the research library community at ALA Annual 2013 as they present case studies of customizations they’ve made to the Ex Libris Primo user interface. Primo is the most-widely used discovery and delivery tool in the library market today, with over 1900 institutions and counting. Product experts from Ex Libris will discuss the process of incorporating community feedback into future product releases, along with customer additions to the Ex Libris codeshare community, EL Commons. The panel will be followed by Q&A.

Guest Presenters
• Randy Oldham, University of Guelph (Member of the TUG Consortium)
• Bill Mischo, University of Illinois at Urbana-Champaign
• Ido Peled, Ex Libris North America

Saturday, June 29th
3:00p to 4:00p

SIAM/ASA Journal on Uncertainty Quantification launches

Offered jointly by SIAM and the American Statistical Association, the journal publishes research articles presenting significant mathematical, statistical, algorithmic, and application advances in uncertainty quantification. Under the leadership of Senior Editor Max Gunzburger, Editors-in-Chief James Berger and Donald Estep, and more than 35 others composing the editorial board, the journal will feature continuous electronic publication at SIAM Journals Online (http://epubs.siam.org), with complimentary access in 2013. Covering the analysis and quantification of uncertainty in areas as divergent as finance, disaster preparedness, and porous media flows, the first few articles indicate what’s to come for JUQ: great depth and breadth of coverage in uncertainty quantification research.

The first papers have published online in Volume 1.

At right are some of the interesting topics you will read about in JUQ’s maiden volume.

Authors are encouraged to submit their uncertainty quantification work for consideration for publication at http://juq.siam.org.

Recently Posted Papers

“Mean Exit Times and the Multilevel Monte Carlo Method” by Desmond J. Higham, Xuerong Mao, Mikolaj Roj, Qingshuo Song, and George Yin proposes a method to reduce the computational complexity of a simple and widely used algorithm, Euler/Monte Carlo simulation for a mean exit time.

In “Variance Components and Generalized Sobol’ Indices,” author Art B. Owen describes Sobol’ indices, which are used to determine and quantify the importance of variables used in modeling and simulation.

“Formulating Natural Hazard Policies under Uncertainty” by Jerome L. and Seth Stein present a general stochastic model to minimize expected damage from natural disasters.

“A Nonstationary Space-Time Gaussian Process Model for Partially Converged Simulations” by Victor Picheny and David Ginsbourger proposes fitting a Gaussian process model to partially converged simulation data for computational efficiency.

In “Reduced Basis Methods for Parameterized Partial Differential Equations with Stochastic Influences Using the Karhunen–Loève Expansion,” authors Bernard Haasdonk, Karsten Urban, and Bernhard Wieland consider parametric partial differential equations (PPDEs) with stochastic influences that are used to model various problems in science and engineering.

In “A Posteriori Estimates for Backward SDEs,” Christian Bender and Jessica Steiner propose a method for approximation of backward stochastic differential equations (BSDEs).

Science Translational Medicine

*Science Translational Medicine* is the newest journal from AAAS. Published with the same high-quality standards as *Science*, the journal seeks to close the gap between research and clinician by publishing important interdisciplinary research exploring new ways to prevent, treat, and diagnose widespread and rare medical conditions.

High-Impact Peer-Reviewed research in Translational Medicine and Cell Biology

Science Signaling

*Science Signaling* publishes research and commentary pertaining to cell biology. Papers selected provide improved understanding of the effects of cell chemistry on biological systems and investigate new signal transduction concepts aimed to advance discoveries in cancer research.
