In fall 2013 ABC-CLIO is poised to publish a number of titles including:

- **American Civil War: The Definitive Encyclopedia and Document Collection** (9781851096770, $625; eISBN: 978-1-85109-677-0, call 800-368-6868 ext. 2 for pricing), edited by Spencer Tucker, provides a "multidisciplinary examination of the Civil War period ranging from pre-Civil War developments and catalysts such as the Mexican-American War to the rebuilding of the war-torn nation during Reconstruction... this encyclopedia includes all significant battles and skirmishes; important figures, both civilian and military; weapons; government relations with Native Americans; and a plethora of social, political, cultural, military, and economic developments."

- **Consumer Survival: An Encyclopedia of Consumer Rights, Safety, and Protection** (978-1-59884-937-0, call for pricing), edited by Wendy Reiboldt and Melanie Horn Mallers, is a "two-volume, alphabetically arranged reference covering a broad array of topics related to consumer rights, including those of interest to consumer book populations such as older adults, veterans, and the homeless. Specific entries address critical areas including food and product safety, housing, health care, the financial industry, the automobile industry, and telecommunications..."

- **Food and Drink in American History: A "Full Course" Encyclopedia** (9781609232883, $310; eISBN: 978-1-61069-233-5, call for pricing), edited by Andrew F. Smith, "comprises two volumes containing more than 600 alphabetically arranged historical entries on American foods and beverages as well as dozens of historical recipes for traditional American foods; and a third volume of more than 120 primary source documents. Never before has there been a reference work that coalesces this diverse range of information into a single set..."

July saw Oxford University Press publish another in its series of specialized encyclopedias, spanned off from the Oxford Companion to United States History."

- **The Oxford Encyclopedia of American Business, Labor, and Economic History** (9781997388163, $395), edited by Melvyn Dubofsky, is a scholarly effort that "offers students and scholars access to information about the concepts, institutions/organizations, events, and individuals that have shaped the history of economics, business, and labor from the origins of what became the United States in an earlier age of globalization and the expansion of capitalism to the present."

**Book Reviews — Monographic Musings**

Full disclosure: it was a colleague and friend of mine, regular ATG contributor Jolanda-Pieta “Joey” van Arnhem, who asked if I would consider reviewing the subject of this month’s MM, *Time and Project Management Strategies for Librarians.* Joey and I had been communicating about teaching online classes — something we both do for the College of Charleston — and the subject of asynchronous communication came up (no surprise there). She mentioned that she and her co-author, Jerry Spiller, had written a chapter on that very subject for *Time and Project Management Strategies for Librarians,* recently published by The Scarecrow Press. I told her I would be delighted to review the title, and went about requesting a review copy. Embarrassingly, once my review copy arrived, I sat on my desk for a few weeks. My youngest child, just learning to pull up and grab things off of table-height surfaces, would frequently pull the book to the floor and, in his baby way, rifle through the pages, which would remind me that I hadn’t yet taken the time to examine it, and I would promptly put it back on my desk. That was my first mistake; I should have immediately immersed myself in this book, because once I did, I was motivated and re-charged like I hadn’t been in a while.

Many of you are likely at least somewhat familiar with the blog (and/or books) Lifehacker; its tagline reads, “tips and downloads for getting things done.” *Time and Project Management Strategies for Librarians* is the Lifehacker for librarians and library support staff. At the same time, reading this book is what I imagine it must be like going to a TED Conference, if there were a TED Conference held at library land: it offers “ideas worth spreading” from folks who work in the field, is engaging and entertaining, it isn’t cumbersome, and it provides practical information that is useful to your professional life (and, let’s face it, your professional life bears a relatively significant impact on your personal life). So, Lifehacker and a TED Conference rolled into one book... how could you resist?

Here’s the lowdown: *Time and Project Management Strategies for Librarians* is divided into eight major categories: Management Strategies; Working with Staff; Students, Volunteers, and Interns; Monitoring Time and Projects; Getting Organized; Using Technology; Work-Life Balance; and Professional Development. Each section includes several chapters, none more than ten pages. Chapters cover topics on both macro- and micro-levels, from library-wide prioritizing using Six Sigma tools to personal productivity, and from staffing various service points to stress reduction. Authors represent the full spectrum of library professionals and those who work with a library in some capacity: school librarians, public librarians, academic librarians, special librarians, library school faculty, library volunteers, trained librarians working in industry, non-library faculty serving on library committees, and more. This rich cohort of contributors demonstrates that all of the ideas, continued on page 48

The publishers and Apple began meeting in December 2009 and, by January 2010, “agreed to work together to eliminate retail price competition in the eBook market and raise the price of eBooks above $9.99.” Opinion at 11. According to the opinion Apple was the linchpin in the conspiracy between and among Apple and the publishers. “It provided the Publishers with the vision, the format, the timetable, and the coordination that they needed to raise eBook prices.” Id.

Apple executed individual “agency agreements” with each of the publishers under which Apple would act as an “agent” in selling eBooks at a retail price set by the publishers (which were $3 to $5 higher than Amazon’s $9.99 retail price).

The agreements also included a price parity provision, or Most-Favored-Nation clause (“MFN”), which not only protected Apple by guaranteeing it could match the lowest retail price listed on any competitor’s e-bookstore, but also imposed a severe financial penalty upon the publishers if they did not force Amazon and other retailers similarly to change their business models and cede control over eBook pricing to the publishers.

On April 11, 2012, the Department of Justice filed a civil suit against Apple and five of the six largest U.S. publishers. (Thirty-three states filed their own cases against the defendants, which were joined with the DOJ’s suit.) On the same day, the DOJ filed a proposed consent decree setting the case against Hachette, HarperCollins, and Simon & Schuster. After considerable fireworks, the settlement was approved by the court, and settlements subsequently followed with the other publishers. Only Apple chose to go to trial.

In the court’s view, the MFN “eliminated any risk that Apple would ever have to compete on price when selling eBooks, while as a practical matter forcing the Publishers to adopt the agency model across the board.” Opinion at 48. The MFN clause “literally stifled the spines of the Publisher Defendants to ensure that they would demand new terms from Amazon.” Id. at 56. And during their negotiations with Amazon, the publishers shared their progress with one another.

Since “the laws of supply and demand were not suspended for eBooks” when the publishers increased the prices of their eBooks, they sold fewer books. Opinion at 97. Thus, consumers suffered in a variety of ways from this scheme to eliminate retail price competition and to raise eBook prices: some consumers had to pay more for eBooks; others bought a cheaper eBook rather than the one they preferred to purchase; and still others deferred a purchase altogether rather than pay the higher price. Id. at 98.

Analyzing the trial record, Judge Cote found that there was “compelling evidence” that Apple “conspired[ed] with the Publisher Defendants to eliminate retail price competition and to raise eBook prices” and “overwhelming evidence that the Publisher Defendants joined with each other in a horizontal price-fixing conspiracy.” Opinion at 113. Apple was “‘a knowing and active member of that conspiracy … not only willingly join[ing] the conspiracy, but also forcefully facilitate[ing] it.” Id.
