In the case of the subtitle example above, that would be:

```plaintext
$page->subtitle()
```

The worst thing I could say about Kirby is that it prescribes a directory structure and naming scheme to a certain extent. Visible content should be in a subdirectory of Kirby’s `content` folder, named according to `number-name` scheme such as “01-blog” or “02-comics.” Unnumbered folders are “invisible,” meaning they are still Web-accessible but do not appear in auto-generated navigation. Subdirectories follow this same scheme, with the numbers starting over from 01 in each folder.

Again, I found this hierarchy sensible and didn’t consider it limiting to the project at hand. Admittedly, it does mean that media content like my image files are spread out in each individual directory subdirectory. If you need to house all media together in one directory or in another structure, as I could see being useful for a digital library admin who didn’t want to reinvent a wheel, you could get around this limitation with Kirby’s custom metadata fields.

After considering your projects needs, I recommend experimenting with each of these flat file systems to see if it’s right for the project and the people working on it. All are available on GitHub (Kirby’s licensing is based on the honor system). Jekyll is very capable and probably fairly simple to use and maintain if you develop in Ruby. If you’re more comfortable in PHP, Pico and Kirby are very similar on first, and even second, glance. I found Kirby easier to work with and extend. Plus, if I had problems Kirby’s documentation cleared things up faster than Pico’s did.

And then there’s the fact that I was making a Webcomic, and what comics creator could resist a name that recalls the King, Jack Kirby?

Rumors
from page 86

Speaking of ATG profiles, I noticed that Anneliese Taylor (p.30) noted that in her spare time, she enjoys anything that gets her away from a computing device. Ain’t it the truth?

And reading the Forbes interview with Anthea Stratigos (see above) I was interested to see that she and her husband, Greg Chagaris, make a point of going computer-less when they vacation. This may be a growing trend?

One last thing before I go, what do you think is the sexiest part about being a librarian? Got this from Ileana Jacks who found it on Instagram.

Now I gotta go! But be sure and visit the ATG archive on the Purdue University Press website not to mention the proceedings as well.

Happy Spring! ♦

Check out Lindsay Barnett’s new couch. Do you think Charlie was watching the Academy Awards?

BORN AND LIVED: I’ve lived all over the place! I grew up in southern Idaho and Salt Lake City, went to college in Chicago, taught English as a Foreign Language in Shanghai, and then moved to Durham, North Carolina. My first three books are set in Chicago, a city I dearly love.

IN MY SPARE TIME: Between writing and working full-time, I hardly feel like I have spare time! I read a lot, both for work (I run two book clubs) and for fun. I like to cook and eat, and then moved to Durham, North Carolina. My first three books are set in Chicago, a city I dearly love.

IN MY SPARE TIME: Between writing and working full-time, I hardly feel like I have spare time! I read a lot, both for work (I run two book clubs) and for fun. I like to cook and eat, and then I read a lot of cookbooks. I run and enjoy hiking. I’m interested in quilting, but have only made two baby quilts (though I’ve bought fabric for several other quilts).

FAVORITE BOOKS: I’ve been telling everyone I meet to read The Black Count by Tom Reiss. I’m also a big fan of Wolf Hall and Bring Up the Bodies by Hilary Mantel. For romance novels, I love The Outsider by Penelope Williamson, anything Carla Kelly writes, Simply Love by Mary Balogh, and Jennifer Crusie’s Faking It. I’m sure if you asked me on a different day, you’d get a different list. Asking a librarian this question is a bit like asking a mother to pick her favorite child.

PHILOSOPHY: Perfect is the opposite of good. Anne Klinefelter, the director of the UNC Law Library, told me that my first year of graduate school. Honestly, if I waited for perfect, I would never get anything done (can you tell that I’m a big picture person, instead of a detail-oriented person?).

MOST MEMORABLE CAREER ACHIEVEMENT: I have two careers, so I’ll answer for both of them. Winning the RWA Librarian of the Year Award was fantastic. And getting the phone call from Megan Long for my first book was a wonderful feeling. I had been having a really terrible month of May. When Megan told me the production schedule and how quickly I’d have to turn the book over, she said, “Do you think you can do that?” My exact response was, “I’ve spent the past week force feeding a cat. I can do anything.” It took Megan a couple seconds to respond with anything more coherent than a “um, okay.”

HOW/WHERE DO I SEE THE INDUSTRY IN FIVE YEARS: eBooks and self-publishing are changing the market a lot (which we all know). Even though libraries and publishers are fighting out the role of libraries and eBooks, with brick-and-mortar stores struggling and the number of books available online is skyrocketing, I think authors and publishers will start placing greater value on the unique role of the library and librarians in getting books into the hands of readers (there are many authors and publishers who recognize this already). ♦

holding to this opinion.
There is not space here to list all of the things
like to talk seriously about the Pew Report (How Americans Value Public Libraries in Their Communities, http://libraries.pevinternet.org/files/legacy-pdf/PPI_Libraries%20in%20communities.pdf) and what we might do to increase what is already a very positive margin of support for public libraries, or indeed all libraries.
The authors of the Pew Report identified nine types of library users from “Library Lovers” to “Off the Grid,” but then
identified nine types of library users from
2. Figure out how to identify new members of your community, give them a copy of the Top 10 list, a map showing where the library is located, and something telling them how to get a library card.
3. Hold non-library events of all sorts in the library to get those who have never been to the library to go there. Invite community groups to hold their meetings in the library — and don’t charge them.
4. All libraries have unneeded books, magazines, DVDs, etc. Give/revolve collections of these sorts of things to nursing homes, offices, housing centers, etc. Make sure every item has an invitation to visit the library affixed to it.
5. “Facilitate” the ability of those who visit/help the elderly, the sick, the poor to take good but no longer needed library materials to these members of our communities. These helpers will welcome such materials as a way of not simply going to hear about how their friend/client’s gall bladder is doing every time they visit. Maybe they can also take an inspiring biography or book of poems to read to the person they are visiting.
I have a souvenir T-shirt from one of the University of Hong Kong Library’s annual library leadership retreats that has the following statement by the Argentine writer and librarian
Jorge Luis Borges written on it: “I have al-
